**I. POLICY**

The Department shall establish security designations for all facilities including special units, work camps, impact program facilities, transition centers and for electronic detention.

**II. PROCEDURE**

**A. Purpose**

The purpose of this directive is to designate the security level for facilities.

**B. Applicability**

This directive is applicable to all correctional facilities within the Department.

**C. Facility Reviews**

A facility review of this directive shall be conducted at least annually.

**D. Designees**

Individuals specified in this directive may delegate stated responsibilities to another person or persons unless otherwise directed.

**E. Definitions**

Maximum Security facility – is not restrictive housing and individuals in custody must be allowed more than 2 hours out of cell time daily as well as access to general population services. The physical security requirements for maximum security may vary based on the overall physical structure of the facility. Double perimeter fences, or architectural equivalents where at least two independent barriers exist between individuals in custody and the outside, are required. The security tower and/or perimeter patrol are armed and may include an alarmed perimeter intrusion detection system. The security at maximum facilities is enhanced with controlled/supervised movement at all times as well as limited, and highly supervised, access to outside recreation/activities.

Medium Security facility – the security level that is the next degree higher than minimum and requires more security/supervision than minimum but less than maximum. All individuals in custody in medium security must be housed in Double Perimeter Fence Housing as defined in Administrative Directive 05.05.105; exceptions can be approved by the Chief of Operations.

Minimum Security facility – the lowest security level in the classification system. Minimum security individuals in custody should be granted the highest amount of privilege and autonomy whenever possible (subject to operational needs/capabilities of the facility). Behavior at minimum security facilities is expected to be rule compliant and pro-social. All persons in minimum security must be housed in double perimeter fence housing unless they are screened to be housed in a single perimeter fence or less restrictive facility.

Multi-security level facility – a facility designated to house individuals in custody of multiple security levels within the facility perimeters.

**F. General Provisions**

1. Nothing herein shall be construed to limit the authority of the Director to house or transfer an individual in custody in any institution, facility or program.
2. The Office of the Transfer Coordinator shall ensure procedures for placement of individuals in custody are followed in accordance with Administrative Directive 05.05.105.
