

The DoIT Digest

Volume 4 Number 20
July 26, 2019

This Week:

- We are One . . . DoIT
- Electronic TSR Available August 1st
- Supplier Day

We are One . . . DoIT

One year ago, House Bill 5611 was passed unanimously by both chambers of the Illinois State Legislature, a collective nod to our enterprise approach to technology and service delivery.

During the past year, we have collaborated to provide an enhanced customer experience for the citizens of Illinois through on-line tools for seniors, job seekers, people with disabilities, those renewing or applying for professional certifications or licenses and those who maintain our roads and highways. We have shared applications that modernize and facilitate administrative functions and deployed a robust set of desktop tools that has saved money and made our daily work more efficient. Our Security team continues to build out data detection and protection tools to care for our data assets, while our data practice advances an environment for making data safely available when decisions need to be made about safety, health or education. Let's continue to work together as we move into year two of maximizing interoperability, creating best practices, improving project governance, establishing robust data practices and protecting our data assets.

Electronic TSR Available August 1st

Previous versions of the TSR will no longer be accepted as of August 1st. Link to the [E-TSR](#) and bookmark [this page](#) to stay current with Telecommunications news and review the E-TSR training session and materials. Benefit from the many enhanced features inherent in the e-version, including: setup for a local digital id, VoIP and Radio service option, tooltips/infotips and options for attaching supporting documentation. The Telecom Provisioning Team continues to offer training and refresher courses in various services via Webex and those can be requested via DoIT.Prov@illinois.gov; remember to include "Training Request" in the subject line.

Supplier Day

DoIT hosted a first ever "Supplier Day" on July 17th in Chicago. The event was an opportunity to share information about our intended direction for innovation and technology and to encourage the advancement of solution delivery with a diverse pool of suppliers. The agenda included presentations from our leadership team to articulate expectations for our vendor partnerships and foster a collaborative approach to DoIT's Foundational Priorities and Objectives. Secretary Guerrier discussed his commitment to a culture of Kaizen, or incremental improvement, as we progress towards long term efficiency and quality for the iEcosystem that we support. Link to the full [presentation](#).

DoIT FYIs and Reminders

Have you considered opting out of the paper copy of your SERS Annual Benefit Statement? You received an email from State Retirement this morning with a link to their site to select the paperless statement. Consider the benefits of eliminating a hardcopy containing your personal information and reducing printing and postage costs.
