This report is a compilation of the data collected by volunteers during a county-wide survey begun in the fall of 1993. The purpose of the survey was to find and describe all the prairies in JoDaviess County. A special thanks goes to:

- Grace Storch
- Shirley Casper
- Jim Quick
- Sophie Fiedler
- Bob & Judith Wehrle
- John & Barbara Rutherford
- June Patinkin
- Rickie Vickery
- Barbara Siekowski
- Dick & Joan Harmet
- Rosemary Burns
- Laura Dufford

Traveling the dusty byways of JoDaviess County in search of natural treasure is fun, but it is also hard work. Together, they logged many hundreds of miles.

The initial ground survey, guided by soil and topographic information, was conducted in the fall of 1993. Information was collected on a total of 106 sites. Each site was assigned an identifier composed of a township number (a page number from the county plat book) and a sequence number.

A final ground survey, conducted during the 1994 growing season, found 51 of these sites to be in fair to excellent condition, that is, to be “prairies”. It is these sites which are described, in ascending identifier order, in this report.

Jim Rachuy, MS, MCS
September 1, 1994

**Communities** dry sand prairie

**Surroundings** black oak woodland, river forest

**Species** Sorghastrum nutans, Andropogon gerardii, Lespedeza capitata

- Liatris aspera, Andropogon scoparius, Hieracium longipilum, Lithospermum canescens, +

**Special Features** less disturbed than much of the rest of the Depot

**History** never plowed or grazed

**Condition** little disturbed, good diversity

needs a burn, but that is problematic in an arsenal

**Comments** as good a site I have visited in the depot, but there are many others

collected seed in '93 for Blackjack Prairie

Communities: dry sand prairie, wet sand prairie, disturbed dry-wet sand.

Surroundings: pasture, artificial.

Species: Lysimachia quadriflora, Asclepias incarnata, Eupatorium perfoliatum, Carex comosa, Ratibida pinnata, Typha latifolia, Astragalus canadensis, Onosmodium molle, Anemone virginiana.

Special Features: several small springs, with Rana pipiens.

History: variously abused, but still special because of the unique hydrology.

Condition: weedy, but interesting.

Comments: these springs deserve some protection by the Township.

### Communities
- degraded mesic prairie

### Surroundings
- old field, degraded oak woodland

### Species
- Andropogon gerardii
- Sorghastrum nutans
- Rudbeckia hirta
- Circium discolor
- Euphorbia corollata

### Special Features

### History
- unknown

### Condition
- low diversity; brush and aliens dominate near road

### Comments
- this site has potential, but would take some work to rehabilitate

### Soils
- Seaton (274F)

### Aspect
- SW

### Grade
- 2 - 6%

### Watershed
- Apple River

### Division
- lower

### Moisture Level
- dry to mesic

Location S side of drive, E of buildings and sealed landfill

Soils Muscatine (41B)

Aspect N Grade 0 - 1%
Watershed Yellow Creek Division S fork
Catena Position near bottom Moisture Level mesic to wet

Communities degraded mesic to wet prairie

Surroundings old field, stream thicket

Species Panicum lanuginosum, Solidago rigida, Penstemon digitalis, Elymus canadensis, Eupatorium altissimum, Tradescantia ohiensis, Gentiana andrewsii, +

Special Features whole area covered by railroad cinders

History railroad yard abandoned in the ‘30s, managed as part of Stockton Village dump

Condition fair diversity, weedy

Comments unique soil and hydrology; needs help

Name: Birkbeck Savanna
Identifier: 24-5
State: Illinois
County: JoDaviess
Township: Council Hill
Section: 22
Tract: NE¼NW¼
Quadrangle: T29N-R1E
Size: 10 acre
Location: E of Birkbeck Rd, N of Furlong Rd

Soils: Lacrescent (785F/G)
Aspect: W
Grade: 3 - 6 %
Watershed: Galena River
Division: middle
Catena Position: top to middle
Moisture Level: dry to mesic

Communities: degraded mesic savanna

Surroundings: prairie thicket, old field

Species: Andropogon gerardii, Quercus macrocarpa, Bouteloua curtipendula, Dalea purpurea, Andropogon scoparius, +

Special Features

History: long grazed

Condition: degraded, but with all the important components present in low numbers

Comments: burn it; a great place for a savanna restoration project

Name: Roger Redington
Position: owner
Address: 8881 N Birkbeck Rd
Town: Galena
State: IL
Zipcode: 61036
Telephone: (815) 777 - 0505 or (____) _______
