neglect and exploitation, as well as material targeted at mandated reporters. The materials are designed to inform professionals and the general public about the signs of abuse, neglect and exploitation and encourage them to report cases to the Adult Protective Services Program.

**Prevention Efforts.** A statewide initiative titled B*SAFE (Bankers and Seniors Against Financial Exploitation), mandates training of new and current bank employees with direct customer contact in an effort to help them identify, report, and prevent financial abuse of older persons and adults with disabilities.

New employees must be trained within the first six months of employment, and training must be repeated every three years. More than 800 bank employees were trained in 67 trainings throughout the state utilizing the B*SAFE training module in FY 2016.

The Department on Aging also works with domestic violence advocates to increase referrals and recognition of elder abuse and abuse in adults with disabilities as another form of family violence through additional presentations at local Family Violence Coordinating Councils and the statewide Illinois Family Violence Coordinating Council Steering Committee.

**Training and Education.** The Department hosted its 29th Annual Adult Protection and Advocacy Conference on August 24–26, 2015 in Oak Brook, Illinois, providing continuing education for approximately 250 attendees representing law enforcement, medical and legal professions, Adult Protective Services, Long Term Care Ombudsmen, and other professions.

Kathleen Quinn, Executive Director of the National Adult Protective Services Association, delivered the keynote titled, “Bringing Adult Protection Services Out of the Shadows,” focusing on the need nationwide for increased funding to develop a concrete system to protect persons with disabilities and older persons who are victims of abuse, neglect, and exploitation.

Much of the conference addressed successfully meeting the needs of adults with disabilities. To that end, Shirley Pacey of Blue Tower Training and Stephanie Campbell, a self-advocate, presented a plenary session promoting effective communication when working with persons with intellectual and/or developmental disabilities. In addition, Ann Ford, Executive Director of Illinois Network of Centers for Independent Living, addressed issues involved with the Americans with Disabilities Act (ADA).

Dr. Holly Ramsey-Klawsnik explored domains involved with mental capacity, limitations, and potential misuses of brief tests used to screen clients. Troy A. Johnson of The Center on Halsted presented on unique issues faced by older lesbian, gay, bisexual and transgender (LGBT) adults. Jim Vanden Bosch, Executive Director of Terra Nova Films, presented on a case study of Norman, who served as the basis for a powerful film on elder abuse.

The conference offered participants updates on Social Security and Medicare, legislative matters, fatality review teams, how to handle record requests, expansion of the Long Term Care Ombudsman Program, elder mistreatment among minorities, self-neglect and hoarding. Staff from the Illinois Department of Human Services’ Divisions of Developmental Disabilities and Rehabilitation Services Programs also presented program updates.

**Additional Training – Webinars.** During Fiscal Year 2016, the APS program launched a series of webinars to enable caseworkers and supervisors to receive re-certification and continuing education online. The goal is to update supervisors and caseworkers on a regular basis on adopted rules, protocols, policies and procedures and timely topics and issues.
How many reports of abuse were received?
During the period of July 1, 2015, through June 30, 2016, there were 15,924 reports of abuse received by the program, which included 3,026 reports involving adults with a disability age 18–59.

Adult Protective Services Annual Report FY 2016
The Illinois Department on Aging’s Adult Protective Services Program is an intervention model responding to reports of alleged abuse, neglect, and exploitation of older adults and adults with disabilities who live at home. The program is locally coordinated through 42 provider agencies throughout the state who conduct investigations and work with older adults and persons with disabilities aged 60–59 to resolve abusive situations.

This annual report covers the period of July 1, 2015, through June 30, 2016 (State Fiscal Year 2016). During this time, there were 15,924 reports of abuse received by the program, constituting 1,066 more reports than last fiscal year. Sixty percent of the reports alleged abuse of adults between the ages of 60 and 85. Nineteen percent of reports alleged abuse of an individual with a disability, while 20 percent alleged abuse of a person age 86 or older. Nearly half of all reports alleged financial abuse, though victims may experience more than one type of abuse.

Types of abuse
Abuse refers to the following types of mistreatment of any Illinois resident 60 years of age or older and any adult with a disability age 18–59 who lives in the community and is abused by another person.

Physical Abuse — causing the infliction of physical pain or injury to an eligible adult.

