All bids will be open to the public under the Illinois Freedom of Information Act (FOIA) (5 ILCS 140) and other applicable laws and rules, unless Bidder requests in its bid that the State treat certain information as confidential. A.21.1.7 The State will determine whether bids complied with the instructions for submitting bids. Except for late submissions, and other requirements that by law must be part of the submission, the State may require that a bidder correct deficiencies as a condition of further evaluation.

A.21.2 RESPONSIBILITY: A responsible bidder is one who has the capability in all respects to perform fully the contract requirements and who has the integrity and reliability that will assure good faith performance. The State determines whether the Bidder is a “Responsible” bidder; a bidder with whom the State can or should do business. For example, the State may consider the following:

A.21.2.1 A “prohibited bidder” includes any person assisting an employee of the State of Illinois by reviewing, drafting, directing, or preparing any invitation for bids, a request for proposal, or request for information, or providing similar assistance unless such assistance was part of a publically issued opportunity to review drafts of all or part of these documents. For purposes of this section, an employee of the State of Illinois means one who, by the nature of his or her duties, has the authority to participate personally and substantially in the decision to award a State
contract. No person or business shall submit specifications to a State agency unless requested to do so by an employee of the State. No person or business that contracts with a State agency to write specifications for a particular procurement need shall submit a bid or proposal or receive a contract for that procurement need.

Nothing herein is intended to prohibit a vendor from bidding or offering to supply developing technology, goods or services after providing the State with a demonstration of the developing technology, goods, or services; provided the subject of the demonstration to the State represents industry trends and innovation and is not specifically designed to meet the State's needs. Nor is it intended to prohibit a person or business from submitting a bid or offer or entering into a contract if the person or business: (i) initiates a communication with an employee to provide general information about products, services, or industry best practices and, if applicable, that communication is documented in accordance with Section 50-39 or (ii) responds to a communication initiated by an employee of the State for the purposes of providing information to evaluate new products, trends, services, or technologies.

A.21.1.2 Other factors that the State may evaluate to determine Responsibility include, but are not limited to: political contributions, certifications, conflict of interest, financial disclosures, taxpayer identification number, past performance in business or industry, references (including those found outside the Offer,) compliance with applicable laws, financial responsibility, insurability, effective equal opportunity compliance, payment of prevailing wages if required by law, capacity to produce or sources of supply, and the ability to provide required maintenance service or other matters relating to the bidder’s ability to deliver in the quality and quantity within the time and price as specified in this solicitation.

A.21.1.3 Awarded bidders must at all times have financial resources sufficient, in the opinion of the State, to ensure performance of the contract and must provide proof upon request. The State may require a performance bond if, in the opinion of the State, it ensures performance of the contract. The State may terminate the Contract, consistent with the termination for cause provision of the Contract, if the vendor lacks the financial resources to perform under the Contract.

A.21.1.4 The State may require that a bidder correct any deficiencies as a condition of further evaluation.

A.21.3 PRICE: The State identifies the highest priced bidder that meets Responsibility and Responsiveness requirements. The State ranks bids in order of price when appropriate.

A.22 MINORITIES, FEMALES, AND PERSONS WITH DISABILITIES PARTICIPATION AND UTILIZATION PLAN: This solicitation may contain a goal to include businesses owned and controlled by minorities, females, and persons with disabilities in the State’s procurement and contracting processes. If the solicitation contains a goal, then failure to submit a Utilization Plan as instructed later in this solicitation may render the Bid non-responsive. All questions regarding the subcontracting goal must be directed to the Agency/University BEP Liaison prior to submission of proposals.

1. DESCRIPTION OF SUPPLIES AND SERVICES

1.1. GOAL: Farm Lease Contract ("Lease") between Vendor and the Illinois Department of Natural Resources (IDNR) for the purpose of a land management program on the following described land, in a manner consistent with the Agency’s policies. Land is located in Whiteside County, Township 19 North, Range 4 East, Sections 2, 3, 10 & 11 (Attachment AA). Farm leasing of approximately 243 acres in 2015, 253.6 acres in 2016, 253.6 acres in 2017 and 253.6 acres in 2018 of land located at Big Bend State Fish & Wildlife Area for agricultural purposes. Big Bend State Fish & Wildlife Area does not have a park/site office, therefore, any references to the “Site” or “Site Superintendent” will refer to the Prophetstown State Recreation Area, Park/Site Office which is located at 300 E Riverside Drive, Prophetstown IL 61277.

