**1.14 RESERVATIONS:** You must read and understand the solicitation and tailor your Offer and activities to ensure compliance. We reserve the right to amend the solicitation; reject any or all Offers; to award by item, group of items, or grand total; and to waive minor defects. We may request a clarification; inspect your premises; interview staff; request a presentation; or otherwise verify the contents of the Offer, including information about subcontractors and suppliers. We may request Best & Final Offers when appropriate. We will make all decisions on compliance, evaluation, terms and conditions, and shall make decisions solely in the best interests of the State. This competitive process requires that you provide additional information and otherwise cooperate with us. If you do not comply with requests for information and cooperate, we may reject your Offer. You have no right to an award by submitting an Offer, nor do you have the right to a contract based on our posting your name in a Bulletin notice. We are not responsible for and will not pay any costs associated with the preparation and submission of your Offer. If you are the awardee, you shall not commence, and will not be paid for any billable work prior to the date all parties execute the contract, unless approved in writing in advance by the State Purchasing Officer or the Chief Procurement Officer (or the CPO's designee).

## SECTION 2 - HOW WE WILL EVALUATE OFFERS

**2.1 OFFER RESPONSE FORMS:** We will evaluate the information you provide in the Offer Response Forms. You will find these forms in later sections of this solicitation.

**2.2 EVALUATION CATEGORIES:** We evaluate four categories of information: Administrative Compliance, Responsibility, Responsiveness, and Price. We will consider the information you supply or don't supply, and the quality of that information when evaluating your Offer. If we find a failure or deficiency, we may have to reject the Offer or reflect that in the evaluation.

**2.2.1 ADMINISTRATIVE COMPLIANCE:** We will determine whether your Offer complied with the Instructions for Submitting Offers. Except for late submissions, we may require that a Vendor correct deficiencies as a condition of further evaluation.

**2.2.2 RESPONSIBILITY:** We will determine whether you are a "Responsible" Vendor; a Vendor with whom we can or should do business.

- i. A "Responsible" vendor must exist as a legal entity and must be authorized to do business in Illinois at the time a bid or proposal is submitted for a State contract. Evidence of good standing can include Certificate of Good Standing, copy of assumed name certificate from home county, etc.
- ii. Public Law 96-0795 provides that a "prohibited bidder" includes a person assisting the State of Illinois or a State agency in determining whether there is a need for contract unless such information was part of a response to a publicly issued request for information (RFI). Additionally, one assisting the State by reviewing, drafting or preparing a request for proposals or request for information or provided similar assistance is deemed a prohibited bidder. See certifications section of the Contract for the required certifications prior to entering into a contract with the State of Illinois.
- iii. Other factors that we may evaluate to determine Responsibility include, but are not limited to: certifications, conflict of interest, financial disclosures, taxpayer identification number, past performance, references (including those found outside the Offer,) compliance with applicable laws, financial stability and the perceived ability to perform completely as specified. Every bid submitted to and contract executed by the State and every subcontract subject to Section 20-120 of the Procurement Code shall contain a certification by the bidder, contractor, or subcontractor, respectively, that the bidder, contractor, or subcontractor is not barred from being awarded a contract or subcontract under this Section and acknowledges that the chief procurement officer shall declare the related contract void if any of the certifications are false.

You must at all times have financial resources sufficient, in the opinion of the State, to ensure performance of the contract and must provide proof upon request. The State may terminate the Contract, consistent with the termination for cause provision of this Contract, if the Vendor lacks the financial resources to perform under the Contract. We may require that a Vendor correct any deficiencies as a condition of further evaluation.

**2.2.3 RESPONSIVENESS:** We will determine whether the Offer meets the stated requirements. Minor differences or deviations that have negligible impact on the price or suitability of the supply or service to meet the State's needs may be accepted or corrections allowed. If no administratively compliant and responsible Vendor meets a particular requirement, we may waive that requirement. When the specification calls for "Brand Name or Equal," the brand name product is acceptable. Other products will be considered with proof the other product meets stated specifications and is equivalent to the brand product in terms of quality, performance and desired characteristics.

**2.2.4 PRICE:** We will identify the lowest priced Offer that meets Administrative, Responsibility and Responsiveness requirements. We will rank Offers in order of Price when appropriate.

**2.3 AWARD:** We will award to the Responsible Vendor whose Offer passes Administrative review, is Responsive, and who submits the lowest Price.

