The Illinois Water Authority Association (IWAA) is a non-profit, intergovernmental group of water authorities organized in the state of Illinois. The IWAA is dedicated to maintaining local authority and management of groundwater resources in the state.

The Association pursues these objectives through the exchange of ideas on groundwater management and the development of groundwater management plans. Information is reviewed not only with IWAA members, but with other groundwater groups on a state, regional and national level.

The Association is active in seeking the adoption of legislation to sustain and improve local groundwater management. The work of the IWAA benefits its member authorities and the groundwater users in the state of Illinois. These benefits accrue to private well owners, agricultural and commercial water users as well as municipal and other community water suppliers.
