Invest in your future with the State of Illinois Deferred Compensation Plan.
Contributions to the DCP

Employee contribution limits
You may contribute as little as $10 per pay period or $20 per month to the DCP, whichever is greater. The maximum amount you can contribute is 100% of your pay, subject to IRS limits. (For current limits, visit the T. Rowe Price website at rps.troweprice.com.)

Employee before-tax contributions
Through your payroll deductions, you may contribute to the DCP by making before-tax contributions, which are made before taxes are taken out of your paycheck.

Before-tax contributions help you to lower your current taxable income. This means you can get a tax break now and keep more of your money in your pocket. Before-tax contributions also have the chance to compound tax-deferred. You pay taxes on the contributions and any earnings only when you take a distribution—generally when you retire.

Employee Roth contributions
You may also contribute to the DCP by making Roth after-tax contributions. Unlike before-tax contributions, Roth contributions are made with after-tax dollars, or money on which you’ve already paid taxes. The good news is that the balance of your Roth contributions and any earnings are not taxed when you take a qualified distribution.*

Employee catch-up contributions**
If you will turn 50 or older this year and are already contributing the maximum amount allowed by the DCP, you may contribute an additional amount of catch-up contributions up to the IRS limit. (For current limits, visit the T. Rowe Price website at rps.troweprice.com.)

Employee special 457 catch-up contributions**
If you do not defer up to the IRS contribution limit in any given year you are eligible, this provision allows you the opportunity to contribute some or all of these unused or underutilized deferral amounts. You may defer the special 457 catch-up contributions during the last three years before you reach your “normal retirement age” as defined in the Plan document. During these three years, you are able to defer your regular limit plus an amount that you were eligible to contribute in previous years but did not. Additionally, during those three years, you can defer before-tax and Roth contributions up to twice the IRS deferral limit amount in effect for that year.

For more information, contact CMS at 1-800-442-1300.

Rollover contributions
Your Plan accepts rollover contributions of vested balances from other employers’ eligible plans. For more information, contact CMS at 1-800-442-1300.

In-plan Roth rollovers
In addition to before-tax and Roth contributions, the DCP allows in-plan Roth rollovers. An in-plan Roth rollover lets you convert non-Roth amounts (e.g., elective salary deferrals or rollover contributions) to a Roth account inside your Plan instead of rolling them into a Roth IRA outside your Plan. The in-plan Roth rollover applies Roth tax advantages to more of your Plan savings. This option is only available to participants. For more information about tax advantages for an in-plan Roth rollover, consult your tax advisor.

To learn more, such as which amounts are eligible and how often rollovers can occur, contact T. Rowe Price at 1-888-457-5770 during business days between 6 a.m. and 9 p.m. central time.

Excess contributions
Contributions that exceed the maximum Plan limit are not allowed to remain in the DCP. It is your responsibility to stop or change the amount of your contributions so that you will not exceed the limit. If you go over the limit and a correction cannot be made through the payroll process, the excess contributions will be returned to you as taxable income as soon as possible.

*Roth qualified distributions: A qualified distribution is tax-free if taken upon the participant reaching age 59½, becoming totally disabled, or upon the participant’s death and at least 5 years have passed since participant’s first Roth contribution. If your distribution is not qualified, any withdrawal from your account will be partially taxable. These rules apply to Roth contributions only from employer sponsored retirement plans. Additional Plan distribution rules apply.

**Please note that you cannot use both catch-up contribution options in the same calendar year, and you may not exceed the IRS catch-up contribution limits, which may vary each year.
Investments available in the DCP

Understanding that participants have different levels of experience and comfort with investing, the DCP gives you two ways to invest.

The age-based investment path
Choose a Retirement Trust if you prefer an age-based portfolio that automatically adjusts over time.

The build-your-own portfolio path
Choose among the DCP’s other investment options to create your own diversified portfolio if you prefer to have more control over choosing and monitoring your investment strategy.

Option 1: Age-based investment
Pre-assembled Vanguard Target Retirement Trusts offer a single investing solution
Vanguard Target Retirement Trusts are now available for your age-based portfolio.
Features include:
• A diversified portfolio in a single investment based on the year you want to retire.
• A risk/return objective that changes over time, gradually reducing exposure to risk as your target retirement date nears.

Selecting a Vanguard Target Retirement Trust
To find a target date investment that might work for you, simply ask yourself when you want to retire. If you’re not sure, you can decide by adding 65 to your birth year.

Option 2: Build-your-own portfolio
A build-your-own portfolio offers added control
If you prefer to create and monitor your own investment strategy, the DCP offers additional investment options to choose from to build a diversified portfolio.

Passively managed investments
The DCP provides a diverse selection of passively managed investment options, which are appropriate for long-term investing and have a long-term performance history.

