Emergency Purchase Details

Emergency Category (select the appropriate option(s) from the checklist below):

- Involving threat to public health or public safety
- Immediate expenditure is necessary for repairs to State property to protect against further loss or damage
- To prevent or minimize serious disruption in critical State services that affect health, safety, or collection of substantial State revenues
- To insure integrity of State records

Describe the scope of the emergency. Show justification for the need of an emergency contract, the selection of the vendor, and explain why the need for work cannot be met through a competitive process:

The Department of Corrections notified the Capital Development Board that the transformer that supports the Dixon Correctional Center Warehouse Building failed. This transformer supplies electrical power for office equipment, lights, freezers, coolers, an elevator, loading dock doors and chillers. The transformer is almost 60 years old and beyond its useful life. Normal life expectancy for a transformer is 30 years. Without some emergency support, there is a possibility of losing almost \$200,000 in frozen and refrigerated product used for making daily meals. The facility warehouse has partial power now by utilizing an emergency generator, but the electrical needs have exceeded its capacity. A borrowed additional generator has also been brought to the site for additional power as the freezers, which are the main concern, are not able to be hooked up to the initial emergency generator. The Department of Corrections has requested that CDB declare an emergency to assist with the assessment of the transformer failure, to provide recommendations and guidance for temporary solutions, and to provide design and construction services for the replacement of the failed transformer.

This project began through the emergency selection of an Architect/Engineer ("A/E"); this exempts the selection from a 14-day solicitation required through Qualifications-Based Selection ("QBS"). Considering the time frames needed for the selection, negotiation and execution of an A/E contract followed by bidding and award procedures, an assessment of the failed transformer followed by temporary solutions and the design and replacement of the failed transformer under the existing processes would likely not begin for several months. For this reason, emergency purchases are necessary to assess, provide temporary solutions such as renting a temporary generator and/or a temporary transformer, followed by replacing the failed transformer as quickly as possible in order to protect against the threat to public health and safety, to protect against further loss or damage and to prevent or minimize serious disruption in critical State services. Block Electric Co., Inc., located in Niles, IL, was selected because they are relatively in close proximity to the site, they have the expertise and experience to complete the work, and they can respond immediately to this request for emergency services.

Describe the scope of work or services provided to include special limitations, conditions and incorporated documents:

The scope of work provides for supplying and installing a minimum 750 kVA, 208/120V, 3 phase rental generator to supply power to the building until a rental transformer can be installed. The scope also provides for supplying and installing a 750kVA, 2400V PRI, 208/120V SEC, 3 phase rental transformer until a permanent transformer is installed in a future project. All related cabling, conduits, and generator fuel are to be included. Incorporated documents include the March 2009 Standard Documents for Construction & Supplement. Services provided under this procurement should not exceed \$100,000.00, which is a place-holder prior to entering into a Construction Contract, without prior authorization from the Capital Development Board in consultation with the Chief Procurement Office. Final Actual Costs will be reported upon project completion and project close-out.
