EMERGENCY PURCHASE STATEMENT / NOTICE OF AWARD

Agency: Capital Development Board Point of Contact: Heather Oxley

Location of Emergency: Logan Correctional Center

Vendor: Egzii Electric, Inc. (22948)

Address: 3009 Singer Avenue City: Springfield State: IL Zip: 62703

Emergency Purchase Details

Emergency Category (select the appropriate option(s) from the checklist below):

- Involving threat to public health or public safety
- Immediate expenditure is necessary for repairs to State property to protect against further loss or damage
- To prevent or minimize serious disruption in critical State services that affect health, safety, or collection of substantial State revenues
- To insure integrity of State records

Describe the scope of the emergency. Show justification for the need of an emergency contract, the selection of the vendor, and explain why the need for work cannot be met through a competitive process:

The Illinois Department of Corrections has requested that the Capital Development Board provide assistance in seeking emergency purchases for the expedited repair of certain electrical failures at Logan Correctional Center. During a storm on April 8, 2020, it is believed Logan Correctional Center received a power surge when thirty-two Ameren poles were damaged. This power surge blew apart a high voltage line in an electrical vault that supplies power to Housing Unit 14. During this explosion, another high voltage cable's insulation was damaged that is currently supplying re-routed power to the Health Care Unit, Gymnasium and Vocational School at the facility. This damaged area in the loop has been isolated resulting in loss of power to Housing Unit 14. Currently all of the buildings are back on normal power except for Housing Unit 14 which is being powered by a rented generator. Additionally, the facility has concern about water filling up the vault and shorting the previously storm-damaged hot cables and causing further damage. There has been a temporary sump pump to remove water to prevent the water level from reaching the cable. Should another power failure occur, the facility would not be able to restore power to the loop as they have lost redundancy.

This project began through an Emergency Selection of an Architect/Engineer ("A/E"); this exempts the selection from a 14-day solicitation required through Qualifications-Based Selection ("QBS"). Considering the time frames needed for the selection, negotiation and execution of an A/E contract, followed by bidding and award procedures an assessment and repairs to the electrical system at Logan Correctional Center under the existing processes would likely not begin for several months. For this reason, emergency purchases are necessary for construction services to provide electrical repair work as quickly as possible in order to protect against the threat to public health and safety and to minimize a serious disruption in critical State services. Egzii Electric, Inc., located in Springfield, IL was selected to provide construction services as they have the necessary experience for this work, are familiar with and in close proximity to the site and they can respond immediately to this request for emergency services.

Describe the scope of work or services provided to include special limitations, conditions and incorporated documents:

The scope provides for assisting the Architect/Engineer of record with assessing damage to the high voltage electrical loop, testing cable, testing generator switchgear and providing emergency repairs to restore utility power to affected areas as directed by the Architect/Engineer and approved by CDB. Incorporated documents include the March 2009 Standard Documents for Construction & Supplement and design documents provided by the Architect/Engineer. Services provided under this procurement should not exceed \$100,000.00, which is a place-holder prior to entering into a Construction Contract, without prior authorization from the Capital Development Board in consultation with the Chief Procurement Office. Final Actual Costs will be reported upon project completion and project close-out.
