STATEWIDE PERMIT NO. 8

AUTHORIZING THE CONSTRUCTION OF UNDERGROUND PIPELINE AND UTILITY CROSSINGS

PURPOSE

The purpose of this Statewide Permit is to authorize the construction of underground pipeline and utility crossings which have insignificant impact on those factors under the jurisdiction of the Department of Natural Resources, Office of Water Resources (IDNR/OWR). It is no longer necessary to submit applications to, or obtain individual permits from, IDNR/OWR for activities meeting the terms and conditions of this permit. If a project would not meet all of the terms and conditions of this permit, a formal permit application must be submitted.

APPLICABILITY

This permit applies to all directionally bored pipeline and utility crossings placed beneath the beds of all Illinois rivers, lakes and streams under the Department's jurisdiction. This permit also applies to other pipeline and utility crossings placed beneath the beds of all Illinois rivers, lakes and streams under the Department's jurisdiction except those in Lake, McHenry, Cook, DuPage, Kane and Will Counties for which regulatory floodways have been designated pursuant to 17 Illinois Administrative Code 3708, the public waters of the state, and the following:

1. The meandered lakes
2. Loon Lake (Lake County)
3. Cedar Lake (Lake County)
4. Ogden Slip
5. Mackinaw River
6. Kickapoo Creek in Peoria County
7. Big Creek in Hardin County
8. Lusk Creek in Pope County
9. Middle Fork of the Vermilion River in Vermilion County
10. Kishwaukee River in McHenry County

11. Clear Creek in Union and Alexander Counties

12. Embarras River in Jasper and Cumberland Counties

COORDINATION WITH OTHER AGENCIES

This permit does not supersede nor relieve any permittee's responsibility to obtain other federal, state or local permits. The local (county or municipal) regulatory official and the U. S. Army Corps of Engineers' regulatory functions office should be contacted to obtain any required permits. Also, for utility crossings carrying materials which could cause water pollution, potentially impacted owners of public water supplies should be notified.

SPECIAL CONDITIONS

In order to be authorized by this permit, an underground pipeline or utility crossing must meet the following special conditions.

1. In all cases, the crossing shall be placed beneath the bed of the river, lake or stream and, unless the crossing is encased in concrete or entrenched in bedrock, a minimum of three (3) feet of cover shall be provided. The river, lake or streambed shall be returned to its original condition.

2. Disturbance of streamside vegetation shall be kept to a minimum during construction to prevent erosion and sedimentation. All disturbed floodway areas, including the stream banks, shall be restored to their original contours and seeded or otherwise stabilized upon completion of construction.

3. A utility crossing carrying material which may cause water pollution as defined by the Environmental Protection Act, 415ILCS 5 (1996 State Bar Edition), shall be provided with shut-off valves on each side of the body of water to be crossed.

4. If blasting is to be utilized in the construction of the crossing, the Permittee shall notify the Illinois Department of Natural Resources, Office of Resource Conservation at least ten (10) days prior to the blasting date to allow monitoring of any related fish kills.
GENERAL CONDITIONS OF THE STATEWIDE PERMIT

1. This permit is granted in accordance with the Rivers, Lakes and Streams Act, 615 ILCS 5 (1996 State Bar Edition).

2. This permit does not convey title to any permittee or recognize title of any permittee to any submerged or other lands, and furthermore, does not convey, lease or provide any right or rights of occupany or use of the public or private property on which the project or any part thereof will be located, or otherwise grant to any permittee any right or interest in or to the property, whether the property is owned or possessed by the State of Illinois or by any private or public party or parties.

3. This permit does not release any permittee from liability for damage to persons or property resulting from any activity covered by this permit, and does not authorize any injury to private property or invasion of private rights.

4. This permit does not relieve any permittee of the responsibility to obtain other federal, state or local authorizations required for the construction of the permitted activity; and if any permittee is required by law to obtain approval from any federal or other state agency to do the work, authorization granted by this permit is not effective until the federal and state approvals are obtained.

5. The permittee shall, at the permittee's own expense, remove all temporary piling, cofferdams, false work, and material incidental to the construction of the project, from the floodway in which the work is done. If the permittee fails to remove such structures or materials, the Department may have removal made at the expense of the permittee. If the activity is on a public body of water and if future need for public navigation or public interests, by the state or federal government, necessitates changes in any part of the structure or structures, such changes shall be made by and at the expense of the permittee or permittee's successors as required by the Department of Natural Resources or other properly constituted agency, within sixty (60) days from receipt of written notice of the necessity from the Department or other agency, unless a longer period of time is specifically authorized.

6. In issuing this permit, the Department of Natural Resources does not approve the adequacy of the design or structural strength of any structure or improvement authorized by this permit.
7. This Statewide Permit shall remain in effect until such time as it is modified, suspended, or revoked by the Department of Natural Resources.

This Statewide Permit was issued on August 1, 1986 and last modified or corrected June 15, 1998.

APPROVED:

Brent Manning, Director
Department of Natural Resources

EXAMINED AND RECOMMENDED:

Martin J. Stralow, Manager
Division of Water Resource Management

APPROVAL RECOMMENDED:

Donald R. Vonnahme, Director
Office of Water Resources
