

# SUMMARY OF 2018-2019 ILLINOIS DEER SEASONS

Tom Micetich and Paul Shelton  
Forest Wildlife Program, Illinois Department of Natural Resources

## General Information

### Season Dates:

Archery Season: Oct. 1, 2018 - Jan. 20, 2019; closed during firearm deer season in counties open to firearm deer hunting

Youth Season: Oct. 6-8, 2018 (hunting also allowed during 1<sup>st</sup> firearm season, Nov. 16-18, 2018)

Firearm Season: Nov. 16-18, 2018 and Nov. 29 - Dec. 2, 2018

Muzzleloader Season: Dec. 7-9, 2018 (hunting also allowed during 2<sup>nd</sup> firearm season, Nov. 29 - Dec. 2, 2018)

Late-Winter Antlerless Season/CWD Season: Dec. 27-30, 2018 and Jan. 18-20, 2019

**Total Days of Deer Hunting:** 112

**Bag Limit:** One deer per legal permit, with no set limit for total number of deer allowed. No more than 2 antlered deer during the year, except additional antlered deer may be taken during the special CWD season only.

**Significant Changes:** Four counties previously open to Late Winter Season hunting were closed; while two counties previously closed were re-opened to that season.

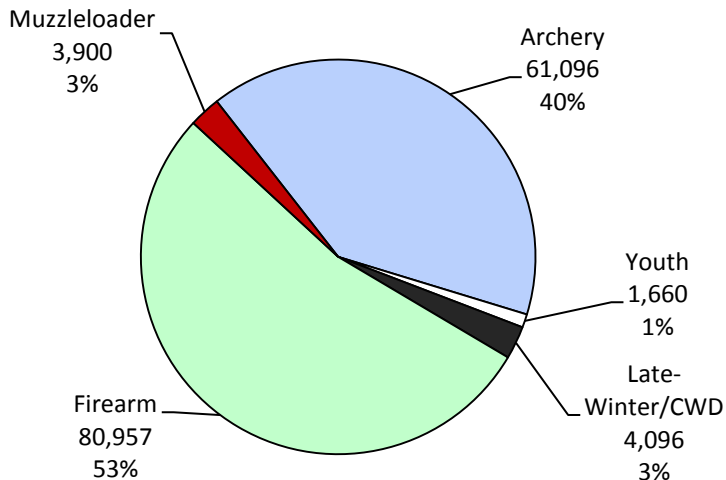

**Harvest Reporting:** Successful deer hunters were required to register their harvest by 10 p.m. on the same calendar day as the deer was taken by using an automated harvest reporting system (telephone or internet). The only exception to automated harvest reporting occurred in select northern Illinois counties during the firearm deer season, where mandatory check stations were staffed by IDNR biologists to collect tissue samples for CWD surveillance.

**Total Harvest (all seasons):** 151,709

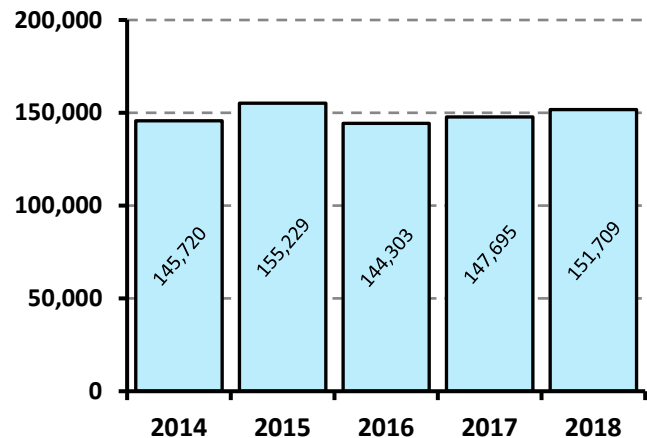

**Record Harvest:** 201,209 (2005)

**Harvest Sex Ratio (all seasons):** 55.2% male: 44.8% female; (46.0% antlered: 54.0% antlerless)

## Permitting

IDNR's Permit Office issued 511,511 deer permits for all seasons, including both lottery-issued permits and over-the-counter permits. This represents a decrease (-7.3%) from the 551,673 permits issued for 2017. Decreases occurred in all seasons except the Late-winter (+5.7%) and CWD antlerless seasons (+19.8%).

<sup>2</sup> Permits for these seasons are issued without respect to residency status (i.e., the same permit is issued to both residents & nonresidents)

## 2018 Archery Deer Season Results

**Length:** 112 days (105 days in counties open to firearm deer hunting)

**Number of Counties Open:** 102

**Special Regulations:** Resident combination permits (one either-sex and one antlerless-only tag) were available over-the-counter (OTC) in unlimited quantities. Nonresident combination permits were limited to a quota of 25,000 and issued via lottery with any remaining permits available OTC. Single resident either-sex permits (limit 1 per hunter) were available by application to the Permit Office prior to September 1. Single antlerless-only permits were available to both resident and nonresident hunters OTC without limit, with a 2-tiered fee structure for non-residents dependent upon whether an either-sex archery permit was held. This was the second year in which crossbows were legal for all hunters for the entire archery season.

