Drone use for hunting prohibited in Illinois, IDNR reminds hunters

SPRINGFIELD – The use of unmanned aircraft, or drones, for any aspect of hunting or recovery of wildlife is unlawful, the Illinois Department of Natural Resources is reminding the public.

“The use of drones for hunting is unlawful in Illinois, but it also goes against the spirit of fair chase and widely accepted hunting ethics,” said **Jed Whitchurch, director of the IDNR Office of Law Enforcement**. “Illinois Conservation Police officers will be monitoring for drone use during the fall and winter hunting seasons. We encourage all hunters to familiarize themselves with the Wildlife Code and wish them a safe and successful hunting season.”

The fall hunting season kicks into gear on Sunday, Oct. 1 with the opening of archery deer and turkey seasons throughout Illinois.

IDNR and conservation police have received several inquiries from the public about the use of drones for scouting and tracking animals. Hunters are advised to review all requirements of the [Illinois Wildlife Code](#), which regulates the taking of wildlife and the use of unmanned aircraft in these situations (520 ILCS 5/2.33(i) and 520 ILCS 5/1.2o).

The unlawful use of drones for hunting and recovery efforts could result in enforcement action, including but not limited to the seizure and forfeiture of unlawfully used equipment.
