Buy, Sell and Saw Illinois Wood!

Wooden Dollars Monthly

is published on the first of each month by Illinois Division of Forest Resources to provide woodland owners market outlets for forest products, to protect and sustain the woodland resources of Illinois, and help supply industry with information and raw materials—all for the benefit of society. This document is a PDF available electronically and posted on the IDNR Forest Resources website.

I firmly believe that we can have a healthy environment and a sustainable timber industry.

Frank Murkowski

Policy Statements:

Illinois forests and woodlands are critical to the citizens of Illinois and globally far beyond the singular value of wood and fiber production. The Division of Forest Resources integrates and requires on state land and cooperating private lands that important other concerns of soil, water, wildlife, habitats, recreation, aesthetics and cultural resources are addressed while growing, harvesting and regenerating forests. We advocate and outreach forest management principles to all Illinois forest owners.

Demands on Illinois forest resource for all goods and services the forest can provide continue to increase while nearly 90% of Illinois forests remain privately owned. To conserve, enhance and expand the benefits and critical function of Illinois forests it is necessary that forest landowners, government agencies, forest industry and citizens at large work together.

Equal opportunity to participate in programs of the Illinois Department of Natural Resources and those funded by the U.S. D.A. and other agencies is available to every individual regardless of race, sex, national origin, disability, age, religion, or other non-merit factors. If you believe you have been discriminated against contact civil rights office and/or the Equal Opportunity Officer, IDNR, One Natural Resources Way, Springfield, IL 62702-1271; 217-785-0067; TTY 217-782-9175.

Invitation For Bids

Open Timber Sale

One property, totaling 48.3 woodland acres, owned by Mike Bowen, Allen Nolte, Brent Bauer, and Mike Perry, has been marked for timber harvest by Mike Long of Long Forestry Consultation. The property consists of one cutting unit, all accessible from a bean field. Bur and overcup oak were the primary species marked for harvest. The perimeter of the entire harvest unit is marked with blue flagging. Crop damages must be paid at a rate of \$600 per acre if harvesting is done while the crops are in. If the winning bidder anticipates a summer harvest, then 2 acres can be left unplanted at a rate of \$150 per acre. There is no penalty for harvesting after the crops are out.

Silvicultural Objectives

The forest was selectively marked to remove mature and over mature bur oak.

All trees were marked with orange paint at breast height and at the stump.

All marked trees, including "X" trees, were recorded with a Garmin 76CSx GPS unit to record tree locations. Species specific diameter distributions, waypoints, and GIS shapefiles of the property are available upon request. Please email any request to mike@longforestry.com. Volumes were calculated using the Doyle scale, Form Class 78, (Mesavage, Girard, 1956), by 2 inch DBH classes. All volumes are estimated. Long Forestry assumes no responsibility for volume totals.