**Harvest:** 61,096

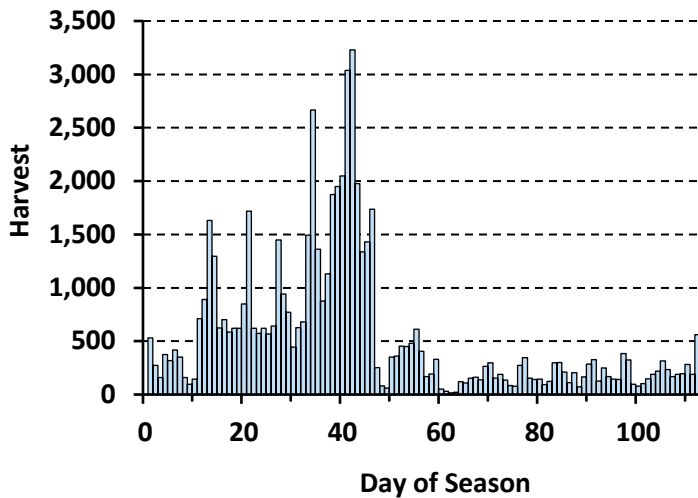

**Season Record:** 66,093 (2005)

**Harvest Sex Ratio:** 51.7% male: 48.3% female (43.8% antlered: 56.2% antlerless)

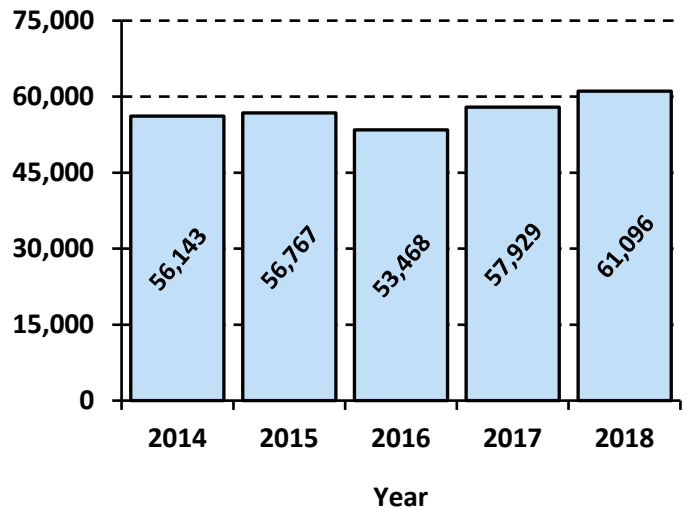

**Top 5 Counties:** Pike (2,135), Fulton (1,576), Jefferson (1,490), Adams (1,398), Williamson (1,174)

**Harvest by Type of Bow:** 59.2% compound, 39.7% crossbow, 1.1% traditional bows. Crossbow harvest continued to increase as a result of 2017 legislation that removed restrictions on crossbow use, treating the crossbow just like any other type of bow during hunting seasons (see included chart).