1.2. SUPPLIES AND/OR SERVICES REQUIRED: Many Department of Natural Resources owned or managed lands contain tillable acreage. These lands have the potential to generate revenue if used to grow agricultural products. It is the Department’s policy to minimize the use of such lands for agricultural production in favor of establishing annual or permanent wildlife habitats. However, the Department also recognizes that certain agricultural practices and farm income can provide needed resources for wildlife habitat, improving habitat diversity, developing cover and edge effect, and maintaining annual vegetative stages. The Agency requires services to perform agricultural farming services. See Attachment BB for cropping plan, field numbers, crop and acreage per field.

1.3 MILESTONES AND DELIVERABLES:

1.3.1 This Lease is for a four (4) year period, beginning March 1, 2015, and ending on the latter of the following dates:

a) February 28, 2019; or

b) The date of harvest for carryover wheat planted in the fourth and final year of the Lease, in areas designated by the cropping plan.

The term of this Lease shall be extended only for those areas planted in wheat until harvest of the wheat is complete per the Cropping Plan (Attachment BB) and all covenants of this Lease shall remain in full force throughout the harvest period. All other extensions or changes to the Lease term will require a written amendment and approval by the Agency.

1.3.2 Vendor agrees to pay one half of annual lease payment on or before July 15th and the balance shall be paid in full by December 15th for each crop or lease year. See Section 5.1 for Agency specific terms and conditions. Payment may be any combination of the following methods:

a) Specified services to the Site as outlined in Attachment CC;

b) Specified crops left in field per Attachment BB, or

c) Cash payment (See section 1.3.3).

1.3.3 Vendor further agrees that cash payment (if any) will be made in the form of a bank cashier’s check, a certified check, a bank draft or U.S. Postal Money Order made payable to the Illinois Department of Natural Resources.
1.3.4. Full payment for carryover wheat planted in Year 4 of the Lease shall be due **July 15, 2019**. The payment amount shall be the per acre rate per year as set in Section 2.1.2 for the number of acres of carryover wheat planted.

1.3.5. IDNR may require the Vendor under this cropping plan (Attachment BB) to leave all or a certain portion of the crops in the field standing without being harvested. If Vendor fails to comply with this requirement, IDNR will receive the rent per acre from the Vendor as set forth in Section 2.1.2 for each acre that the Vendor harvested in violation of the cropping plan.

1.3.6. An irrevocable letter of credit (Attachment DD) is required to insure payment of property taxes and lease payment due to lease default. An irrevocable letter of credit must be submitted within thirty (30) days after contract execution and must be submitted prior to March 1st every year thereafter during the term of this Lease. Failure to do so shall subject this Lease to immediate termination.

1.3.7. Vendor additionally covenants and agrees that if any required policies of liability insurance should lapse, Vendor shall be liable for loss, injury, damage or claims to persons or property resulting from or by virtue of Vendor’s negligence. A proof of liability insurance document shall be submitted within 30 days after contract execution and must be submitted prior to March 1st every year thereafter during the term of this Lease.

1.3.8. Vendor agrees to notify the Site Superintendent prior to all planting and harvesting of crops. All crops shall be harvested by **November 1st** unless otherwise agreed to in writing by both parties or unless the Agency determines that adverse weather prohibits harvesting by **November 1st**. No fall plowing will be permitted without the Site Superintendent’s written approval.

1.3.9. Vendor agrees to pay all leasehold taxes on the leased lands during the lease term. Failure to do so shall subject the lease to immediate termination. Vendor shall provide a copy of the paid leasehold tax receipt for each year of the Lease by **December 15th** of the year in which the taxes were paid. The obligations of this Paragraph shall survive the expiration or earlier termination of the term of this Lease.

1.3.10. Maintenance fertilizer is required per soil tests on all crop fields annually by the Vendor. Maintenance levels for each crop are to be maintained and determined using Illinois Agronomy Handbook, Chapter 8, ([http://extension.cropsci.illinois.edu/handbook/](http://extension.cropsci.illinois.edu/handbook/)) (Attachment GG).

IDNR may require the Vendor under this cropping plan to leave all or a certain portion of the crops in the field standing without being harvested. If Vendor fails to comply with this requirement, IDNR will receive the rent per acre from the Vendor as set forth in Section 2.1.2 for each acre that the Vendor harvested in violation of the cropping plan. **Non-adherence to cropping plan instructions may be cause for termination of the farm lease.**

*Wheat Carryover-This wheat acreage may need to be custom farmed in 2015.

