Narratives**Disaster Damage:**

The statewide average precipitation in 2008 was 50.7 inches, 11.4 inches above normal and the second wettest year since 1895. Based on preliminary data, the statewide average precipitation for September 2008 was 7.98 inches, making this the third wettest September on record (going back to 1895) for Illinois. Chicago (at O'Hare airport) reported 6.64 inches on September 13, 2008 setting a new record for the most rain in one calendar day in Chicago's history.

>Major flooding in three regions of the state kept the State Emergency Operations Center (SEOC) activated for more than three weeks in June and early July. A large contingent of state resources, including more than 1,400 Illinois National Guard troops, was activated to help communities along the Mississippi River and other rivers in northern and southeastern Illinois battle floodwaters. In total, 26 levees overtopped or breached along the Mississippi River between Rock Island, Illinois and St. Louis, Missouri. Six of the 26 overtopped or breached levee systems are located in Illinois. As a result of the June 2008 flooding, 25 Illinois counties were declared federal disaster areas per FEMA-1771-DR. Twenty-one of these 25 counties are located along the Mississippi, Embarras, and Wabash Rivers. The state's requests for federal disaster assistance for people and businesses in 18 counties and for local governments in 22 counties were approved by FEMA, bringing welcomed relief to many persons in these flood-battered areas. HUD previously allocated \$17,341,434 to assist these counties in their efforts to recover from the devastation caused by the severe flooding.

>Flooding in September again ravaged homes, businesses and communities. Heavy rains, including precipitation from Hurricane Ike, caused extensive flooding in the northern and central regions of the state in September. The severe flooding caused tremendous damage, which, in turn, left most communities without electricity for days, and many for weeks. The state was successful in getting federal assistance for people and businesses in nine counties, as well as federal reimbursement for some flood-related expenses incurred by local governments in 13 counties. A total of 41 counties were included in FEMA 1800-DR, FEMA 1771-DR and FEMA 1747-DR.

>Page 3 CDBG-Disaster Recovery 1800 (Ike) Plan

>ECONOMIC IMPACT

>Small Business Economic Impact

>According to preliminary estimates from the US Small Business Administration (SBA), Illinois' small businesses experienced approximately \$43 million in economic losses from flooding and other disasters in 2008. To date, 1224 Illinois small businesses in areas affected by 2008 flood and storm disaster have been approved for SBA loans. Approximately 1224 businesses experienced at least some business interruption. The state must have resources to provide low-cost financing, grants and technical assistance to businesses in order to jumpstart its economic recovery. Funding for small businesses in impacted Illinois communities needing financial support will be prioritized under the economic development program, as part of this disaster plan.

Recovery Needs:**Large Business and Other Economic Impact**

>The 2008 disasters forced many families out of communities that were impacted by severe flood damage. Employers need their workforce back in their communities. Accelerated provision of temporary affordable housing and the development of permanent affordable housing are critical for the state's employers to get back into commerce and expedite recovery. Funding is needed to support impacted Illinois communities with large businesses needing financial support to remain or locate in these areas of the state. Resources will also be prioritized for support to these communities under the economic development stimulus program, as part of this disaster plan.

>Page 4 CDBG-Disaster Recovery 1800 (Ike) Plan

>HOUSING IMPACT

>Over 5,500 homes were impacted by the storms and flooding. According to data provided by FEMA and SBA, it is estimated that there remains approximately \$172,069,178 in unmet housing needs in the affected counties for the 2008 floods. To date, \$48,115,937 has been approved for disaster housing assistance to help with temporary housing and home repairs for FEMA 1800-DR alone. The Department will

consider the damage rating level among other criteria in approving funding to assist residents in affected counties. Damage level is rated by FEMA from "affected"(insignificant), "minor" (low), "major" (significant) and "destroyed" (high).

>The State will prioritize resources to assist homeowners repair and rebuild their homes. Resources will also be provided to build affordable rental housing for the workforce as well as those that were displaced due to flooding.

>Page 5 CDBG-Disaster Recovery 1800 (Ike) Plan

- >PUBLIC INFRASTRUCTURE IMPACT
- >The state estimates more than \$94.6 million in public infrastructure damage requiring short term recovery assistance in counties declared under federal DR 1800 and DR 1771 in 2008. To address this damage, the state has or will receive approximately \$75 million in emergency response and immediate recovery activities through funds made available under FEMA. The difference remaining after FEMA funding is approximately \$31.6 million and represents the current unmet, short term financial need identified in affected counties to date. In addition to addressing short term need, the supplemental appropriation also will support communities in long term disaster mitigation strategies, to avoid the level of damage and severe impact resulting to communities. The tables below lists the affected counties and illustrate the estimated financial impact of the damage to public infrastructure/ facilities in counties declared under FEMA 1800-DR. and 1771 DR.
- >The extent of the impact to affected areas in Illinois in 2008 made the state one of several eligible for this disaster recovery assistance to address both short and long term recovery, restoration and mitigation needs in these counties.
- >Page 7 CDBG-Disaster Recovery 1800 (Ike) Plan