**SECTION 3 - STATEMENT OF WORK / SPECIFICATIONS / QUALIFICATIONS**

3.1 The supplies and/or services required, any milestones and deliverables, warranty, reporting requirements, Vendor and staff requirements, work location, contract term, renewals and other specifications are set forth in the body of the Contract following Section 8 of the solicitation. Section 8 identifies the requirements for completing the Contract as your offer to us.

3.2 **WORK LOCATION DISCLOSURE:** In Section 2.7 of the Contract, Vendor shall disclose the location where the services required shall be performed. This information and economic impact on Illinois and its residents may be considered in the evaluation. If the selected Vendor receives additional consideration in the evaluation based on work being performed in the United States, the resulting contract shall contain a provision that any shift in such work outside the United States may be considered a breach of contract.

3.3 **SUBCONTRACTOR DISCLOSURE:** Will you be using any subcontractors?  Yes  No

If yes, you must identify below the names and addresses of all subcontractors you will be entering into a contractual agreement with for a total value of \$25,000 or more in the performance of this Contract, together with a description of the work to be performed by the subcontractor and the anticipated amount of money to the extent the information is known that each subcontractor is expected to receive pursuant to the Contract. For purposes of this section, subcontractors are those specifically hired to provide to the Vendor some or all of the goods, services, property, remuneration, or other forms of consideration that are the subject of this Contract, including sub-lessees from a lessee of a State agency. A copy of each subcontract issued pursuant to the Contract shall be provided to the State Purchasing Officer or Chief Procurement Officer within 20 days after the execution of the Contract or after execution of the subcontract, whichever is later. If at any time during the term of the Contract, Vendor adds or changes any subcontractors, Vendor will be required to promptly notify, by written amendment to the Contract, the State Purchasing Officer or the Chief Procurement Officer of the names and addresses and the expected amount of money that each new or replaced subcontractor will receive pursuant to the Contract. Any subcontracts entered into prior to award of the Contract are done at the Vendor's and subcontractor's risk.

The Vendor shall be entitled to compensation upon submission of invoices and proof of claim for supplies and services provided in compliance with this contract up to and including the date of termination.

## 2. DESCRIPTION OF SUPPLIES AND SERVICES

2.1 GOAL: To utilize the knowledge and expertise of the Vendor, that is lacking in the Procuring Agency's staff, to obtain supplies and services necessary to help meet the statutory responsibilities of the Procuring Agency. The Illinois Department of Natural Resources (IDNR) requires assistance with Asian Carp sampling, netting and collection at select locations on the Illinois Waterway System.

Provide fish sampling on the Chicago Waterway Systems as requested by the Department of Natural Resources (IDNR). "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

Despite efforts to control the upstream migration of Asian Carp in Illinois' waterways, there is evidence that Asian Carp are beyond the US Army Corps of Engineers electronic dispersal barrier, known as Barrier IIA, on the Chicago Sanitary and Ship Canal (CSSC) near Romeoville. These public waters are used for commercial navigation and recreational use, and the presence of Asian Carp eDNA requires action by the Illinois Department of Natural Resources and others to evaluate the threat these fish pose. The potential for the fish to spread in these waterways is possible. Asian Carp can devastate native populations as well as cause great economic damage to the Great Lakes commercial, sport and tribal fisheries collectively valued at more than \$7 billion annually.

The Illinois Department of Natural Resources is deeply involved with this effort taken pursuant to the authority granted to the Department of Natural Resources by the Illinois General Assembly and which is in the Fish and Aquatic Life Code, 515 ILCS 5/1-135 and 150. IDNR manages, owns and controls the fishery located within the State borders for the State of Illinois and is solely able to provide authorization for activities intended to protect fishery populations within those same borders.

2.2 SUPPLIES AND/OR SERVICES REQUIRED: Contractor shall provide all the equipment, supplies and labor to conduct fish sampling on the Chicago Waterway Systems. The Department shall oversee and assist with all activities. "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

### Asian Carp Barrier Defense Project at selected sites below the electric fish barrier

This project uses a combination of DC Electrofishing and Commercial Fishing Nets to locate and remove as many Asian carp as possible during the project. Fisheries biologists and commercial netters will sample selected stations as well as suspected areas containing Asian carp and remove Asian Carp from the Illinois Waterway System to beginning at the Route 89 Bridge at Spring Valley near the Starved Rock Lock and Dam to the Lockport Lock and Dam.

