Investment Information

Investment Objective & Strategy

Vanguard Target Retirement 2030 Trust uses an asset allocation strategy designed for investors planning to retire between 2028 and 2032. The trust seeks to provide growth of capital and current income consistent with its current target allocation by investing in a gradually more conservative mix of the following Vanguard funds: Total Stock Market Index Fund, Total Bond Market II Index Fund, Total International Bond Index Fund, and Total International Stock Index Fund.

Category Description: Target-Date 2030

Target-date portfolios provide diversified exposure to stocks, bonds, and cash for those investors who have a specific date in mind (in this case, the years 2026-2030) for retirement. These portfolios aim to provide investors with an optimal level of return and risk, based solely on the target date. Management adjusts the allocation among asset classes to more-conservative mixes as the target date approaches, following a preset glide path. A target-date portfolio is part of a series of funds offering multiple retirement dates to investors.

Volatility And Risk

Best 3 Month Return

14.58%

(Apr '20 - Jun '20)

Worst 3 Month Return

-14.70%

(Jan '20 - Mar '20)

Allocation of Assets

Target-date investment options typically invest in other investments and are designed for investors who plan to retire near the target date year. A Target-date investment's objective/strategy typically becomes more conservative over time primarily by reducing its allocation to equity investments and increasing its allocations in fixed-income investments. An investor's principal value in a target-date investment option is not guaranteed at any time, including at the investment's target date.

Performance as of 06-30-20

The performance data quoted reflects past performance and is calculated according to Morningstar's methodology. For new share classes of an investment, the performance reflected for periods prior to the inception date of such class may have been calculated using the historical returns of the original share class, and in such cases is displayed in italics. The historical returns of the original share class are adjusted to reflect differences in fees when the newer share class has higher fees than the oldest share class but are not adjusted when the newer class has lower fees. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower than the performance data quoted. For the most recent month end performance information, please call 1-800-922-9945, or visit rs.troweprice.com.