 >Page 10 CDBG-Disaster Recovery 1800 (Ike) Plan
 >ILLINOIS' GOALS, OBJECTIVES AND PLAN FOR RECOVERY
 >SHORT AND LONG TERM RECOVERY PLANNING AND SUPPORT
 >From the listening sessions referenced earlier in this plan, held with local officials, stakeholders, emergency managers, non-profits, and community members, many of the following recommendations were made. Additional recommendations are based on this Department's and sister agencies' collective experience in responding to these disasters, including the Illinois Emergency Management Agency (IEMA), the Illinois Environmental Protection Agency (IEPA) and the Illinois Department of Natural Resources (IDNR). Finally, recommendations to assist with housing-related support for which resources will be made available under this program funding came from the Illinois Housing Development Authority (IHDA).
 >Immediate (Short-Term) Recommendations
 >Provide outreach and support to individuals and businesses that were affected by the floods and are seeking assistance in making their way through the challenges of rebuilding their lives.
 >Economic Development Recommendations
 >1. Small Business Stimulus. Provide incentives immediately for Illinois's struggling small businesses, microenterprises, and non-profits to assist with restoration and rebuilding of their businesses.
 >2. Large Business Stimulus. Provide incentives for large business to remain or locate in Illinois communities impacted by disaster in 2008. Provide resources to communities as part of a large business stimulus strategy to assist large employers in remaining or locating into Illinois

communities that were impacted by flood, storm or other disaster in 2008. Support can be provided to upgrade infrastructure connected with a local business, working capital to assist with construction and renovation costs, or machinery and other equipment costs.

>3. Commercial Buyouts. Provide incentives to businesses located in 100 year flood plains to relocate in to other areas of the state or community.

>Housing Recommendations

>1. Take steps to ensure immediate needs are met for housing for all who may need to be relocated, temporarily or permanently.

>2. Affordable Rental Housing - (USDA-Rural Development (RD) Section 515 &ndash Acquisition/Rehabilitation Projects) Target CDBG-DR funding to preserve and rehabilitate the aging rural rental housing stock currently in designated counties, financed in prior decades using USDA-RD Section 515 loans. In many cases investment in these developments will provide the needed physical improvements to preserve the units for continued occupancy, as well as assure the continuation of the accompanying federal Section 8 and Rural Rental Assistance tied to the properties. The Rural Development's state office has identified ten (10) such properties nedg loan investment and rhabitaion whicpotentiallcoud beveragewitCDBGunds. Mordetied informaionis fothci

Recovery Needs:

to the Illinois Housing Development Authority (IHDA) regarding the total # of units and estimated aggregate funding request here.

>3. Permanent Supportive Housing &ndash Target CDBG-DR funding to build new units (new construction or redevelopment) of permanent supportive housing in designated counties. IHDA has funded the CSH-Supportive Housing Institute to build local capacity and a pipeline of feasible developments around the state of non-profit homeless service and special needs housing agencies to develop permanent

>Page 11 CDBG-Disaster Recovery 1800 (Ike) Plan

>supportive housing. As special needs populations are often more significantly impacted by such natural disasters, it is proposed to fast-track those feasible projects in the &ldquoSHI Pipeline&rdquo from the CSH-supportive Housing Institute, from the Supportive Housing Providers Association (SHPA) and other development organizations around the state targeted for special needs populations.

>4. Public Housing Rehabilitation &ndash The state should also consider funding specific public housing authorities (PHAs) for public housing repair/rehabilitation projects in these impacted counties. Such funding would be met very positively, and should be prioritized to smaller counties or local PHAs with capital improvement needs which received less than \$1 million in ARRA Capital Fund Grant (CFG) Program funding and/or have specific buildings with health/safety or accessibility needs, especially those under Section 504 Voluntary Compliance Agreements (VCAs) which would create accessible housing units. A targeted development pipeline can be prepared through outreach to smaller housing authorities in disaster counties.

>5. First & Second Mortgage Financing for Rental, New Construction and Rehabilitation &ndash This would be an RFP for a variety of affordable rental housing projects needing financing to assist in meeting local housing needs. IHDA&rsquo LIHTC Qualified Allocation Plan, Multi-Family Common Application, and similar documents should be used to guarantee that unified criteria are used to review and underwrite such proposed projects in an RFP process. Specific priority types would be:

>- LIHTC projects, with or without disaster credit designation but serving the designated area, which have a first/second mortgage financing need or gap and/or an equity shortfall after the Equity Replacement Program is exhausted.

>- Preservation of existing affordable assisted housing, especially those properties providing rental subsidies to tenants.

>- Projects addressing long-term economic recovery issues, such as linking housing with transportation and/or employment jobs.

>- Adaptive re-use of non-residential buildings

>- Consideration of top-ranked applications not funded under other/relevant State program funding competitions which may (significantly) address the recovery needs of their target areas.

>6. Housing Buyouts. Provide incentives to homeowner located in 100 year flood plains to relocate in to other areas of the state or community.

