Specific Instructions

Note: When completing this form, round your dollar amounts to the nearest whole dollar by dropping amounts less than 50 cents and increasing amounts of 50 cents or more to the next higher dollar.

Step 1: Figure your taxable receipts

Line 1 - Enter the amount you received from all sales of aviation fuel including taxes collected. Do not include purchases of aviation fuel on which you are paying Use Tax in Step 4.

Line 2 - Figure your deductions. Total deductions claimed cannot be more than total receipts on Line 1. If so, you must file a claim for credit on Form ST-70-X, Amended Aviation Fuel Sales and Use Tax Return, for the month you originally reported the sale.

2a - Enter the amount of tax you collected on your retail sales of aviation fuel.

2b - Enter the amount you collected from the aviation fuel you sold to someone who will resell it. For each sale for resale you make, the buyer must give you an Illinois certificate of resale or have a blanket certificate of resale on file with you.

2c - Enter the amount you collected from aviation fuel you sold to organizations that are exempt from paying sales tax. For each tax-exempt sale you make, you must obtain a copy of the organization's Illinois Sales Tax exemption identification number. The organization's Illinois Tax Exemption number must have been in effect on the day you made the sale.

2d - Enter the amount you collected from aviation fuel you sold that was **shipped or delivered** by you outside Illinois.

2e - Enter other deductions from your total receipts. This amount can include:

- **uncollectible debt** - Enter receipts for the sale of aviation fuel that have become worthless or uncollectible and on which tax previously has been paid. You must have charged off the uncollectible amounts as bad debt in your records in accordance with generally accepted accounting principles and have claimed the uncollectible amounts as a deduction pursuant to Section 166 of the Internal Revenue Code on your federal income tax return. Enter only the amount of uncollectible debt. Do not include the tax paid in this amount.
- **cash refunds** - Enter the amount unconditionally refunded to your customers for aviation fuel they returned and on which you have paid tax to us during the preceding return period or have now included on Step 1, Line 1 of your Form ST-70.
- **other deductions allowed by law.**

Step 2: Figure your tax on receipts

Line 4 - Enter the portion of taxable receipts from Line 3 you received from locations **within Illinois**. If you report for multiple sites, you must use Form ST-71, Multiple Site Form. The amounts listed on Form ST-71 should match the amounts reported on Form ST-70 Lines 4, 4a, 4b, and 4c.

Line 4a - Multiply the taxable receipts from locations **within Illinois** by 5 percent (0.05), the state portion of the state tax.

Line 4b - Multiply the taxable receipts from locations **within Illinois** by 1.25 percent (0.0125), the local portion of the state tax.

Line 4c - Multiply the taxable receipts by the locally imposed tax rate, if any (e.g., Home Rule Municipal sales tax, Non-Home Rule Municipal sales tax, or Home Rule County sales tax).

Note: Use the [Tax Rate Database](#) available at tax.illinois.gov to determine the current locally imposed aviation tax.

Line 5 - Enter the portion of taxable receipts from Line 3 you received from locations **outside Illinois**.

Line 5a - Multiply the taxable receipts from locations **outside Illinois** by 5 percent (0.05), the state portion of the state tax.

Line 5b - Multiply the taxable receipts from locations **outside Illinois** by 1.25 percent (0.0125), the local portion of the state tax.

Step 3: Figure your retailer's discount and net tax on receipts

Line 7 - You qualify for a discount if you file and pay your return electronically on or before the due date. Illinois law allows the discount on the 5 percent state portion of the tax for timely filing and paying sales and use tax on aviation fuel. If you qualify for the discount, multiply the sum of Lines 4a and 5a by 1.75 percent (0.0175). If you do not qualify, enter 0.

Step 4: Figure your Use Tax due on purchases of aviation fuel

Line 9 - Enter the sum of

- your cost of the aviation fuel you purchased to use from an out-of-state retailer who did not collect Illinois tax from you, and
- your cost of aviation fuel you purchased tax free to sell at retail, but instead used or consumed yourself.

Line 10 - Multiply Line 9 by 6.25 percent.

Step 5: Figure your payment due

Line 11 - Add Lines 8 and 10.

Line 12 - If you collected more tax than the amount due, enter your excess tax collected on Line 12.

Line 13 - Add Lines 11 and 12.

Line 14 - Complete Line 14 only if you made quarter-monthly (accelerated) payments. Include on this line any prior overpayment credit you used to make these payments.

Line 15 - If we have notified you that you have credit and you wish to use it towards what you owe, enter the amount you are using on Line 15.

Line 16 - Add Lines 14 and 15.

Line 17 - Subtract Line 16 from Line 13. This is the amount due.