The project will directly and tangibly contribute to the USEPA's strategic objectives of Improving the Health of the Great Lakes and to the strategic goals of the Great Lakes Regional Collaboration (GLRC). One long-term goal of the GLRC for invasive species is to *Stop the spread of Aquatic Invasive Species within the basin, extirpate harmful AIS, or if impossible, then control to levels that ensure sustainable ecosystems and the social, economic and cultural uses they support*. This project takes action to protect the Great Lakes from any such invasion and diminish the threat of Asian Carp. This project is also consistent with the principles of the Invasive Species focus area in that its primary aim is to prevent any invasive species migration into the Great Lakes.

The IDNR along with many other State of Illinois and Federal Agencies are monitoring the area above the Electric Barrier for Asian carp. Below the barrier there is a monitoring program to monitor the advancement of Asian Carp up the Illinois and Des Plaines rivers.

This harvest program is part of the later monitoring program. The objective is to reduce the number of Asian carp in the pools immediately downstream of the Electric Barrier where there are known populations of Asian carp. Our efforts currently are focused on the Marseilles and Dresden pools.

- Lockport Pool – no Asian carp have been found in this pool since the rotenone project in Dec. 2009 when one was found
- Brandon Road Pool – no Asian carp have been found in this pool
- Dresden Pool – there is a small population of bighead and silver carp
- Marseilles Pool – has a good population of bighead and silver carp, with possible reproduction occurring

The idea is that the fewer Asian Carp there are immediately downstream of the Electric Barrier and other possible points of entry into Lake Michigan the less chance there is of one making it through. This is being achieved through the contracting of commercial fishermen to sample the Asian carp. The commercial fishermen are accompanied by IDNR fisheries personnel since commercial fishing is currently not allowed in this portion of the Illinois and Des Plaines rivers.

To date we have sampled and harvested over 54 tons of Asian carp from the Marseilles and Dresden pools. The Asian carp were initially being taken to a fish market where they were being processed into organic fertilizer. Future disposal methods are under discussion.

## 2. DESCRIPTION OF SUPPLIES AND SERVICES

2.1 GOAL: To utilize the knowledge and expertise of the Vendor, that is lacking in the Procuring Agency's staff, to obtain supplies and services necessary to help meet the statutory responsibilities of the Procuring Agency. The Illinois Department of Natural Resources (IDNR) requires assistance with Asian Carp sampling, netting and collection at select locations on the Illinois Waterway System.

Provide fish sampling on the Chicago Waterway Systems as requested by the Department of Natural Resources (IDNR). "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

Despite efforts to control the upstream migration of Asian Carp in Illinois' waterways, there is evidence that Asian Carp are beyond the US Army Corps of Engineers electronic dispersal barrier, known as Barrier IIA, on the Chicago Sanitary and Ship Canal (CSSC) near Romeoville. These public waters are used for commercial navigation and recreational use, and the presence of Asian Carp eDNA requires action by the Illinois Department of Natural Resources and others to evaluate the threat these fish pose. The potential for the fish to spread in these waterways is possible. Asian Carp can devastate native populations as well as cause great economic damage to the Great Lakes commercial, sport and tribal fisheries collectively valued at more than \$7 billion annually.

The Illinois Department of Natural Resources is deeply involved with this effort taken pursuant to the authority granted to the Department of Natural Resources by the Illinois General Assembly and which is in the Fish and Aquatic Life Code, 515 ILCS 5/1-135 and 150. IDNR manages, owns and controls the fishery located within the State borders for the State of Illinois and is solely able to provide authorization for activities intended to protect fishery populations within those same borders.

2.2 SUPPLIES AND/OR SERVICES REQUIRED: Contractor shall provide all the equipment, supplies and labor to conduct fish sampling on the Chicago Waterway Systems. The Department shall oversee and assist with all activities. "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

### Asian Carp Sampling at fixed sites on the Chicago Area Waterway System

Over the past eight months (February 1 – September 30, 2010), the Illinois Department of Natural Resources (IDNR) has worked cooperatively with federal, state, and local partners to develop, update, and implement an Asian carp management plan for the Chicago and upper Illinois waterways. The fifth version of this plan, *Monitoring and Rapid Response Plan for Asian Carp in the Upper Illinois River and Chicago Area Waterway System*, was released in May 2010 in conjunction with the revised Asian Carp Regional Coordinating Committee Framework document. Sampling continued during plan development when IDNR, contract commercial netters, and federal partners combined forces during February and March to sample for Asian carp in warm water discharges located throughout the Chicago Area Waterway System (CAWS). A summary of this and other monitoring efforts is included below (Table 1). The one bighead carp collected from Lake Calumet by a contract commercial netter on June 22, 2010 was the only Asian carp captured or observed upstream of the Dispersal Barrier during routine monitoring and targeted removal efforts.

