

# Crawford & Rowley Buildings, 202 S. Main, Galena, 1990

- Stories: Two
- Historic use: Office/apartments
- New use: Owners' apartment and guest suite
- Sq. footage: 2,100 sq. ft.
- Construction: Brick load-bearing walls, plaster & lath interior partitions, wood roof and floor, limestone foundation.

## Comments:

The owners converted the upper floors of both buildings to residential. The Crawford Building contains the owners' unit, while the Rowley Building has a rental guest suite. The upper-floor work included masonry repair and repointing; new wood double-hung windows (matching the original configuration); new plumbing, mechanical and electrical; a new rear deck; and the installation of a residential elevator. The second floor of the Crawford building contains 1,700 sq. ft., and that of the Rowley building has 700 sq. ft. In 1990, the total cost project was \$76,500 (\$113,800 today). The upper-floor rehab cost roughly \$28 per sq. ft. in 1990 (\$41.65 today). The total cost of the rehabilitation (including the 1st floor) was \$76,500 (about \$48 per sq. ft.). The guest suite rents for \$100 per night or \$250 for three nights. Because the buildings are within a National Register District, the owners were able to take advantage of the 20% Historic Rehabilitation Tax Credit for the rental suite and for the first-floor commercial spaces but not for their own residence.
