

Governor's Cabinet on Children and Youth: Goals for Illinois Children and Youth

September 22, 2016

Healthy: Key Indicators

We have data for 12 of our 14 key indicators, and of those 12 we can pull national comparison data for 10.

Infant mortality rate

- The rate of birth (per 1000) for teenagers aged 15 through 17
- % of pregnant women who receive prenatal care beginning in the first trimester
- Sleep-related Sudden Unexpected Infant Death (SUID) mortality per 1,000 live births
- % of mothers who smoke during pregnancy
- *% of very low birth weight (VLBW) infants born in a hospital with a Level III Neonatal Intensive Care Unit (NICU).*
- % of women who exclusively breastfed their infants for 12 weeks after giving birth

Percentage of children and youth ages 0-17 in very good or excellent health

- % of children ages 19 through 35 months, who have received the 4:2:1:3(4):3:1:4 series of routine vaccinations.
- *% of newborns screened for heritable disorders with on-time physician notification for out of range screens*
- % of children and youth, with or without a special healthcare need, who have a “medical home”
- % of children and youth with a mental or behavioral condition who receive treatment
- % of children and youth ages 1 to 17 who had a preventative dental visit in the last year.
- *% of pregnant and postpartum women screened for depression*
- *% of children and youth who are overweight or obese*
- % of children and youth who live in a household with someone who smokes
- % of children with a lead blood level of 5 mcg/dcl or greater
