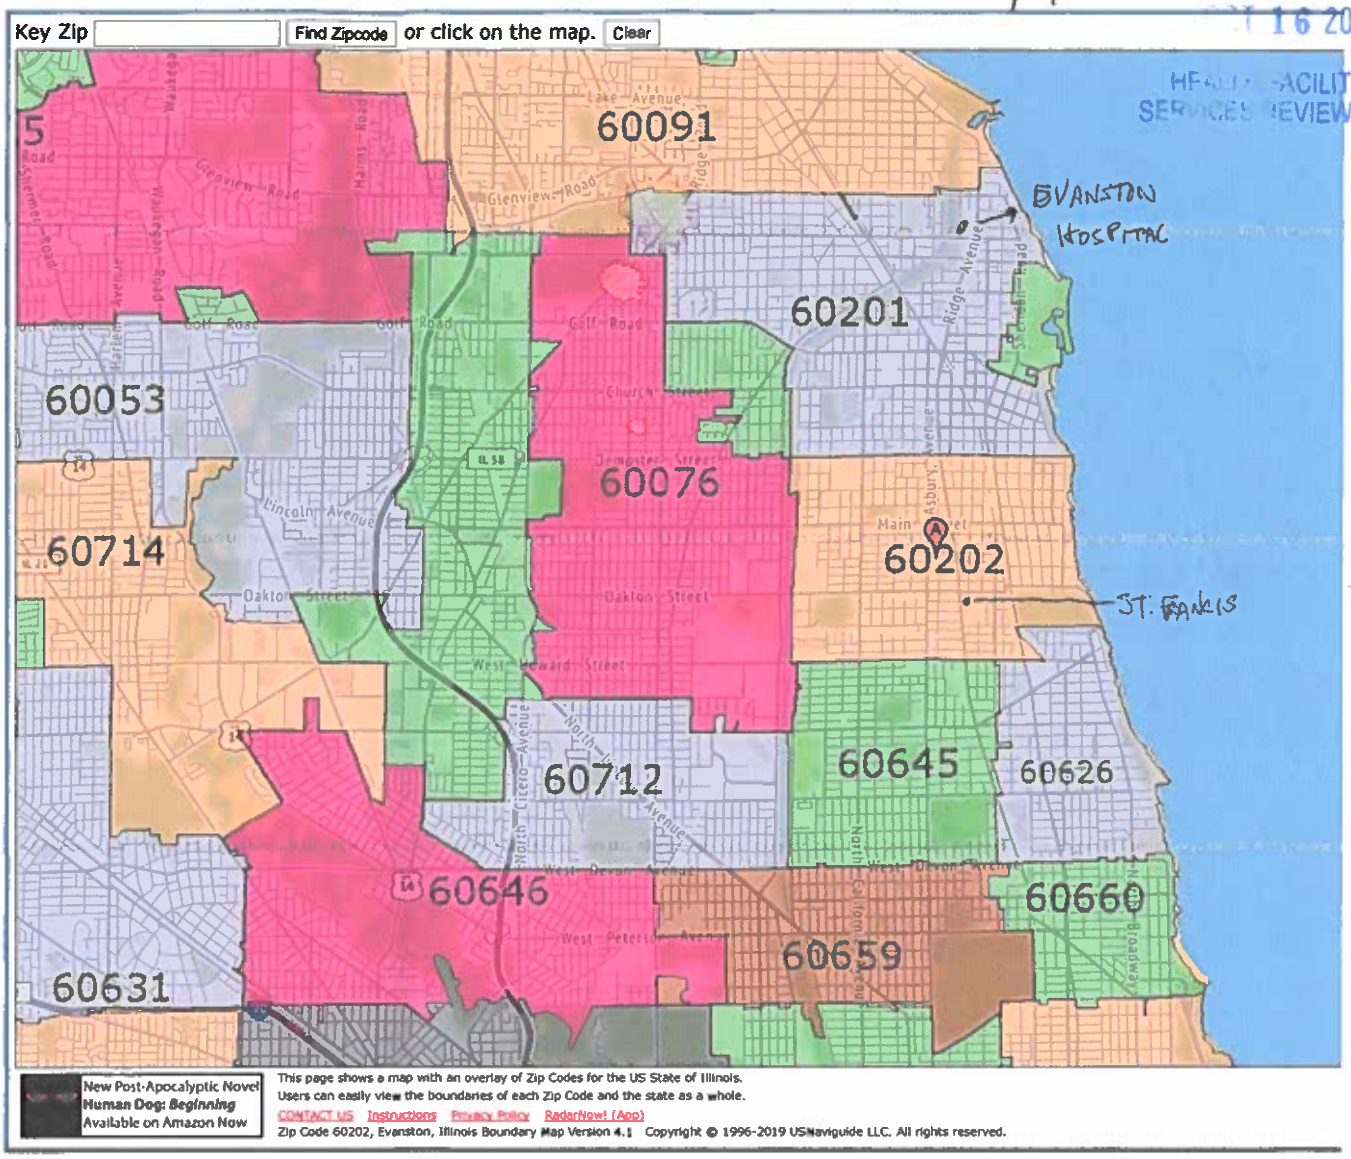
10/11/19



Hello Ms Avery:

This map is an expanded view of zip code 60202 to include surrounding zip codes. The population density of 60202 is 10,000 persons per square mile. Total population about 32,000. To the best of my ability to determine it there are no other hospitals located in these geographic boundaries that perform obstetrics. There are hospitals on the periphery however. The population of these zip codes is about 200,000.

Thanks!

Thomas J. Chorlton M.D.