>7. Community Assistance (Private-owner-occupied housing) Community stabilization/housing rehabilitation and repair. Provide funding support to communities, not-for-profits operating on behalf of communities, with private housing repair, rehabilitation and constracto stabilize communitiesimpaced bdisasternd econoic coditios antoassist idividual homeowners seeking asisance.

>. IndividuaAssitnceP

Recovery Needs:

vate owner-occupied housing) Private housing rehabilitation and repair and construction. Provide funding support to individuals for housing repair, rehabilitation and construction needs to encourage stability in disaster-impacted communities.

>Public Infrastructure Recommendations

>1. Community infrastructure protection. A great deal of public infrastructure resides in floodplains. Roads, bridges, well heads, sewer treatment facilities, levees, pumps, and municipal water filtration plants and facilities located in the floodplain should be adequately monitored, protected and/or elevated to prevent future damage or disruption of services.

>2. Soil and water conservation efforts. Provide greater investment in soil and water conservation efforts to create additional natural and artificial storage. Participants frequently commented on the importance of managing tributaries as a key preventative strategy. The creation of strategically placed reservoirs and stream bank stabilization were also noted as key investments in prevention. These investments in conservation practices were noted by both urban and rural participants.

>Page 12 CDBG-Disaster Recovery 1800 (Ike) Plan

>3. Levee upgrades. Resources should be made available to increase levee reliability and safety. Concerns expressed regarding levee reliability and safety echo concerns at the state and national levels. Levees throughout the state were built in the 1950s and are not acceptable by today&rsquo standards. Levee concerns and the importance of levees in protecting people, infrastructure, and business were discussed in each of the small group discussions. Many issues are linked to levee reliability and safety.

>4. Increase Investment in Enhanced Communication Systems: Adequate communication systems are necessary to ensure the highest levels of safety and protection, efficiency of operations, coordination of efforts, distribution of aid, and recovery. This goal requires significant investment in development of statewide broadband infrastructure.

>5. Develop a comprehensive and systematic educational outreach program. Emergency management directors, floodplain managers, drainage districts, local officials, and VOADS (voluntary organizations active in disaster situations) would benefit from access to training opportunities. While the primary goal for the training would be to improve floodplain management practices and disaster recovery, training programs also present a great opportunity for enhanced communication among local, state and federal agencies. Investment in education is a critical investment in lessening the economic disruption of disasters. A key message that has significant economic implications for communities and individuals revolved around developing a greater understanding of the National Flood Insurance Program (NFIP).

>Planning Recommendations

>1. Focus on regional land use planning. Beginning by mapping out current business uses, critical infrastructure, natural and artificial storage, and public and private levees located within floodplains and watersheds. Utilize the information to develop plans which will give full consideration to all possible alternatives for vulnerability reduction. Planning assistance may be needed to increase access to geographic information and planning resources. The planning model created in southwest Illinois, presents a comprehensive view of floodplain management. They took a regional approach to address the

Recovery Needs:

is problem. The Southwestern Illinois Flood Prevention Initiative report can be found at the following website:
www.swillinoislevees.com/html/technicalinfo.htm.

>Long-Term Recovery Recommendations

>1. Hazard Mitigation Plans. Every county in Illinois should prepare and maintain a Hazard Mitigation Plan to ensure efficient and effective short-term response to, and long term recovery from, flooding and other natural disasters. Hazard Mitigation Plans should be prepared in consultation with all governmental and nongovernmental entities having jurisdiction over factors impacting the Plan, as well as the general public. Plans should utilize best practices outlined by the Federal Emergency Management Agency, which mandates community involvement, and all plans should be approved by the Federal Emergency Management Agency.

>2. Office of Long Term Recovery. The State should create an Office of Long Term Recovery (OLTR) to serve as the lead entity in coordinating and implementing post disaster long term recovery efforts at the local and regional levels, with focuses on community and economic development and technical assistance with hazard mitigation planning. This authority would be supplementary and complimentary to existing local, regional, and state agency powers. The OLTR should convene a permanent, multi-agency advisory committee to develop and maintain implementation plans for flood and other disaster recovery efforts with an emphasis on coordination between various government agencies, long-term nonstructural mitigation, and wrap-around service provision designed to spur long-term community and economic recovery after a disaster. This would include Federal Block Grants and Public Assistance Grants, at a minimum, as well as other state funded initiatives, to ensure the proposed activity is consistent with the Governor's Executive Order 2006-05, National

Activity Description:

Project will involve the asbestos removal, other cleanup and the demolition of the Dixie Square shopping mall facility, located in Harvey, Illinois. The facility and project site have been condemned by the city of Harvey, with court order to demolish the facility. The clean-up and demolition of the asbestos contaminated and structurally unsound facility, located on a 39 acre parcel in the city of Harvey, will help to protect the health and safety of local residents and lay the groundwork for future ED in the economically depressed community

Location Description:

Dixie Square Mall is located on a 39 acre parcel in the City of Harvey along Dixie Highway between W 151st Street and W 154th Street.

Activity Progress Narrative:

no funds were draw during this quarter. the project has been bid and local administrators are being trained.
