RE: Introduction of 558 Prefix

On July 1, 1999 CMS will introduce 558 as a new prefix in the Springfield Centrex.

Continued growth in the types and quantities of services we offer to meet our clients' needs requires that we add more numbers to provide those services. You will begin seeing these numbers assigned on orders in early July.

Centrex station-to-station calls to 558 numbers will be placed as a five-digit call, just like any other intra-system (Centrex) call. For example, to call 558-2345, users will dial 8-2345. This new 558 prefix joins 782, 263, 524, 785, 786 (partial), 557, as valid Springfield Centrex numbers

Should you have any questions, please contact your Division of Telecommunications Agency Liaison.