### Archery Deer Harvest by Bow Type, 2008-2018

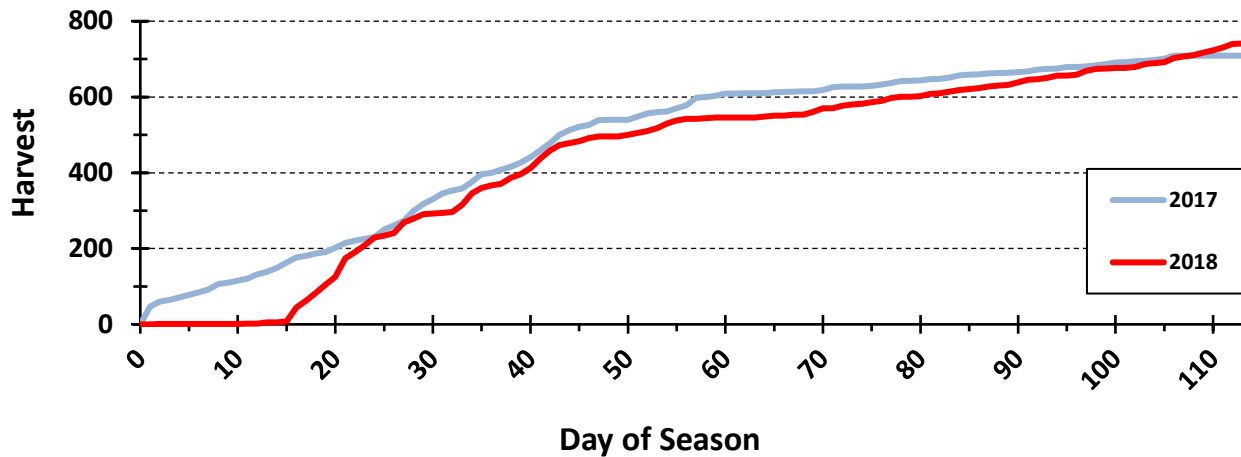

### Harvest Results in the 5-County Restricted Archery Zone

**Special Regulations:** In order to reduce doe harvest and help grow deer populations to their appropriate county goals, archery hunters in the counties of Champaign, Douglas, Macon, Moultrie, and Piatt were permitted to harvest only antlered deer during the first 15 days of the season (October 1-15).

**Results:** Illinois' archery season began with extremely hot weather, with high temperatures in the upper 80's for the first several days of the season. Hunter participation decreased as a result, and statewide archery harvest after 10 days of hunting declined 46% compared to the previous year. Similarly, antlered buck harvest in the Restricted Archery Zone was down 76% even though antlered harvest was unrestricted. The lifting of antlerless harvest restrictions after 15 days coincided with the onset of perfect hunting conditions, and hunter participation and harvest increased dramatically. As a result, nine days after lifting the restriction on antlerless harvest, hunters had already caught up with the previous year's doe harvest levels in the Zone (see graph below depicting harvest chronology). Final doe harvest in the Zone was 741, compared to 709 during 2017.

**Outlook:** Previous use of this type of regulation was highly successful in east-central Illinois, with no compensatory increase in doe harvest after resumption of unrestricted regulations. This year's significant harvest increase after October 15 may have been related to the changes in weather that occurred at that time. However, if the current 15-day restrictions on harvest do not result in significant decreases in harvest in the 2019-2020 season, we will recommend that the restriction be increased to a month-long prohibition on antlerless harvest, so that harvest would be 'buck-only' until November 1. We project that such a restriction would result in an approximate 50% decrease in archery doe harvest within the Zone.

## Archery Doe Harvest Chronology in the Restricted Zone

## 2018 Youth Deer Season Results

**Length:** 3 days

**Number of Counties Open:** 99 (closed in Cook, DuPage, and Lake)

**Special Regulations:** Participation limited to youths under the age of 18 (changed from 16 in 2016), and hunters must be accompanied by a responsible supervising adult. One county-specific either-sex permit (available OTC) or one special hunt area permit (issued via lottery) allowed per hunter. Unfilled youth permits were also valid during 1<sup>st</sup> segment of firearm deer season.