The monitoring plan is currently being expanded to include telemetry and DIDSON sonar evaluations of the Electric Barrier, evaluations of gears used to sample Asian carp, larval and small fish sampling protocols, and development of methods to sample larval Asian carp that might be transported from the Des Plaines River to the Chicago Sanitary and Ship Canal (CSSC) upstream of the barrier during extreme flooding events. A meeting of the Monitoring and Rapid Response Workgroup (MRRWG) was convened in late September to gain input from participating agencies and independent experts on proposed additions and modifications to the existing plan. IDNR is taking the lead in revising the plan and version six is scheduled for release by the end of the year.

Monitoring efforts outlined in the May 2010 plan included monthly environmental DNA (eDNA) monitoring (contracted by U.S. Army Corps of Engineers; USACE) and weekly DC electrofishing and trammel net sampling at five (5) fixed sites in the CAWS upstream of the Dispersal Barrier. In addition, four reaches that essentially sampled all 70 miles of the CAWS upstream of the barrier were to be sampled monthly by electrofishing. Monitoring never reached the frequency outlined in the original plan due to a variety of factors including, changed sampling priorities, limited processing capacity for eDNA, and accumulating data suggesting Asian carp abundance was low in the waterway upstream of the electric barrier. Water samples for eDNA analysis were collected twice at fixed sites 1, 2, and 5 and once at fixed site 3 in 2010. Conventional sampling consisted of twice monthly electrofishing and netting at the five (5) fixed sites and seasonal electrofishing at the four reaches (once in spring, summer, and fall). The decision to sample at a reduced frequency was made after meetings among IDNR biologists and participating federal action agencies, mainly U.S. Fish and Wildlife Service (USFWS) and USACE.

## 2. DESCRIPTION OF SUPPLIES AND SERVICES

2.1 GOAL: To utilize the knowledge and expertise of the Vendor, that is lacking in the Procuring Agency's staff, to obtain supplies and services necessary to help meet the statutory responsibilities of the Procuring Agency. The Illinois Department of Natural Resources (IDNR) requires assistance with Asian Carp sampling, netting and collection at select locations on the Illinois Waterway System.

Provide fish sampling on the Chicago Waterway Systems as requested by the Department of Natural Resources (IDNR). "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

Despite efforts to control the upstream migration of Asian Carp in Illinois' waterways, there is evidence that Asian Carp are beyond the US Army Corps of Engineers electronic dispersal barrier, known as Barrier IIA, on the Chicago Sanitary and Ship Canal (CSSC) near Romeoville. These public waters are used for commercial navigation and recreational use, and the presence of Asian Carp eDNA requires action by the Illinois Department of Natural Resources and others to evaluate the threat these fish pose. The potential for the fish to spread in these waterways is possible. Asian Carp can devastate native populations as well as cause great economic damage to the Great Lakes commercial, sport and tribal fisheries collectively valued at more than \$7 billion annually.

The Illinois Department of Natural Resources is deeply involved with this effort taken pursuant to the authority granted to the Department of Natural Resources by the Illinois General Assembly and which is in the Fish and Aquatic Life Code, 515 ILCS 5/1-135 and 150. IDNR manages, owns and controls the fishery located within the State borders for the State of Illinois and is solely able to provide authorization for activities intended to protect fishery populations within those same borders.

2.2 SUPPLIES AND/OR SERVICES REQUIRED: Contractor shall provide all the equipment, supplies and labor to conduct fish sampling on the Chicago Waterway Systems. The Department shall oversee and assist with all activities. "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

### Asian Carp Sampling at fixed sites on the Chicago Area Waterway System below the fish dispersal barrier

Over the past eight months (February 1 – September 30, 2010), the Illinois Department of Natural Resources (IDNR) has worked cooperatively with federal, state, and local partners to develop, update, and implement an Asian carp management plan for the Chicago and upper Illinois waterways. The fifth version of this plan, *Monitoring and Rapid Response Plan for Asian Carp in the Upper Illinois River and Chicago Area Waterway System*, was released in May 2010 in conjunction with the revised Asian Carp Regional Coordinating Committee Framework document. Sampling continued during plan development when IDNR, contract commercial netters, and federal partners combined forces during February and March to sample for Asian carp in warm water discharges located throughout the Chicago Area Waterway System (CAWS). A summary of this and other monitoring efforts is included below (Table 1). The one bighead carp collected from Lake Calumet by a contract commercial netter on June 22, 2010 was the only Asian carp captured or observed upstream of the Dispersal Barrier during routine monitoring and targeted removal efforts.