**BIG BEND FISH & WILDLIFE AREA**

**SUPPLEMENTAL LEASE PROVISIONS**

This document serves as an attachment to the Big Bend Fish & Wildlife Area (BBFWA) cropping plan and farm lease for the period of March 1st, 2015 thru February 28th, 2019. All items in this document are to be considered as requirements for the execution of this lease.

This is a four (4) year agricultural lease on approximately 255 acres of tillable land. This lease includes growing corn, soybeans, annual rye or wheat and sunflowers. Exact acreage of each crop can be found listed by field and acres in the accompanying cropping plan and are subject to annual revisions, any such revisions shall require a formal amendment to the lease. All crops are to be established and managed per the provisions listed below. Any and all wildlife related damage to crops is the exclusive responsibility of the Vendor. No compensation, adjustment, refund or allowances of any kind will be allowed for wildlife damage.

Vendor is responsible for the following:

All fertilizer(s), lime, seed, field work, equipment, labor, herbicides, weed control, etc. to establish, maintain, produce and harvest a high quality crop are the responsibility of the Vendor. This also includes the wildlife food plots.

All crops shall be removed in accordance with the terms of the lease and will be the property of the Vendor.

Soil nutrient levels will be maintained at levels at or above ph. = 6.0-6.5, P1> 50#, K> 300#. Copies of all soil testing shall be sent to the DNR park/site office identified in Section 1.1.

A minimum of 40 acres and a maximum of 70 acres of sunflowers will be planted annually to accommodate the site’s dove hunting program. Sunflowers shall be planted or drilled into a clean, fine, firm conventional seedbed no later than May 10th. The Vendor is required to use genetically linked Clearfield™ Sunflowers, this brand allows for the use of a
Attachment BB  Cropping Plans to include Site Specific Information

non-selective herbicide in accordance with manufacturer labeled rates. At least one, preferably two cultivations will be required to eliminate remaining weeds. This cultivation may include between-row post-emergent cultivation in planted sunflowers or post-emergent cultivation with a coil spring harrow, spike tooth harrow or rotary hoe type in sunflowers. The harrow and rotary hoe operations are possible with as little as 5% to 7% loss if done when sunflowers are at the four to six leaf stage (beyond cotyledon), preferably in dry afternoons when plants are less turgid. The desired plant population target is 25,000-30,000 plants/acre after cultivation is completed. New FS Dove Blend sunflower seed will be used unless another variety is approved by the Site Superintendent. No less than 60 lbs of spring applied nitrogen shall be applied when sunflower crop follow corn. Vendor will ensure that seedbed preparation, soil fertility, liming, fertilizer, herbicides, seeding rates, planting methods, cultivation, weed control, etc. are completed timely to allow for the production of a quality sunflower crop that will be ripe and dry 2 weeks prior to September 1st each year of the lease. Dove hunting fields shall only contain sunflowers and bare dirt.

All sunflowers must be planted each year in a time frame so the crop is ripe and dry by August 15th. A planting date between April 15th to May 10th is optimal. Upon approval of the Department, the Vendor may subcontract the input of the sunflower crop. Strips and/or portions of the field(s) shall be mowed or chopped by August 15th or a minimum of two weeks before the opening of the dove season and shall be performed by the Site Superintendent. The mowed strips shall not exceed 25% of the sunflower crop acreage. Sunflower harvesting shall begin by August 30th. Upon approval of the Department, the Vendor may subcontract for the mowing, chopping and/or harvesting of the sunflower crop. Cause for schedule delays shall be limited to weather conditions and must be agreed upon by the Site Superintendent and District Wildlife Biologist.

The Vendor shall leave standing after harvest, a minimum of 5% of all grain crops. These crop(s) must remain undisturbed until March 1st to provide wildlife with winter food and cover. Percentage deviations shall be approved by the Site Superintendent and the District Wildlife Biologist. Although not mandatory, it is preferred that crops of corn and/or milo be chosen to stand.

