Acknowledgments

A special note of thanks goes to the many individuals who are responsible for providing information in this report. Site personnel operate check stations and perform other duties associated with collection of daily, weekly, monthly and annual hunting effort and harvest data. District wildlife biologists coordinate the data collection and summarize the final results. Other Illinois Department of Natural Resources (IDNR) administrative and field staff, continue to provide technical information and guidance in various ways. The efforts of IDNR staff results in a high quality long term data base that provides valuable information for wildlife management purposes. Again, thank you.

Introduction

The *Illinois Public Hunting Areas Report* is developed each year to provide information on public hunting/trapping effort and wildlife harvest. This year's report provides both hunting and trapping information on 215 Illinois Department of Natural Resources (IDNR) owned, leased or managed public hunting sites.

Table 2 provides specific information concerning the 2015-16 waterfowl season on 56 public land sites where waterfowl hunting is provided in Illinois.

The Federal Aid in Wildlife Restoration Program (resulting from the Pittman-Robertson Act of 1937 – a cost share program administered by the U.S. Fish & Wildlife Service) has either funded or is currently funding wildlife habitat developments, or has acquired land on 117 of the 183 public hunting and trapping areas. Pittman-Robertson (P-R) funding provides wildlife habitat development, maintenance activity, research projects and land acquisition for wildlife management purposes in Illinois. P-R funds also provide funding for Illinois hunter safety course administration and materials. The purpose of the P-R Act is to strengthen the ability of the States to preserve, protect and enhance wild animal and bird resources. Benefits include providing increased public enjoyment of these resources.

Abstract

The 2015-2016 Hunting season opened on April 1, 2015 and ended March 31, 2016. The Illinois Department of Natural Resources (IDNR) managed 215 public hunting sites during this period. Various methods of data collection were used and information was recorded at 201 public land sites throughout Illinois. There are 14 additional sites that allow public hunting, however, currently have no facilities or resources available for on-site data collection. Statewide 212,473 hunting trips were reported on Illinois public lands, an increase of 5935 trips from the 2014-15 season. Hunting effort increased and hunter harvest decreased compared to the 2014-15 hunting season. Mourning dove and waterfowl (duck) harvests can experience extreme harvest fluctuation annually due to liberal bag limits, habitat conditions and fall migration chronology. The 2015 mourning dove harvest was 24,980 compared to 43,806 in 2015. The 2015-16 duck harvest was 75,531 compared to 78,618 in 2014-2015. Wildlife harvest increases (units in parentheses) were recorded for deer gun (348), deer archery (324), squirrels (1256), cottontail rabbit (418), and coots (252). Harvest decreases are noted for bobwhite quail (130), ring-necked pheasant (2075, both wild and released), geese (757), eastern wild turkey (77), raccoon (1300), and a combination of 12 other species (119, primarily furbearers and crow).

Methods and Procedures

Methods:

The principal methods used to document hunting/trapping effort and collect harvest data are through manned hunter check stations, permits issued from both the IDNR permit office and the individual site, annual registration and sign in/sign out boxes and through on-line registration and reporting. A majority of these methods have existed on a large number of Illinois public land sites since inception of the respective hunting and trapping programs. Hunter survey questionnaires are periodically used by a few waterfowl sites where limited staff and other complications result in limited or no consistent hunting or trapping data collection. Data is submitted by site staff either monthly or annually for district wildlife biologist summary tabulation. The IDNR **ILCHECK** telephone and on-line check-in systems are utilized for white-tailed deer and wild turkey, providing more detailed harvest information from an increased number of public land sites.

Procedures:

Project personnel that collect hunting/trapping effort and harvest data for this report use four forms and/or the online harvest information.

- **Hunter Harvest Survey** – These surveys are completed on a daily basis by hunters during the respective hunting season. It lists such information as the user's name, address, date, hours hunted and species harvested. These forms are then compiled on a monthly basis for submission to the site's district wildlife biologist. Several different styles of waterfowl data collection sheets are used by various sites.
- **Monthly Hunter Harvest Summary** – This form is utilized by site staff to compile monthly hunting effort and harvest data. The sites list their name, region, year and month the data is compiled. Hunter trips are recorded by species for dove, deer, wild turkey and squirrels. Waterfowl hunting sites use a modified version of this form that lists duck and goose species. Hunter trips for individuals pursuing upland game species; rabbit, quail, woodcock, pheasant and other species are usually grouped.
- **2015-2016 Hunting Effort and Harvest Report Summary – For Illinois Public Hunting Sites** – This annual report form is compiled by each respective district wildlife biologist. The biologists tabulate each of the monthly report submissions, from April 1, 2015 through March 31, 2016, received from their public land sites. This form lists summary information that is used to compile the 2015-2016 **Illinois Public Hunting Areas Report**.
- **Free Site Hunting Windshield Cards Online** – The online free hunting windshield card system was initiated in April of 2010 at Region 3 public hunting areas on a trial basis while developing the program for statewide implementation. The IDNR now uses the online free site hunting windshield card and harvest reporting system on many sites statewide. Go to: <https://dnr.state.il.us/lands/landmgt/programs/windshieldcard/index.asp> to view the "Free Site Hunting Permits" system. **Inasmuch as the on-line windshield card system is relatively new, take care when comparing data with years prior to the adoption of this system.**
