**Carpenter Park Nature Preserve, Sangamon County, Illinois**  
**Insect Survey 2001 - 2002**

**Introduction**

Approximately 2000 species of Lepidoptera (butterflies and moths) occur in Illinois. These species are important to the ecosystem because of their association with the flora of this area. The larval stages are primary plant consumers, and the adult forms are pollinators. In addition, they are a common food resource for many species of birds, mammals and other arthropods. Many species, especially those restricted by host plant requirements, serve as indirect indicators of habitat quality (LaGesse et al. 1996, 2000). With the current interest in land management and maintaining plant and animal diversity, During the growing season of 2001 through 2002, 10 diurnal and 8 nocturnal surveys for Lepidoptera were performed over a one-year period by the senior author.

Carpenter Park is a 322-acre tract with high quality upland and floodplain forest communities, intermittent streams, small seeps, and sandstone outcrops. These features represent over half of the remaining forest that originally occurred along the major streams of the Springfield Section of the Grand Prairie Natural Division (IDNR 1995). Tree coring was done by the senior author to document the old-growth status of Carpenter Park. Many White Oaks were between 200 and 430 years old; many Black Oaks were between 137 to 229 years old; Bur Oaks were between 145 to 299 years old (LaGesse et. al., 2001). With the documentation of this old-growth site an insect survey was conducted by the senior author during the summer of 2001 and 2002.

**Materials and Methods**

To date, only management of the Black Oak -White Oak -Shagbark Hickory Woodlands has occurred at Carpenter Park. These management activities would include prescribed fire, mechanical timber thinning and herbiciding of mesic trees. Most of the sampling that occurred for this study was in those upland woodlands areas, but a few sample sites were placed in the floodplain forest. Insects were sampled by various methods. Sampling included capture and release of species easily identified and preservation of voucher representatives to confirm identification of species. All voucher specimens will be deposited with the author's collection or the Illinois State Museum (ISM), Springfield, Illinois.

The following methods were used:

1. Random walks with aerial nets were conducted that passed through the natural communities present at the site. These occurred between 0700h to 1400h.
2. Three portable 15-watt ultra-violet bucket trap lights were suspended from trees in communities sampled. These were powered by car batteries and were operated

from 1400h to 0700h on the next day. Specimens were selectively collected from the traps and preserved to be identified later.

3. A 15 watt ultra-violet light powered by a 12-volt battery was used to illuminate a white sheet suspended on a parked truck or rope suspended between two trees. The sheet was illuminated from 1400h to 0200h. Selected specimens were collected and preserved for identification.
4. A 125-watt mercury vapor light, powered by a portable gas generator, was used to illuminate upon white sheets suspended between trees. This was operated from 1400h to 0250h. Selected specimens were collected and preserved for identification.

### Results

E.D. Cashatt, Illinois State Museum, Zoology Department, identified all Odonata species and he also provided a print out of the Illinois Lepidoptera Database for Sangamon County, Illinois. This along with butterfly data from past Xerces Butterfly counts became the first layer of historic accounts from the preserve. James Wiker confirmed or identified all Lepidoptera species in this report.

Using the Illinois Lepidoptera Database and the results of this survey, 47 Butterfly species representing 9 families were found historically at Carpenter Park. Of these, 35 were confirmed and 7 new species were observed. One hundred forty-eight species of Moths representing 15 Families were documented and 142 new species were confirmed. In the Order of Odonata no historic records occurred but 9 species representing 5 families were documented. In the Order of Coleoptera 8 species were confirmed representing 6 families.

The senior author conducted 8 diurnal and 7 nocturnal surveys during this 13-month study. Currently there are other orders being identified by other experts in the field. As the senior author learns more about some of those vouchers, this report and Illinois Department of Natural Resources will be updated.

No rare or endangered species of insects were encountered during this study.

## Carpenter Park Nature Preserve Insect Survey Species List

Scientific Name	Common Name	Date Observed
<i>Order Lepidoptera</i>		
<b>Family Hesperidae Skippers</b>		
<i>Erynnis juvenalis</i> (F.)	Juvenal's Dusky Wing	14 May 2002 *9 July 1995
<i>Atrytone logan</i> (Edw.)	Delaware Skipper	14 May 2002
<i>Thorybes bathyllus</i> (Sm J.E.)	Southern Cloudywing	*22 June 1939
<i>Polites coras</i> (Cram.)	Peck's Skipper	*4 Aug. 1941
<i>Poanes hobomok</i> (Harr.)	Hobomok Skipper	19 May 2002
<i>Polites themistocles</i> (Latreille)	Tawny-Edges Skipper	12 June 2002 14 June 2002
<i>Euphyes ruricola</i> (Harr.)	Dunn Skipper	14 June 2002
<i>Epargyreus clarus</i> (Cram.)	Silver-Spotted Skipper	14 June 2002
<b>Family Papilionidae The Swallowtails</b>		
<i>Eurytides marcellus</i> (Cram.)	Zebra Swallowtail	14 May 2002 *1 Aug. 1978
<i>Papilio glaucus</i> (L.)	Tiger Swallowtail	23 June 2002 *9 July 1995 *1 Aug. 1978 *4 Aug. 1941
<i>Papilio polyxenes</i> Stoll	Black Swallowtail	14 June 2002 *9 July 1995 *4 Aug. 1977 *19 Aug. 1978
<i>Papilio troilus</i> (L.)	Spicebush Swallowtail	14 May 2002 12, 14 June 2002 *9 July 1995 *6 July 1939 *4 Aug 1941