The monitoring plan is currently being expanded to include telemetry and DIDSON sonar evaluations of the Electric Barrier, evaluations of gears used to sample Asian carp, larval and small fish sampling protocols, and development of methods to sample larval Asian carp that might be transported from the Des Plaines River to the Chicago Sanitary and Ship Canal (CSSC) upstream of the barrier during extreme flooding events. A meeting of the Monitoring and Rapid Response Workgroup (MRRWG) was convened in late September to gain input from participating agencies and independent experts on proposed additions and modifications to the existing plan. IDNR is taking the lead in revising the plan and version six is scheduled for release by the end of the year.

Monitoring efforts outlined in the May 2010 plan included monthly environmental DNA (eDNA) monitoring (contracted by U.S. Army Corps of Engineers; USACE) and weekly DC electrofishing and trammel net sampling at five fixed sites in the CAWS upstream of the Dispersal Barrier. In addition, four reaches that essentially sampled all 70 miles of the CAWS upstream of the barrier were to be sampled monthly by electrofishing. Monitoring never reached the frequency outlined in the original plan due to a variety of factors including, changed sampling priorities, limited processing capacity for eDNA, and accumulating data suggesting Asian carp abundance was low in the waterway upstream of the electric barrier. Water samples for eDNA analysis were collected twice at fixed sites 1, 2, and 5 and once at fixed site 3 in 2010. Conventional sampling consisted of twice monthly electrofishing and netting at the five fixed sites and seasonal electrofishing at the four reaches (once in spring, summer, and fall). The decision to sample at a reduced frequency was made after meetings among IDNR biologists and participating federal action agencies, mainly U.S. Fish and Wildlife Service (USFWS) and USACE.

## 2. DESCRIPTION OF SUPPLIES AND SERVICES

2.1 GOAL: To utilize the knowledge and expertise of the Vendor, that is lacking in the Procuring Agency's staff, to obtain supplies and services necessary to help meet the statutory responsibilities of the Procuring Agency. The Illinois Department of Natural Resources (IDNR) requires assistance with Asian Carp sampling, netting and collection at select locations on the Illinois Waterway System.

Provide fish sampling on the Chicago Waterway Systems as requested by the Department of Natural Resources (IDNR). "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

Despite efforts to control the upstream migration of Asian Carp in Illinois' waterways, there is evidence that Asian Carp are beyond the US Army Corps of Engineers electronic dispersal barrier, known as Barrier IIA, on the Chicago Sanitary and Ship Canal (CSSC) near Romeoville. These public waters are used for commercial navigation and recreational use, and the presence of Asian Carp eDNA requires action by the Illinois Department of Natural Resources and others to evaluate the threat these fish pose. The potential for the fish to spread in these waterways is possible. Asian Carp can devastate native populations as well as cause great economic damage to the Great Lakes commercial, sport and tribal fisheries collectively valued at more than \$7 billion annually.

The Illinois Department of Natural Resources is deeply involved with this effort taken pursuant to the authority granted to the Department of Natural Resources by the Illinois General Assembly and which is in the Fish and Aquatic Life Code, 515 ILCS 5/1-135 and 150. IDNR manages, owns and controls the fishery located within the State borders for the State of Illinois and is solely able to provide authorization for activities intended to protect fishery populations within those same borders.

2.2 SUPPLIES AND/OR SERVICES REQUIRED: Contractor shall provide all the equipment, supplies and labor to conduct fish sampling on the Chicago Waterway Systems. The Department shall oversee and assist with all activities. "Sampling" is defined as the act of placing commercial nets or other commercial gear attempting to capture targeted fish species (Asian carp) under the direct supervision of IDNR Fisheries biologists.

### Asian Carp Sampling for Rapid Response on the Chicago Area Waterway System or Upper Illinois Waterway System

In addition to routine monitoring for Asian Carp, the Monitoring and Rapid Response Workgroup (MRRWG) plan called for targeted removal actions to eliminate Asian carp from the CAWS when their presence was detected by eDNA or conventional sampling. Three such actions triggered by positive eDNA detections took place during May and June in the North Shore Channel (electrofishing and netting action), Little Calumet River (rotenone action), and Bubbly Creek (electrofishing and netting action). Another took place at Lake Calumet and the Calumet River during June after the Lake Calumet bighead carp was captured by a contract netter. No Asian carp have been captured or seen in any of the targeted removal actions performed to date.
