## The DoIT Digest
*Volume 4 Number 12*
*April 12, 2019*

**This Week:**
- **April is Innovation and Technology Month in Illinois**
- **DoIT is Multi-Faceted – An Agency Series**
- **Revenue Continues to Offer Shared Apps**

## April is Innovation and Technology Month in Illinois

The tech industry plays a major role in our state's economy and in recruiting and retaining talent in Illinois. Governor Pritzker is proclaiming April as Innovation and Technology (IT) Month in Illinois. Link to the Proclamation Announcement to appreciate the many ways in which Illinois is innovating and collaborating to meet the need for services from our state's residents. Together, with other public, private and educational organizations, we can maintain a pipeline of talent and skill through supported education, training opportunities and work experience.

## DoIT is Multi-Faceted – An Agency Series

As DoIT continues to grow as an agency, members of our "combined family" may find it challenging to navigate the divisions and areas of responsibility to locate needed resources. This week's Digest begins a series intended to introduce (or reintroduce) "who does what" within DoIT. Results from the recent employee survey sent by our Chief of Staff, Jennifer Ricker, strongly indicated a desire for better understanding of our agency divisions at DoIT. We at DoIT, represent a multitude of technical support functions, as well as various aspects of administration. We will start the series with the offices of Human Resources and Equal Employment and Affirmative Action in our next edition. In the meantime, remember our Employee Portal is always a useful resource.

## Revenue Continues to Offer Shared Apps

The **Legislative Tracking System (LTS)** facilitates the routing of bills for review and allows users of the system to provide comments directly in the application. Each user is provided a dashboard to keep track of bills with pending deadlines. If you have any interest in the system, please email LTS.Support@illinois.govt. If legislation is not your area of interest, maybe vehicle inventory management is more your speed. The manual processes of the **Automotive Cost Reporting System (ACRS)** have been replaced by automated service reminders, scheduling requests, receipt, work order and upload capability. If interested, send requests to FMS.Support@illinois.gov. Another shared system is the **Telecom Invoice Approval (TIA) System**, which provides telecom invoices digitally with approvals performed electronically. There is opportunity to reduce paper, while providing an audit trail. For a demo or to inquire about implementation, please email TIA.Support@illinois.gov.

## DoIT FYIs and Reminders

Last call to vote for colleagues nominated for the 2019 StateScoop 50 Awards. The deadline for voting is coming soon on Monday, April 15th.

Please read the CMS Mail and Messenger Services Inter-Office Mail Reminder posted on the Employee Portal.
