Alexis Sturm

Director

IL Regulatory Sunset Act Review of The Illinois Professional Land Surveyor Act of 1989

April 8, 2019

**To the Honorable JB Pritzker
Governor of Illinois**

Governor Pritzker:

The Governor's Office of Management and Budget (GOMB) in collaboration with the Illinois Department of Financial and Professional Regulation (IDFPR), in compliance with the requirements set forth in the Illinois Regulatory Sunset Act (5 ILCS 80), has conducted a review of the Illinois Professional Land Surveyor Act of 1989 (225 ILCS 330), which is scheduled to sunset on January 1, 2020. The following recommendation is pursuant to this review:

The Illinois Professional Land Surveyor Act of 1989 (225 ILCS 330) should be continued with the following modifications to its existing statutory and administrative rule framework.

- Allow applicants to apply for "Licensure by Endorsement" without providing education or test information to IDFPR, if: (1) the applicant has been licensed for 10 consecutive years in another state, (2) the other state sends verification of consecutive licensure of the applicant, and (3) the applicant has never been disciplined.
- Add a definition of "Email address of record," standardizing IDFPR's initiative to become more efficient and paperless.

The examination of this Act considered the nine factors set out in Section 6 of the Illinois Regulatory Sunset Act. The following report details the criteria and data utilized to come to the above recommendation.

Very sincerely and respectfully,

Alexis Sturm
Director
Governor's Office of Management and Budget

Criteria (1) “The extent to which the agency or program has permitted qualified applicants to serve the public.”

Land surveyors are responsible for surveying land in order to determine land boundaries and gain knowledge about terrain for the purposes of construction and legal property definition. As of September 2018, there are 1,179 licensed land surveyors in Illinois, and an additional 159 land surveyors in training. All professional firms that employ land surveyors, architects, professional engineers or structural engineers are also required to register with IDFPR, if the firm is not a sole proprietorship offering services in the name of one licensed professional. There are 3,581 registered professional design firms. The table below displays the number of licensed land surveyors over the past five years:

License Type	2014	2015	2016	2017	2018
Land Surveyor	1255	1205	1223	1144	1169
Land Surveyor in Training	227	207	199	171	166

The current licensure fee structure is as follows:

Type	Fee Amount
Initial Application – Land Surveyor	\$150
Initial Application – Design Firm	\$75
Land Surveyor in Training	\$70
Renewal Fee – Land Surveyor	\$30/year
Renewal Fee – Design Firm	\$75
Restoration After Lapse	\$50 fee, plus all lapsed renewal fees

Licensed land surveyors must take an examination and meet initial education requirements, as well as continuing education requirements as set forth in Title 68, Section 1270.65 of the Illinois Administrative Code. There are no data readily available on the number of persons who would wish to participate in this profession but are prevented due to either education requirements or fee structures. Since January 2015, there have been nine disciplinary actions taken against land surveyors under the Act. These include four cease and desist orders for unlicensed practice, one civil penalty, and four refusals to renew. All 50 U.S. states license land surveyors.

Criteria (2) “The extent to which the trade, business, profession, occupation, or industry being regulated is being administered in a nondiscriminatory manner both in terms of employment and rendering of services.”

IDFPR adheres to strict guidelines and requirements established for each profession regulated by the Department. Licensing decisions are based on an applicant’s ability to meet the requirements established by statute and administrative rule. Neither race nor any other identifier is a consideration for licensure under any of the professional licenses regulated by the Department. Consequently, the Department does not collect information from applicants to disclose their race or other social identifiers that could potentially lead to the act or perception of discrimination in licensing decisions.

Criteria (3) “The extent to which the regulatory agency or program has operated in the public interest, and the extent to which its operation has been impeded or enhanced by existing statutes, procedures, and practices of any other department of state government, and any other circumstances, including budgetary resources, and personnel matters.”

IDFPR is tasked with processing applications for licenses and renewal licenses for over 1 million professionals practicing in the state of Illinois. As resources continue to be strained in the state of Illinois, the Department has adopted internal policies, sought legislative and administrative rule changes, and developed enhanced licensing processes to maintain efficiency and efficacy. Though these changes have proved to be successful, there is no substitute for the labor resources needed to maintain and improve licensing efficiencies. Over the last calendar year, IDFPR completed 80 new hires. However, in spite of the new hires, the agency ended the year with a net decrease in headcount. The agency maintains that personnel rules and laws often make it difficult to fill vacant positions in a timely manner.

