

Agency	Department Of Healthcare And Family Services
Program Name	Child Support Services
Program Description	The Division of Child Support Services (DCSS) helps to establish paternity, locate non-custodial parents, establish child support through judicial or administrative processes, and enforce child support orders through income withholding orders, unemployment benefits intercepts, federal and state tax intercepts, real and personal property liens, denial of passports, suspension of driver's, hunting, and fishing licenses and other lump sum intercepts. It also assists other states to establish parentage and establish and enforce child support on behalf of their residents.
Target Population	DCSS serves families composed of Temporary Assistance to Needy Families (TANF), Medical Assistance No Grant (MANG) clients and any other Illinois resident requesting child support services (Non-Assistance {N/A} clients). Together, TANF, MANG, and N/A cases receiving these services are known as Title IV-D cases, as these services are required under Title IV-D of the federal Social Security Act. The Division also processes non IV-D cases through the State Disbursement Unit (SDU).
Activities	DCSS already provides good value in that it collects and distributes nearly \$1.4 billion dollars to primarily low and moderate income families. Child Support is a significant factor in family income support and the avoidance of mean-tested assistance. The program also provides high value in terms of expenditures with only 14 cents of every FY14 dollar spent being GRF. DCSS will continue to use process improvement and fiscal stewardship to increase value.
Goals	Illinois uses federally required Key Performance Indicators to measure the effectiveness of DCSS.
Outcome	Increase Individual and Family Stability and Self-Sufficiency