**Harvest:** 1,660

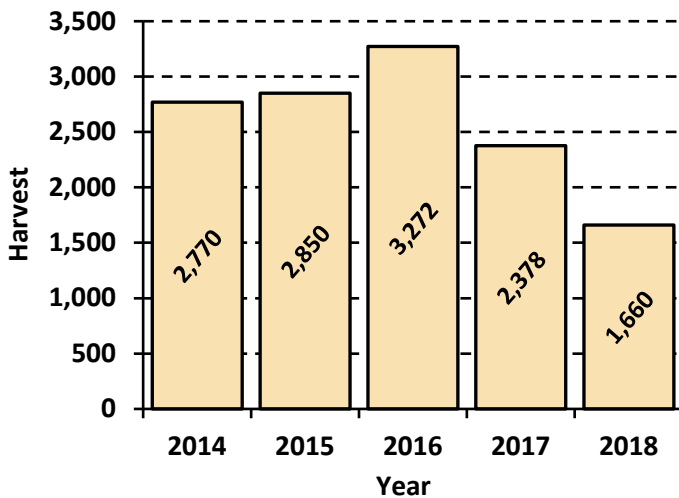

**Season Record:** 3,272 (2016)

**Harvest Sex Ratio:** 54.5% male: 45.5% female (34.6% antlered: 65.4% antlerless)

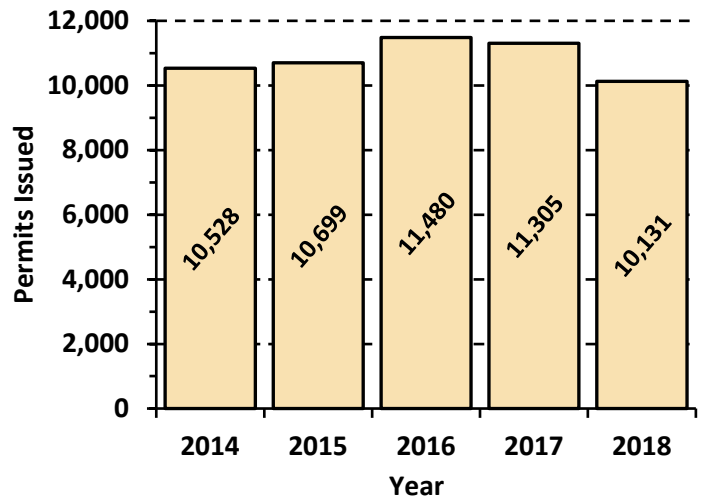

**Hunter Success Rate:** 16.4% (does not include deer taken during 1<sup>st</sup> regular firearm season)

**Top 5 Counties:** Pike (83), Adams (78), Randolph (76), Jefferson (57), Fulton (53)

## 2018 Firearm Deer Season Results

**Length:** 7 days (split; one 3-day [Fri-Sun] + one 4-day [Thu-Sun] segment)

**Number of Counties Open:** 99 (closed in Cook, DuPage, Lake)

**Special Regulations:** County-specific (or special hunt area-specific) permits issued via lotteries; unallocated permits subsequently available OTC through end of season. Mandatory check stations in effect for 14 northern Illinois counties (*JoDaviess, Stephenson, Winnebago, Boone, McHenry, Ogle, DeKalb, Kane, Kendall, Kankakee, LaSalle, Livingston, Grundy, and Will*) for chronic wasting disease (CWD) surveillance; other counties used automated harvest reporting. Archery equipment remained legal for use during firearm deer season with a valid firearm permit on private land only.

**Weather Conditions:** Opening day began with fairly seasonal temperatures, but later in the day a band of freezing rain/light snow moved from west-central Illinois to the Chicago area. Light snow fell on Saturday and Sunday in the northern third of the state. During second season, conditions were mostly favorable on Thursday and Friday, but a strong front brought stormy conditions and rain throughout the state on Saturday and Sunday, with tornados occurring in central Illinois on Saturday.

**Corn Harvest:** Virtually complete (95%), except for northern Illinois.

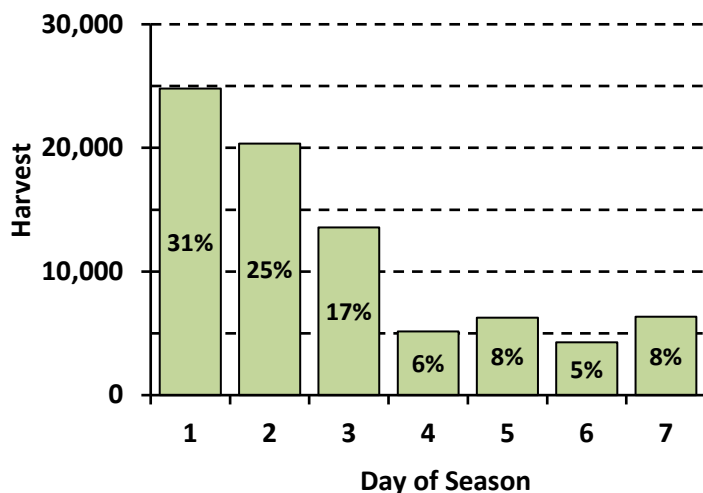

**Deer Harvest:** 80,957

**Season Record:** 123,792 (2005)

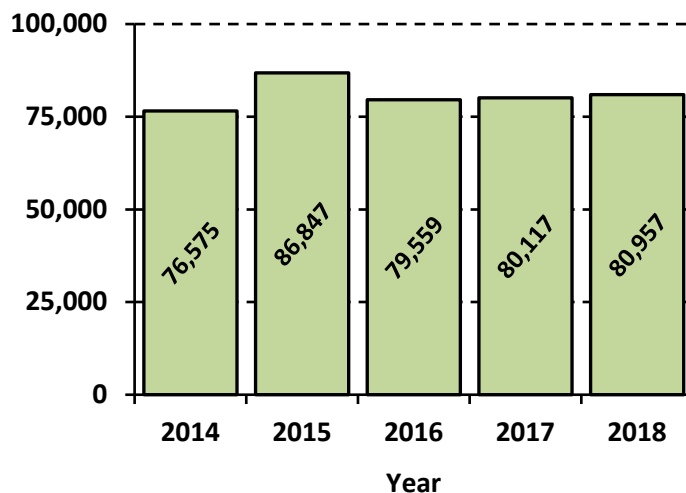

**Harvest Sex Ratio:** 60.0% male: 40.0% female (50.4% antlered: 49.6% antlerless)

## Harvest Age/Sex Summary (All Seasons)

At mandatory check stations, age and sex of harvested deer were recorded by IDNR wildlife biologists. For all other deer reported via the automated harvest reporting system, deer were placed into age classes based on morphological data reported by the hunter. Age classes were female adult ( $\geq 1.5$  years), female fawn, male adult ( $\geq 2.5$  years), male yearling (1.5 years), and male fawn.
