Watch for more details coming soon on these and other innovative procurement advances.

Website Redesign Improves Access to Information

The Department of Insurance (DOI) recently introduced their new mobile enabled public facing website that brings many positive upgrades for users, including easier navigation, consistent design among divisions, and revised expanded content. An objective brought forward at the Strategic Summit has resulted in a deliverable that provides benefits for Illinois residents, businesses and the DOI agency staff. Be sure to explore the [redesigned website](#).

ERP Progress Continues

This week marked continued progress for the State of Illinois ERP program. The IL ACTS team added IEMA and DOR to the growing list of agencies transitioning to the integrated, enterprise platform. This makes 13 agencies up and running on the new statewide solution. The ERP team is in full “hypercare” mode to answer any and all questions and assist with any issues as they may arise. More information on ERP can be found [here](#).