Criteria (4) "The extent to which the agency running the program has recommended statutory changes to the General Assembly that would benefit the public as opposed to the persons it regulates."

In 2017, IDFPR sponsored Public Act 100-262, the purpose of which was to streamline and modernize the Agency's licensure and administrative case processes. The Act enhances the Department's e-license initiative to streamline initial licensure and renewal, as well as to allow recipients to learn the results of an administrative case more quickly so they can respond appropriately. This legislation ensures that regulated professions are able to use their time to address the needs of their clients, rather than addressing regulatory requirements. Furthermore, it benefits members of the public in that it enables the Department to more efficiently suspend the licenses of licensees determined to be in violation of rules and statutes. The agency maintains that this provides a fairer marketplace for the consumer.

In 2018, IDFPR supported Public Act 100-872, which removed the requirement that IDFPR refuse professional licenses to individuals who default on student loan debt that is guaranteed by the state. The agency believes this change removed a barrier to employment that can help people pay such debts.

Criteria (5) "The extent to which the agency or program has required the persons it regulates to report to it concerning the impact of rules and decisions of the agency or the impact of the program on the public regarding improved service, economy of service, and availability of service."

IDFPR establishes rules and makes regulatory decisions through the process established by the Joint Committee on Administrative Rules (JCAR), the administrative body responsible for approving rule proposals by state agencies. This process allows for input from industry and community stakeholders impacted by the Department's proposed changes. The Department works with lawmakers, community stakeholders and members of industry to ensure that regulations effectively protect Illinois citizens.

Criteria (6) "The extent to which persons regulated by the agency or under the program have been required to assess the problems in their industry that affect the public."

Full information on this criterion was not available at the time of this report.

Criteria (7) "The extent to which the agency or program has encouraged participation by the public in making its rules and decisions as opposed to participation solely by the persons it regulates and the extent to which such rules and decisions are consistent with statutory authority."

IDFPR adheres to the guidelines and requirements established by the Joint Committee on Administrative Rules (JCAR) and the Illinois General Assembly (ILGA) for approving rule proposals, legislative changes and internal policies. In addition, the Department adheres to the requirements established in the Illinois Open Meetings Act (5 ILCS 120).

Criteria (8) “The efficiency with which formal public complaints filed with the regulatory agency or under the program concerning persons subject to regulation have been processed to completion, by the executive director of the regulatory agencies or programs, by the Attorney General and by any other applicable department of the State government.”

IDFPR accepts public complaints via its website and by phone. The average time from a complaint being received to an investigation being opened is five days. The average time to complete an investigation varies according to how the investigation proceeds:

- Average time to close a case at Investigations: 9 months
- Average time to refer a case from Investigations to Prosecutions: 4 months
- Average time to close a case at Prosecutions: 13 months
- Average time to close a case at Prosecutions with Discipline: 35 months

These average times represent Department complaints overall. Individual complaint data for each regulated profession are not available.

Criteria (9) “The extent to which changes are necessary in the enabling laws of the agency or program to adequately comply with the factors listed in this section.”

IDFPR recommends that any proposed language for sunset extension provide for modernizations necessary to implement more streamlined and efficient regulation of this profession, which will ensure public safety and ease the burden of regulatory compliance:

- Allow applicants to apply for “Licensure by Endorsement” without providing education or test information to IDFPR, if: (1) the applicant has been licensed for 10 consecutive years in another state, (2) the other state sends verification of consecutive licensure of the applicant, and (3) the applicant has never been disciplined.
- Add a definition of “Email address of record,” standardizing IDFPR’s initiative to become more efficient and paperless.

Conclusion:

Land surveyors are responsible for the measurement and evaluation of physical topography for a variety of purposes. These include purposes such as construction and emergency management which are vital to the health, safety and welfare of Illinois citizens. They also include the determination of land boundaries for legal purposes, which are a matter of public interest. There is currently not sufficient evidence to suggest the burdens imposed by regulation outweigh the benefits to the health, safety and welfare of the people of Illinois in continuing the regulation of this profession.