Sexual Abuse — touching, fondling, or any other sexual activity with person when the person is unable to understand, unwilling to consent, threatened, or physically forced.

Emotional Abuse — verbal assaults, threats of abuse, harassment, or intimidation so as to compel the eligible adult to engage in conduct from which s/he has a right to abstain or to refrain from conduct in which the eligible adult has a right to engage.

Confinement — restraining or isolating an eligible adult for other than medical reasons.

Passive Neglect — another individual’s failure to provide an eligible with the necessities of life including, but not limited to, food, clothing, shelter, or medical care, because of failure to understand the eligible adult’s needs, lack of awareness of services to help meet needs, or lack of capacity to care for the eligible adult.

Willful Deprivation — willfully denying assistance to an eligible adult who requires medication, medical care, shelter, food, therapeutic device, or other physical assistance, thereby exposing that person to the risk of harm.

Financial Exploitation — the misuse or withholding of an eligible adult’s resources to the disadvantage of the eligible adult and/or the profit or advantage of another person.

Illinois Law
The Illinois Department on Aging administers the statewide Adult Protective Services (APS) Program, under the authority of the Adult Protective Services Act (320ILCS 20/1 et seq.) to respond to reports of alleged mistreatment of any Illinois citizen 60 years or older and any adult with a disability age 18–59 who lives in the community at the time of the report.

The APS Act is locally coordinated through 42 provider agencies designated by the Regional Administrative Agencies (RAAs) and the Department on Aging. All Adult Protective Services Caseworkers are trained and certified by the Department, which promulgates the Program’s policies and procedures and oversees the monitoring of services through the RAAs.

Depending on the nature and seriousness of the allegations, a trained caseworker makes face-to-face contact with the alleged victim within the following timeframes: 24 hours for life threatening situations, 72 hours for most neglect and non-life threatening physical abuse reports, and seven calendar days for most financial exploitation and emotional abuse reports.

Caseworkers have 30 days to perform a comprehensive assessment to determine if the client has been mistreated and his/her need for services and interventions. If abuse is substantiated, the caseworker involves the eligible adult in the development of a case plan to alleviate the situation. Caseworkers always attempt to utilize the least restrictive alternative that will allow the eligible adult to remain independent to the degree possible.

In FY 2016, social workers accounted for the majority of abuse reporting (21 percent), followed by family members (15 percent), medical personnel (12 percent), self (8 percent) and others.

Fatality Review Teams. The APS Act includes provisions that the Director of the Department on Aging, in consultation with an Advisory Council, law enforcement, and other professionals appoint members to a minimum of one Fatality Review Team (FRT) in each of the Department’s Planning and Service Areas (PSAs). The purpose of each team is to assist local agencies in identifying and reviewing suspicious deaths of adult victims of alleged, suspected or substantiated abuse or neglect in domestic living situations, facilitate communications between officials responsible for autopsies and inquests and persons involved in reporting or investigating abuse, evaluate means by which the death might have been prevented, report findings to the appropriate agency and Advisory Council, and make recommendations to help reduce the number of at-risk adults and increase prosecutions, if appropriate.

Fatality Review Teams were formed in PSAs 01, 02, 05, 06 and 07 in 2014. PSAs 03, 04, 09 and 10 formed teams in 2015. In FY 2016, FRTs were established in PSA 12, which covers the city of Chicago, and PSA 13, which covers Cook County (outside Chicago). In addition, a Regional FRT was formed in PSA 05.

FRTs provide important opportunities to foster communication among multiple agencies in developing a greater understanding of the incidence and causes of premature deaths and the methods for preventing those deaths.

Partnerships. In addition to partnerships forged with coroners, prosecutors and others in relation to Fatality Review Teams, the Department continues to partner with the Illinois Department of Human Services, Division of Developmental Disabilities, Mental Health and Rehabilitation Services to ensure clients receive the appropriate referral for services. In FY16, IDoA also joined the Illinois Silver Search Task Force, which was created as part of the Endangered Missing Person Advisory and is charged with developing a coordinated statewide awareness program used when a person with Alzheimer’s disease or other dementia is reported missing.

A wealth of public education materials on abuse is distributed on an on-going basis, including information targeted at four different professional groups (law enforcement, financial institutions, inhome workers and health care providers) explaining the indicators of abuse,
