With Vaccine Allocations Increasing, Illinois Launches Call Center to Bridge Digital Divide and Assist with Vaccine Appointments

Vaccine Appointment Call Center open 7 days a week at 833-621-1284

SPRINGFIELD – The Illinois Department of Public Health (IDPH) today launched the Vaccine Appointment Call Center to assist people who do not have access to or who have difficulty navigating online services in making appointments to receive the COVID-19 vaccine. As Illinois begins to receive significantly more vaccine from the federal government and appointments become more widely available, this call center will be critical in bridging the digital divide and ensuring the vaccine reaches all communities.

“We want to make sure our most vulnerable populations, such as our seniors and individuals in heavily impacted communities who may not have access to online services, are able to make appointments to receive the COVID-19 vaccine,” said IDPH Director Dr. Ngozi Ezike. “While vaccine is still limited, our allocations are increasing significantly and we want all Illinoisans to have access as quickly and easily as possible.”

Currently, the call center is open seven days a week from 6 am to midnight. There are approximately 500 agents answering calls with the ability to expand during peak periods. The call center has English and Spanish speaking call agents with the availability for translation into other languages.

Call agents will help individuals who do have access to online services navigate the various registration sites. However, if the individual does not have access to online services or is unable to navigate the site, the agent will make an appointment on their behalf. Individuals will need to provide the agent with their name, address, email (if available), mobile phone number, date of birth, and eligibility. The agent WILL NOT ask for any financial information and the call center WILL NOT share information with the U.S. Immigration and Customs Enforcement agency.

During heavy calling periods, callers could experience wait times before speaking with a call agent. In the coming week, the call center will offer the option for callers to leave a message and be called back when an agent is available.
