Safety Plans

Safety plans are voluntary, temporary and short term measures designed to control serious and immediate threats to children's safety. They must be adequate to ensure the child’s safety and be as minimally disruptive to the child and family as is reasonably possible. Additionally, families can request that a safety plan be modified or terminated at any time. The safety plan will indicate which safety threat or threats have led to the need for a safety plan according to the completion of the CERAP. The safety plan will require a written description of what will be done or what actions will be taken to protect children, who will be responsible for implementing the components of the safety plan and how/who will monitor it. It is important that safety plans be developed with the family to control specific threats and that the family understands the mechanism for ending each safety plan. Under no circumstance is a safety plan to serve as the solution to a long-term problem. A family may request at any time to modify or terminate the safety plan.

When a safety plan is implemented, it should be documented on a CFS 1441-A, Safety Plan when it is likely that a child could be moderately or severely harmed now or in the very near future. The safety plan must be developed whenever there are protective efforts that would reasonably ensure child safety and permit the child to remain in their caregiver’s custody. After the safety plan has been developed, it must be immediately implemented to ensure that all of the designated tasks are completed effectively. The safety plan should contain timeframes for implementation and continued monitoring.

IV. OVERVIEW