**Family Pieridae Sulfurs, Whites**

<i>Colias eurytheme</i> Bdv.	Alfalfa Butterfly	12, 14 June 2002 *9 July 1995 *18 Sept. 1939 *14 July 1939
<i>Colias philodice</i> Godart	Clouded Sulfur	12, 14 June 2002 *9 July 1995 *14 July 1939
<i>Eurema lisa</i> (Bdv.&LeConte)	Little Sulfur	*9 July 1995 *6 June 1939 *4 Aug. 1941
<i>Artoglia rapae</i> (L.)	European Cabbage White	12, 14 June 2002 14 May 2002 *9 July 1995 *13 April 1941
<i>Phebis sennae</i> (L.)	Cloudless Sulfur	*4 Aug. 1941
<i>Zerene cesonia</i> (Stoll)	Dogface Sulfur	*18 Sept. 1939
<i>Pontia protodice</i> (Bdv.&LeConte)	Checkered White	*4 Aug. 1977 *22 June 1939 *13 April 1941

**Family Lycaenidae Blues, Coppers, and Hairstreaks**

<i>Celastrina neglecta</i> (Edwards)	Summer Azure	12, 14 June 2002
<i>Celastrina ladon</i> (Cram.)	Spring Azure	14 May 2002 *12 June 1941
<i>Charidryas nycteis</i> (Doubleday&Hewitson)	Silvery Checkerspot	14 May 2002 *9 July 1995 *12 June 1941
<i>Everes comyntas</i> (Godart)	Eastern-Tailed Blue	12 June 2002 14 May 2002 *9 July 1995 *9 Aug. 1978 *12 June 1941 *4 Aug. 1941
<i>Lycaena phlaeas americana</i> Harr.	American Copper	14 June 2002 *9 July 1995
<i>Gaeides xanthoides dione</i> (Scudder)	Great Copper	*6 July 1979
<i>Hylolycaena hyllus</i> (Cram.)	Bronze Copper	*12 June 1941
<i>Phycoides tharos</i> (Dru.)	Pearl Crescent	14 May 2002 *9 July 1995 *22 June 1939
<i>Satyrium caryaevorus</i> (McD.)	Hickory Hairstreak	12 June 2002 *12 June 1941
<i>Strymon melinus humuli</i> (Harr.)	Gray Hairstreak	14 May 2002 *13 Sept. 1980

<i>Desmia funeralis</i> (Hbn.)	Grapeleaf Folder Moth	2 Sept. 2001
<i>Pyrausta tyralis</i> (Gn.)	N/A	8 June 2001
<i>Pyrausta bicoloralis</i> (Gn.)	N/A	18 July 2001
<i>Herculia olinalis</i> (Gn.)	N/A	8 June 2001
<i>Tosale oviphagalis</i> (Wlk.)	N/A	30 May 2002
<i>Papita magniferalis</i> (Wlk.)	N/A	30 May 2002 15, 18 July 2001

**Family Epiplemididae Epiplemid Moths**

<i>Calledapteryx dryopterata</i> Grt.	Brown Scoopwing	30 May 2002
---------------------------------------	-----------------	-------------

**Family Tineidae**

<i>Acrolophus</i> sp.	N/A	11 June 2002 18 July 2001
-----------------------	-----	------------------------------

**ORDER ODANATA**

<b>Family Coenagrionidae</b>	<b>Pond Damselflies</b>	
<i>Argia apicalis</i> (Say)	Blue-Footed Dancer	12 June 2002
<b>Family Aeshnidae</b>	<b>Darner Dragonflies</b>	
<i>Anax junius</i>	Green Darner	14 May 2002 12 June 2002
<b>Family Gomphidae</b>	<b>Clubtail Dragonflies</b>	
<i>Gomphus (Gomphurus) externus</i> Hagen in Selys	N/A	12 June 2002
<b>Family Coruliidae</b>	<b>Emerald Dragonflies</b>	
<i>Epicordulia princeps</i> (Hagen)	Prince Baskettail	14 June 2002
<b>Family Libellulidae</b>	<b>Skimmer Dragonflies</b>	
<i>Libellula lydia</i>	Common Whitetail	14 May 2002 12, 14 June 2002
<i>Pantela hymenaea</i> (Say)	Spot-Winged Glider	12 June 2002
<i>Erythemis simplicicollis</i> (Say)	Eastern Pondhawk	12 June 2002
<i>Pachydiplax longipennis</i> (Burmeister)	Blue Dasher	14 June 2002

**ORDER COLEOPTERA****BETLES****Family Cerambycidae****Long-Horn Beetles***Enaphalodes cortiphagus* (Craighead)

Oak-Bark Scarrer

27 June 2001

15 July 2001

*Orthosoma brunneum* (Forst.)

Brown Prionid

15, 18 July 2001

**Family Passalidae****Bess Beetles***Pseudohucamus capreolus* (L.)

Stag Beetle

27 June 2001

15 July 2001

**Family Scarabaeidae****Scarab Beetles***Geotrupes splendidus* (F.)

Earth-Boring Dung Beetle

30 May 2002

*Phanaeus vindex* (MacL.)

Dung Beetle

30 May 2002

8 June 2001

**Family Carabidae****Ground Beetles***Calosoma scrutator* (F.)

Caterpillar Hunter

30 May 2002

**Family Cicindulidae****Tiger Beetles***Cicindela soaguttata* (F.)

N/A

14, 30 May 2002

12, 14 June 2002

**Family Erotylidae****Pleasey Fungus Beetle***Megalodacne heros* (Say)

N/A

27 June 2001