**Annual Rye or Wheat.** Crop fields 1 thru 7 are located on excessively drained sandy-loam soils of the Sparta series. In an effort to expand diversity, wildlife habitat and lengthen crop rotations, these fields will include annual rye or wheat (RW) in their rotations. The RW must be sown in the fall between September 20th and October 1st (after sunflower harvest/dove field management and for wheat, the Heschen fly-free date). The RW can remain through the following year’s growing season and the grain harvested, green chopped or the RW can be used as a green manure crop plowed under and rotated in a new crop. If the crop is rotated, the soil must be disturbed by April 15th. If the crop is green chopped, this shall be performed after July 1st. Since double cropping is not permitted, no grain or forage maybe harvested in the same growing season; the crop may be plowed under “as is” and rotated into a new crop in the same growing season.

**Big Bend Annex Food Plots.** Approximately, 23 acres of food plots in 4 separate plots are located on the 1300 acre Big Bend annex. These acres are not part of the leased acreage; however, the Vendor may be asked to provide annual planting and managing of these plots. Seed costs, fertilizer, weed control (herbicide costs and applications) and planting costs will be provided for by the IDNR. All per hour charges for labor and all per acre charges for equipment rental and field work (disking, planting, cultivating, etc.) may not exceed pricing (per acre or hour) guidelines established for these rates in the Farm Business Management guidelines produced by the University of Illinois [http://www.farmdoc.illinois.edu/Manage/](http://www.farmdoc.illinois.edu/Manage/). Corn, grain sorghum, and sunflowers are the eligible crops; however, at least 2 plots of corn and/or grain sorghum must be included. Rotation of crops is required. These plots must be planted by June 1st and grain sorghum requires a 60 degree Fahrenheit soil temperature to germinate.

- Spring chopping or rotary mowing the old plot(s)
- Disking, and final soil-finishing to provide firm, level seedbed. (no tilling is allowed)
Cropping Plans to include Site Specific Information

- Applying 300 lbs of triple 19 per acre, granulated fertilizer or 75lbs/ac each of DAP and Potash per acre and 130lbs per acre of Urea. PH must be near neutral and applications of Pell lime may be required.
- Plan eligible crops per District Wildlife Biologist recommendations
- Apply labeled herbicides per District Wildlife Biologist recommendations

<td><strong>Conventional Seeding</strong> on sites previously in crops prepares a firm seedbed with sufficient residue for erosion control during establishment. Repeat shallow disking to remove weeds before planting. The seedbed must be fine, level and firm for quick and even germination. Soil shall not be worked during wet conditions. A companion crop of oats, wheat, or rye shall be planted with spring seeding of cool season grassy cover. Place seed 1/16” to 1/4” deep with a cultipacker grass seeder or grassland drill with press wheels; or a broadcast seeder and roll just prior to and immediately after seeding. Dry fertilizer can be mixed and broadcast with the seed. Apply by spreading at 1/2 rate and go over the field twice; the second time applying 1/2 way between the first tracks. If broadcast is method, increase seed application by 25%. The Vendor is responsible for preparing the site and seeding this practice with Vendor equipment. The IDNR will mow the oats off at dough stage. After the stand is established, the IDNR will mow the field annually after August 1st. Attachment BB  Cropping Plans to include Site Specific Information

After the stand is established, the IDNR will mow the field annually after August 1st. After 3 years, this practice will be rotated into a food plot composed of corn and/or grain sorghum per the guidelines below.

**Strip # 2 (middle strip) Food Plot**

**Fertilizer and Inoculants:** Vendor shall test soil and apply fertilizer as appropriate for grain crop. If Vendor planting equipment is equipped with fertilizer attachments, the Vendor shall apply starter fertilizer during planting operation. If fertilizer is not applied during planting operation, Vendor shall provide equipment and apply broadcast granular fertilizer at 250 to 300 lbs per acre of 13-13-13 and incorporate during tillage. Lime as needed to maintain soil PH around 6.0 to 6.5. The Vendor is responsible for maintaining soil amendments.

**Species:** Grain sorghum (milo) and corn will be used. The IDNR shall provide this seed. These crops must be rotated every year, i.e. corn, milo, milo, corn and so on.

**Plot Establishment Methods:**

**Planted Plots:** Vendor shall prepare a fine/firm level seedbed by disking and harrowing or field cultivating until level is established. When rotating behind the grass legume, disking alone will not eliminate the existing cover. Vendor shall plow or use Department provided herbicide to eliminate existing vegetation. Repeat shallow disking before planting to remove new weeds.

