### OG-15A INSPECTOR'S TEMPORARY ABANDONMENT REPORT

Reference #: 0      **LOCATION**    Section: 0    Township: 0    Range: 0  
 Permittee #: UNKNOWN      County: 0      LAT: 0.000000      LONG: 0.000000

Permittee Name:

Well Name: 0

Well Type:     Oil Production     Gas Production     Injection

Evaluation

- Does the well have a proper bond?     Yes     No
- Is the well in the plugging fund?     Yes     No
- Is the wellhead above ground?     Yes     No
- Is the well capped with a valve and configured to monitor casing or annular pressure?     Yes     No
- Is the well equipped with an intact leak free wellhead?     Yes     No
- Has the lease been inactive over the last 24 consecutive months?     Yes     No

Method used to meet TA requirements:      **Set CIBP & Pressure Test**

Ground Elevation of Well:      400    feet  
 Underground Safe Drinking Water Depth (from USDW map):    350    feet  
 Depth to the Base of Fresh Water:      50    feet  
  
 Top of Cement:      200    feet  
  
 Depth to top of uppermost perforated or open hole interval:    1800    feet  
 Cast Iron Bridge Plug Setting Depth: ( must be between 1600 feet and 1800 feet):    1750    feet  
  
 Date of Pressure Test      6/18/2020  
 Test Start Time:    2:30  
 Test End Time:    3:00  
 Length of Test (min.) (minimum length 30 min):    0:30    Minutes  
 Initial Casing Pressure (PSI) (minimum testing pressure 300 PSI):    400    PSI  
 Final Casing Pressure (PSI):    395    PSI

Temporary Abandonment status is granted for 5 years, expires 06/17/2025.
