## INITIAL DOCUMENTATION REQUIRED FOR ILLINOIS STATE HISTORIC PRESERVATION OFFICE FEDERAL OR STATE REVIEW

### SMALL CELL SUBMISSIONS

Please bundle your small cell submissions that fall together in a one-mile radius and note our policies regarding small cell reviews (in Chicago, group together installations/replacements within or immediately adjacent to a historic district):

- Until the FCC notes otherwise, if the pole is equal to or less than 50-ft in height (regardless of whether the pole is an existing pole, replacement pole, or new pole) the APE will be reduced from the standard half-mile 500 feet.
- If a pole location shifts more than 100 ft/30 meters, we consider it a new pole installation.

In the submittal cover letter, include:

- Pole height
- Type of installation – i.e. new pole, replacement pole, collocation of new equipment on an existing pole, replacement of existing equipment on an existing pole
- For replacement poles, verification that the new pole will be installed in the same location as the pole being removed
- Percentage increase in height, if applicable, of a “replacement” pole
- Distance/Direction of any shift in location for a “replacement” pole
