

The Department of Innovation & Technology (DoIT) delivers statewide technology, innovation and telecommunication services to state government agencies, boards and commissions as well as policy and standards development, lifecycle investment planning, enterprise solutions and privacy and security management.

DoIT is leading a digital transformation toward an enterprise approach to technology at the State of Illinois to gain efficiencies and improve service delivery for customer agencies who in turn, serve the residents of Illinois. This transformation is resulting in improved security and data protection, fewer redundant systems, more efficient technology spending and greater interagency collaboration.

DoIT also manages the Illinois Century Network (ICN), a high-speed fiber optic broadband network serving K-12 schools, institutions of higher education, public libraries, museums, research institutions, state agencies, units of local government and other entities that provide service to Illinois residents.

DoIT's foundational priorities include:

Architecture

Maximizing interoperability via service-oriented architecture and creating roadmaps

Service Management

Creating best practices for administering and maintaining technology

Program Management

Improving project governance and execution in achieving successful transformation

Data and Analytics

Establishing robust data practices and environments, turning insights into action

Information Security

Protecting the data assets of the agencies and residents we support and serve
