Re: LPC#0390055036—DeWitt County  
Clinton/Clinton Landfill #3  
Compliance File

Dear Mr. Welk:

On April 25, 2017 an inspection of the above referenced site was conducted by Dustin Burger representing the Illinois Environmental Protection Agency. The purpose of this inspection was to determine the site's compliance with the Illinois Environmental Protection Act and 35 Illinois Administrative Code G regulations.

No violations were noted during this inspection.

For your information, a copy of the inspection report is enclosed. Please contact Dustin Burger at (217) 278-5800 if you have any questions regarding this inspection.

Sincerely,

A handwritten signature in black ink that reads "John P. Richardson".

John P. Richardson, Acting Manager  
Field Operations Section  
Bureau of Land

Enclosure

April 25, 2017 Inspection  
Inspector: Dustin Burger  
GIS Information from BOL Inventory: N40.11507 W-88.9589

**Narrative Inspection Report**

I conducted a routine solid waste inspection at the above referenced facility on April 25, 2017. This inspection was conducted to determine the regulatory status and evaluate compliance with the Environmental Protection Act (Act) and Title 35 Illinois Administrative Code, Subtitle G: Land Pollution (Regulations). The compliance part of the inspection was conducted as part of a groundwater sampling inspection by Jeff Turner from my office. Dave Bryant accompanied me during the visit. Four photos were taken. The weather was beautiful, with temperatures in the 70s, mostly sunny skies, and moderate to brisk south wind. No violations were noted.

**Site Inspection**

We arrived at the site at 9:00 A.M. and met the groundwater sampling crew from PDC outside the office. While the crew calibrated their groundwater instrumentation, I inspected the landfill with Dave Bryant.

We started at the Chemical Waste Unit. The area was open and several trucks were busy dumping in the area. The CWU still is receiving bed ash, as well as a salt waste and spent bleaching clay. I saw two loads of ash and one load of salt dumped during my inspection. The access road into the CWU had been relocated to make room for a future stormwater pond as Cell 7 is constructed to the north.

Much of the excavation for Cell 7 has been completed, although construction of the liner system has not yet begun.

The active area was located in Cell 5 and was accepting general municipal waste. Two litter pickers were busy chasing down litter from the brisk southerly wind. A water truck had been deployed to water roads to suppress any dust.

I visited the scalehouse to look at waste shipment documentation. The landfill noted the GPS coordinates and elevation of each asbestos load in the logbook.

Special wastes received recently included:

1. Spent lapping compound from Caterpillar's Mapleton Facility

2. Gas condensate and leachate from Clinton Landfill's units #1 and #2
3. Filter cake from Depue
4. Foundry Dust from Mueller in Decatur
5. Foundry sand from Mueller
6. Spent alcohol catalyst from Equistar
7. Spent stearate soap from PTC Tubular
8. Spent fermentation broth from Solazyme

The gas system was operating normally. The gas-to-energy plant was operating, but one engine was down for upgrades. The flare was operating to burn gas in excess of the plant's capacity. The landfill generates approximately 1500 cubic feet per minute of landfill gas, with the flare currently burning approximately 930 cubic feet per minute.

Clinton Landfill notified the Agency of a gas exceedance at probe PGP-1. The facility submitted a Landfill Gas Assessment Report addressing methane exceedances at PGP-3, PGP-3, and PGP16 on December 15, 2016.

Leachate from Unit #3 is collected from the leachate collection system and is pumped into a 30,000 gallon, double-walled underground tank north of Unit #3. Leachate from the MSW unit is recirculated, hauled to the Bloomington-Normal Water Reclamation District, or solidified on-site. For 2016, a total of 15,000 gallons of leachate from Unit 3 were solidified. A total of 769,958 gallons were recirculated back into Unit 3, and 321,500 gallons of leachate from the CWU were hauled for off-site disposal.

### **Permitting**

The facility is operating under permit 2005-070-LF, which expired on February 15, 2017. The permit renewal application was received on November 10, 2016. The permit renewal was challenged by a local group based on the designation of the Mahomet Aquifer as a sole-source aquifer.

Modification 66, issued on April 12, 2017 approved the renewal of the facility's permit for another five years. The permit also modified the facility's operating plan, removing some of the references to PCB's as the facility dropped its effort to accept TSCA regulated waste.

The permit includes a 157.451 acre waste disposal area with a gross airspace of 32,014,225 cubic yards. At current waste disposal rates, the space is estimated to last 45 years.

The estimate for closure of the current landfill's 39.8 acres of municipal solid waste disposal and 6.14 acres comprising the CWU is \$11,478,077. This value includes \$5,564,186 for premature closure, and \$5,913,891 for post-closure care. Financial assurance is in the form of a trust fund.

### **Groundwater**

The latest groundwater submittal on file was received on December 29, 2016 for exceedances noted during the fourth quarter of 2016. The first quarter 2017 data has not been imaged for the file.

The landfill is required to submit a permit application to address the exceedances when they are confirmed by this re-sample event. This is the last groundwater information available in the Agency's file system.

### **Summary of Apparent Violations**

No violations were noted.
