Section I: Purpose	1
Section II: Technical Documentation of the 2018 Income Conversion Table	1
Updated Appendix B: 2018 Income Conversion Table	4

SECTION I: PURPOSE

On June 12, 2017, the Center for Policy Research (CPR) submitted a report, *Technical Documentation: Illinois Schedule of Basic Obligations and Standardized Net Income Table*. The purpose of that document was to provide a schedule of basic child support obligations and an income conversion table for the calculation of child support based on the income shares model that became effective in Illinois on July 1, 2017. The report also provides technical documentation of the economic basis, data, and assumptions used to develop the schedule and income conversion table.

The primary purpose of this addendum is to update the income conversion table for federal tax reform, aka the Tax Cuts and Jobs Act (P.L 115-97), that became effective January 1, 2018. Specifically, this addendum:

- Updates the income conversion table that appeared in Appendix B of the 2017 report to consider tax rates prevailing in 2018; and
- Provides a technical explanation of the update.

A 2018-based income conversion table is provided in Appendix B of this addendum. (There are no changes to Appendix A of the 2017 report.)

SECTION II: TECHNICAL DOCUMENTATION OF THE 2018 INCOME CONVERSION TABLE

Illinois statute (750 ILCS 5/505) directs the Illinois Department of Healthcare and Family Services to develop and promulgate a standardized net income conversion table that computes net income by deducting the standardized tax amount from gross income. Illinois statute (750 ILCS 5/505) defines standardized tax amounts to consist of the federal and state income tax and Social Security and Medicare tax as calculated in withholding or estimated payments. Illinois statute (750 ILCS 5/505) further provides that the standardized tax amount should assume the obligated parent files as a single person claiming the standard tax deduction and one personal exemption, while the parent receiving support also files as a single person claiming the standard tax deduction and one personal exemption, and the number of dependency exemptions for the number of children for whom support is being determined.

The 2018 income conversion table uses the 2018 federal income withholding formula published by the IRS in January 2018,¹ and the 2018 Illinois withholding formula published by the Illinois Department of Revenue.² As explained by the IRS, the 2018 withholding tables reflect the changes in tax rates and tax brackets, increased standard deduction and repeal of personal exemptions that were included in the

² Illinois Department of Revenue. (2018). *Booklet IL-700-T: Illinois Withholding Tax Tables* (effective January 1, 2018). Retrieved from <http://www.revenue.state.il.us/taxforms/withholding/il-700-t.pdf>.

new tax reform law signed in December. The IRS designed the withholding tables to work with existing W-4s that employees have on file with their employers.³ The intent is to minimize the impact on employers. The IRS anticipates releasing a new calculator and Form W-4 to reflect the tax law by the end of February. The calculator and W-4 will provide information to taxpayers to determine whether they need to adjust their withholding. The IRS anticipates making further revisions to the W-4 that will be available in 2019.

The 2018 IRS employer withholding formula that was published in January 2018 is the same for single persons as it is for heads of household. The income withholding formulas use “withholding allowances” rather than “standard deductions” and “personal exemptions.” Assuming no changes to the IRS W-4 between 2017 and 2018, two withholding allowances are used to calculate federal tax liability for a single person. For state taxes, Illinois provides for one withholding allowance for a single taxpayer using Illinois W-4.⁴ This is the amount used for the state tax. Each child for whom support is being determined is an additional withholding allowance. For example, if the parent due support has one child, there would be three federal withholding allowances (*i.e.*, two for the parent and one for the child) and two State withholding allowances (*i.e.*, one for the parent and one for the child).

The 2018 Federal income tax withholding formula also provides for the Social Security and Medicare tax. The Social Security tax rate is 6.2 percent and the base limit is \$128,400 per year. The Medicare tax rate is 1.45 percent. An additional 0.9 percent applies to incomes in excess of \$200,000 per year. The federal monthly withholding allowance is \$345.80. The income conversion table does not consider the Earned Income Tax Credit or the Child Tax Credit because they are not considered in the Federal income tax withholding formula.

INCOME INTERVALS AND LOW INCOME

The Income Conversion Tables (*i.e.*, both the 2017 and 2018 versions) are designed for use with or without an automated calculator. The design is the same for both the 2017 and 2018 version: that is, each is designed to be a lookup table in which each row lists a range of gross incomes spanning \$50 (*e.g.*, \$575.00 through \$624.99) and the corresponding columns show the net-income equivalent. Specifically, each column shows the net-income equivalent for a specific circumstance (*i.e.*, a recipient parent with one child, a recipient parent with two children, and so forth) with the last column showing the net-income equivalent for a parent with duty to support.

The midpoint (*e.g.*, \$600.00 for the gross income range of \$575.00 through \$624.99) is used to calculate the net-income equivalents for each income range. The 2018 table starts with the gross income range of \$325.00 through \$374.99 per month. For incomes below this range, the net-income equivalent of the midpoint appears to produce some anomalous results (*e.g.*, net incomes greater than the lowest gross

income of the range). For this reason, when a party's gross income is less than \$325.00 per month, the gross income amount should be also entered as net income.

UPDATED APPENDIX B: 2018 INCOME CONVERSION TABLE

2018 Gross to Net Income Conversion Table Using Standardized Tax Amounts

Monthly Gross Income	Net Income							
	Recipient Parent with Number of Children for Whom Support Is Being Determined							Parent with Duty to Support
	1 Child	2 Children	3 Children	4 Children	5 Children	6 Children