Vendor shall plant the corn portion of the food plot using a conventional row-type planter (30” to 38” rows) at a population of 29,000 kernels/acre. The sorghum performs well when drilled; plug every other hole in the seed hopper (suggest use duct tape) and drill at 12 to 15 lbs per acre. If the sorghum is planted in rows, use the proper fingers, plates, drum (depending on planter model) suggested by the manufacturer. If the sorghum is planted using a corn planter and corn settings, slow-speed planting will eliminate too many plants per acre as sorghum seed flows similar to water. Plant at a depth of around three-quarters to one-inch deep or at a depth where there is adequate soil moisture.

**Planting Dates:** The sorghum is a warm season plant; therefore, it will need a soil temperature of about 60 degrees Fahrenheit to germinate (similar to soybean planting time), typically around May 15th.

**Weed Control:** Several herbicides are labeled for use on both corn and sorghum. Two suggested products are Dual® II Magnum ® at planting time or shortly thereafter (pre-emergence) apply at 2.5qts/acre or Lasso Micro-Tech ® (same application time & same rate). Problem broadleafs can be sprayed post-emergence with 2-4-D at 1 pint/ac up until the crop is 18” tall. If no herbicides are applied, the Vendor shall at a minimum, cultivate the row- planted crops until the crop canopies and weeds are controlled.

**Replanting Food Plots:** Allow the food plots to stand at least until March 1st. Vendor shall utilize a stalk shredder or a rotary mower to chop or shred the stalks. If perennials begin to encroach, apply 2.5 qts of Roundup ® mixed with 10 gallons of water per acre before performing site preparation steps or no-till after spraying (about 7-10 days). Roundup ®-ready corn seed can be sprayed when deemed appropriate.

**Strip # 3 (North strip)**

Strip Disked: The plot will be disked and allowed to grow-up to high seed yielding annuals. The strip shall be disked in early spring as soon as field conditions permit.

These fields shall rotate every four years and as follows: grass/legume to food plot to strip disked.
**ACCEPTABLE SERVICES IN LIEU OF CASH PAYMENTS**

All lease items are to be used by the Vendor on/or for the benefit of the lease site. The following service items (labor) are considered acceptable as the Department’s lease payment if provided directly by the Vendor, using equipment listed on the equipment list (Attachment FF) contained within the prospective Vendor’s bid packet. The Comprehensive Environmental Review Process (CERP) must be utilized for any management activity that could potentially affect threatened & endangered species-natural areas and nature preserves, wetlands, cultural resources and, other management activity that affects soil disturbance, water flow including quality and air quality. Refer to the Department’s CERP manual for applicable exemptions and procedures (will be provided to the awarded Vendor upon request).

**Application of Chemicals** - purchased by the site for control of noxious, exotic and invasive weeds, vegetation control, brush and general agricultural purposes. The Vendor shall provide a copy of his current valid state applicators license to Site Manager.

**Clearing Projects** - renovation of wildlife management lands by removing brush or trees.

**Construction and Maintenance** - of field access roads for wildlife management purposes.

**Installation or Maintenance of Culverts** - for field access roads, water management and hunter parking lots. (Vendor must obtain all applicable permits are acquired from State, county or township jurisdictions.)

**Fertilizer & Agriculture Lime Application** - on food plots, sunflower fields, waterfowl management fields, grass & legume and other wildlife management plantings.

**Field Tillage, Preparation & Planting Services** - provided for wildlife food, legume and grass plantings.

**Labor** - for boundary fencing, to install boundary “No Hunting” signs and regulations signs, controlling noxious weeds or brush, for repair and maintenance of water control for wetland management programs(i.e., tubes, gates, emergency pump rental), brush-pile construction, fire and hunter access trails, removal of fences on or along crop fields, tree planting and direct seeding preparation and planting.

**Mowing** - for specific wildlife management purposes; access, vegetation control, hunting strips and field renovation.

**Minor Hazard Removal** – removal of stumps, foundations or equipment.

**Repair and Maintenance of Drainage Structures** - (terraces, waterways, water control structures, trenches, etc.)

**Hauling Rock and/or Spreading of Rock** - purchased by the Agency.

**Timber Stand Improvement (TSI)** - TSI labor provided by the Vendor to benefit wildlife management objectives as prescribed in the wildlife management plan (will be provided to awarded Vendor upon request).

**Wetland Developments** - labor required to construct wetlands and ponds planned and approved through the site’s annual plan of work process.
