

## Citrix Workspace Update

While working from home and utilizing Citrix Remote Access, if you are presented with a Citrix Workspace upgrade available message, please **install** the upgrade.

Your dialog box may not be identical to the one below, but the message will be similar....

The current version for the upgrade is Citrix Workspace app 2006.1 and may present as Version: 20.6.0.38(2006.1)

If you experience any issues with the installation of the update, or after installing the update you should un-install the software completely and follow the installation instructions on our RemoteWork.Illinois.gov website to reinstall the Citrix Workspace Software.
