**Planning Process for In-Center Hemodialysis
Category of Service**

For the In-Center Hemodialysis category of service:

1. The planning areas are the designated Health Service Areas
2. The utilization standard is a facility must operate at a minimum of 80 percent utilization rate, assuming three patient shifts per day per renal dialysis station operating six days a week.

**Inventory of Health Care Facilities and Services
and Need Determinations**

3. The need for end stage renal disease (ESRD) stations is calculated for a five-year period from the base year. The need for additional treatment stations is determined utilizing the following methodologies:
 - a. Five-year Projection:
 - i. Establish a minimum institutional dialysis rate by dividing the total number of institutional dialysis patients in the base year by the State base year estimated population in thousands and multiply the result by .6 (60%).
 - ii. Determine each planning area's experienced institutional dialysis rate by dividing the number of patients receiving dialysis in the base year by the planning area estimated population in thousands for the base year.
 - iii. Multiply each planning area's projected population in thousands five (5) years from the base year by the greater of the minimum institutional dialysis rate or the experienced institutional dialysis rate for the planning area to determine the estimated number of institutional dialysis patients.
 - iv. Multiply the planning area's estimated number of institutional dialysis patients by a factor of 1.33 (estimated increase in prevalence) to determine the projected number of institutional dialysis patients in the planning area for the projected year.
 - v. Multiply the projected number of institutional dialysis patients by 156 to determine the projected number of institutional procedures
 - vi. Divide the projected number of institutional procedures by 749 to determine the projected number of stations needed for the projected year.
 - vii. Subtract the number of existing stations from the projected number of needed stations to determine the excess or additional stations needed.

SECTION C

ALTERNATIVE HEALTH CARE MODELS

Planning Process for Post-Surgical Recovery Care Center Models

**The Post-Surgical Recovery Care Center Model is closed.
No additional applications will be accepted.**

1. The planning areas for Post-Surgical Recovery Care Center Models:
 - 1) the City of Chicago;
 - 2) Cook County outside the City of Chicago;
 - 3) Kane, Lake, and McHenry Counties;
 - 4) Municipalities with a population greater than 50,000 not located in the areas described in subsections (a)(1), (2), and (3) of this Section. Municipalities means geographic areas designated as Metropolitan Statistical Area by the Bureau of the Census; and
 - 5) Rural areas, i.e., all areas exclusive of subsections (a)(1), (2), (3), and (4) of this Section.
2. Occupancy Targets: Beds should have an occupancy of 80% or higher
3. Need Determination: There shall be no more than a total of twelve postsurgical recovery care center alternative health care models in the demonstration program, located as follows:
 - 1) Two in the City of Chicago.
 - 2) Two in Cook County outside the City of Chicago. At least one of these shall be owned or operated by a hospital devoted exclusively to caring for children.
 - 3) Two in Kane, Lake and McHenry Counties.
 - 4) Four in municipalities (as defined in subsection (a)(4)), three of which shall be owned or operated by hospitals, at least two of which shall be located in counties with a population of less than 175,000, according to the most recent decennial census for which data are available, and one of which shall be owned or operated by an ambulatory surgical treatment center.
 - 5) Two in rural areas (as defined in subsection (a)(5)), both of which shall be owned or operated by hospitals. (Section 30(a-5) of the Alternative Health Care Delivery Act [210 ILCS 3/30(a-5)])

Inventory of Health Care Facilities and Services and Need Determinations

**Alternative Health Care Models
Post-Surgical Recovery Care Center Models**

PLANNING AREA: City of Chicago					
Need Determination: There shall be no more than a total of 12 postsurgical recovery care center alternative health care models in the demonstration program, 2 in the City of Chicago.					
City	Name of Facility	Permit #	Date of Initial License	Number of Beds	Comments
	No models have been approved.				

PLANNING AREA: Cook County Outside City of Chicago					
Need Determination: Two in Cook County outside the City of Chicago. At least one of these shall be owned or operated by a hospital devoted exclusively to caring for children.					
City	Name of Facility	Permit #	Date of Initial License	Number of Beds	Comments
	No models have been approved.				

PLANNING AREA: DuPage, Kane, Lake, McHenry and Will Counties					
Need Determination: Two in Kane, Lake and McHenry Counties.					
City	Name of Facility	Permit #	Date of Initial License	Number of Beds	Comments
St. Charles Mokena	Valley Medical Inn Southwest Recovery Center – Mokena	95-125 06-020	10/10/1997	9 beds 4 beds TOTAL 13 beds	

Inventory of Health Care Facilities and Services and Need Determinations

PLANNING AREA: Municipalities with population exceeding 50,000 not included in areas above Need Determination: Four, three of which shall be owned or operated by hospitals, at least two of which shall be located in counties with a population of less than 175,000, and one of which shall be owned or operated by an ambulatory surgical treatment center.					
City	Name of Facility	Permit #	Date of Initial License	Number of Beds	Comments
Champaign	Carle Foundation Hospital	95-082	5/21/1997	11 beds	
DeKalb	Kishwaukee Community Hospital	98-117		4 beds