More about passively managed investment options:
• Passively managed investment options buy some or all of the stocks or bonds that make up a widely used market index share (e.g., the S&P 500).
• A passively managed investment option seeks to mirror the performance of the index.
• Typically, passively managed investment options tend to have lower operating expenses than actively managed investment options.
• Because the index investment manager invests in the securities that make up the selected market index, the investment requires little management. And with the index holdings remaining fairly constant over time, turnover of securities in a passively managed investment is low—resulting in lower costs.
• All investments are subject to risk, including possible loss of principal.

What is a market index?
A market index is a portfolio of securities that represents a particular market or section of the market. Although you cannot invest directly in a market index, you can invest in an “index” investment option that is designed to mirror a particular index by investing in the securities that compose the index.
For example, in a stock index, all the stocks generally have at least one trait in common—they might trade on the same stock market exchange, relate to the same industry, or have similar sizes. Among the more widely known stock indexes are the S&P 500, the Nasdaq Composite, the Dow Jones Industrial Average, the Wilshire 5000, and the Russell 2000.

Withdrawals from the DCP

When you leave employment with the State

When you leave employment with the State, you may choose a lump-sum distribution, a partial distribution, a rollover, installment payments, or a combination of these methods. Withdrawals can begin 30 days from leaving employment.

If you become employed by another state or local government, you may be able to transfer your DCP account balance to another 457 plan. In addition, you can roll over your proceeds to a nongovernmental entity’s retirement program, individual retirement account (IRA), or eligible employer plan that accepts rollovers.

Upon your death, your account balance is paid to your beneficiary.

In-service withdrawals

While employed by the State, you may withdraw money only in the event of an unforeseeable emergency. Unforeseeable emergency withdrawals are permitted under special circumstances and must be approved by the DCP. You must first take a loan before you are eligible to receive an unforeseeable emergency distribution, and all distributions due to unforeseeable emergencies are subject to taxation. You may take unforeseeable emergency withdrawals from your before-tax and Roth contributions. Withdrawals will be made from all of your before-tax contributions first, followed by any Roth contributions.

Withdrawal fee

• If you are receiving an installment payment (an automatic distribution that is made on the first business day of the month), there is no charge.
• You will be charged a $20 fee from your account for each withdrawal processed.
• The fee will be charged at the time of distribution on all withdrawals and will follow the same investment/source as the distribution.

Loans

The DCP allows you to use your Plan account money as a loan before you retire without being penalized today. When you borrow from your retirement account, you borrow from your future. Before you apply for a loan, consider the consequences of taking a loan and the effect it can have on your retirement savings account. Log in to rps.troweprice.com, and visit the Loan Center for more information.

Loans are available to actively working, retired, and/or separated from service employees, but they may not be taken from certain sources in your account. Loans will not be permitted from your Roth contributions. You may, however, take loans from any before-tax contributions, and Roth balances will be used in the calculation to determine how much is eligible for a loan. If you have a question about an available source in your account, please speak to a T. Rowe Price representative at 1-888-457-5770.

There is a loan initiation fee of $75. The minimum loan amount you can borrow is $1,000. The maximum you may borrow is the lesser of 50% of your vested account balance or $50,000 minus your highest outstanding loan balance (a total of all your Plan loans, including 403(b) plans) from the preceding 12 months. You may not have more than one loan at any time from any state-run retirement plan (including 403(b) plans). Your loan plus interest must be paid within five years. Loan repayments will be made via ACH from your bank account, and all loan payments will be debited from your account on the first day of each month.

Annual loan maintenance fee

• All accounts with active loans will be charged an annual loan maintenance fee of $25.
• The fee will be extracted annually in October and will only be extracted from accounts with active and deemed distributed loans that have more than one payment remaining.
• The fee will be extracted using the same investment/source as the loan withdrawal.

Tax information

All contributions and investment earnings in the DCP are sheltered from current federal income tax. When you take money out of the DCP (a distribution), it becomes taxable as retirement income and subject to federal tax. Deferred compensation payments are not subject to Illinois income tax (out-of-state residents’ payments may, however, be taxable under the income tax laws of those states). For federal tax purposes, distributions may be subject to a mandatory 20% withholding unless you directly roll them over to an eligible employer plan or a Traditional IRA. You may directly roll over a distribution from the DCP into a Roth IRA. The amount rolled in to the Roth IRA is considered taxable income to you in the year of the rollover. Consult your tax advisor for details. A direct rollover is a distribution that is sent directly to the new trustee/custodian of your IRA or retirement Plan.

Any withdrawal from your Roth contributions and related earnings is tax-free if the withdrawal is taken upon you reaching the age of 59½, becoming totally disabled, or upon death and at least five years have passed since the year of your first Roth contribution. If the distribution from your Roth account is not qualified, the earnings on your Roth contributions will be taxable. These rules only apply to Roth distributions from employer-sponsored retirement plans, such as the DCP. Additional Plan distribution rules apply.

Before taking money out of your account, please read the Rollover Options Notice that accompanies the distribution forms.
