10-049

Dear Mr. Constantino,

As a physician offering radiation therapy services in Will County, I am writing to you regarding the proposed University of Chicago Cancer Center at Silver Cross Hospital.

Hoffman Cancer Center has been offering services to the community as well as referrals from University Hospitals. Patients have established a trust with the physicians and staff for over 25 years. We offer state of the art technology, using a linear accelerator equipped with Image Guided Radiotherapy (IGRT) and Digital Portal Filming. We provide a variety of treatment options including Intensity Modulated Radiation Therapy (IMRT), brachytherapy, partial breast irradiation, stereotactic radio surgery and prostate seed implants.

A new center would be a duplication of services already available.

Respectfully,

  
S. Luka, M.D.

RE: Opposition of the University of Chicago Cancer Center  
At Silver Cross Hospital- New Lenox (Project # 10-049)

Dear Mr. Constantino,

My name is Dr. Farouk Asaad, I am a family physician and a cancer survivor. In 2006 I was diagnosed with rectal cancer. I, being a physician with medical background and my life was on line I had to make sure that I receive the best treatment available. After considering all my options and after consultations with oncologists at Northwestern University, who ironically recommended that I get my radiation therapy treatment at The Hoffman Cancer Center in Joliet, a private free standing facility across from Silver Cross Hospital. I opted to receive my treatment there. Obviously I made the right decision. I was treated with the most advanced state of the art equipment and cared for by highly knowledgeable, friendly and compassionate staff.

The Hoffman Cancer Center has been offering radiation therapy treatment for Will county residents and beyond for over 25 years, it is across the street from Silver Cross Hospital and about 2 miles away from the proposed UCMC/SCH-New Lenox proposed project. This facility has the most advanced Linear Accelerator with the state of the art Image Guided Radiotherapy (IGRT), it also offers Radio Surgery and prostate implants. The Center employs 2 PhD experienced Physicists, a dosimetrist and several highly qualified radiation therapy technicians. It would certainly be unnecessary expense and duplication of service if this project is approved.

Sincerely,

Farouk B. Asaad, MD

Re: The University of Chicago Cancer Center at Silver Cross Hospital – New Lenox (Project #10-049)

Dear Mr. Constantino:

I am writing to object to the planned cancer center by the University of Chicago and Silver Cross Hospital, which would result in the replacement of the Hoffman Cancer Center. The Hoffman Cancer Center has offered state-of-the-art treatment for many years and has been a reliable center to which I can refer patients and rely on excellent radiotherapy.

As a former faculty member of Northwestern University Feinberg School of Medicine and as a current faculty member of Rush University Medical School, I have a longstanding relationship with the Hoffman Cancer Center. We will often plan treatments together, allowing patients to receive most of, or all of, their therapy in a comfortable, caring center close to home. Patients have an identifiable physician, upon whom they can rely. The radiation therapy facility is new and up-to-date. The equipment there is equal to most large radiation therapy facilities in the area and the physics support enviable. The physicians consult the universities frequently in complicated or controversial areas and, when appropriate, refer those individuals for more complicated treatments. They often avail themselves of technologies available at the university medical centers.

In response to the letter from Dr. Weichelsbaum from the University of Chicago, the proposed technology for radiotherapy is attractive, but not necessarily the most appropriate for many radiotherapy treatments. In fact, the cost of treatment will increase, without justification or superiority in the medical literature. The novel treatments referred to his letter are commonly use in the community and not all were developed at the University of Chicago. The physicians at the Hoffman Cancer Center have a good working relationship with other physicians in the area, imperative in a world of multidisciplinary cancer care. This may not happen with new physicians in the area that may appear to be a threat to their medical practices.

The Hoffman Cancer Center is a well-established, respected entity in the area. Many physicians in Chicago refer their patients who live in the area there. I have personally reviewed treatment plans and find no difference to what I would deliver with "superior" technology. I have much respect for the work done by the University of Chicago. However, I only see the cost of cancer care increasing with this proposed facility.

Sincerely yours,

Krystyna D. Kiel, MD

Dear Mr. Constantino:

It has come to my attention that a radiation facility has been proposed by the University of Chicago. It has been proposed that such a center would provide the residents of the southwest suburbs access to the latest treatment techniques. I have been servicing the residents in gynecologic oncology of the southwest suburbs for over 20 years. The radiation facility offered by Joliet Radiation Oncology and Hoffman Cancer Center by Dr. Assad, offers similar services as the university centers and larger hospitals in the area. Many times when patients who live in the Joliet area are unable to be treated at Rush, we have referred them to Dr. Assad for gynecologic oncology radiation.

Our plan is to continue to refer patients to this facility since we have been very pleased with the clinical results. It is my impression that the proposed center by the University of Chicago will duplicate services already available.

Sincerely,

RE: Project 10-049 The University of Chicago Cancer Center at Silver Cross Hospital,  
New Lenox.

September 9, 2010

Dear Mr. Constantino,

I have been made aware of the plans of Silver Cross Hospital and the University of Chicago to open a joint cancer center at their new campus in New Lenox Illinois and their request for a certificate of need.

I respectfully submit my voice in opposition to this plan as it will move valuable health service lines out of the Joliet community particularly in an area that sees great need. Additionally, the community in which the proposed joint venture is to establish itself already receives excellent cancer care from the existing medical community. This joint venture would over-saturate the market place leading to over use and an increased cost of medical services.

Thank you for your consideration,

Paul Crossan M.D.

HEALTH FACILITIES &  
SERVICES REVIEW BOARD

To Whom It May Concern:

In 1971 I began my medical career as a Family Practitioner at Hedges Clinic in Frankfort, IL. and have been there ever since. Over the years I have referred essentially all of the patients needing "cancer care" to local physicians who offer such services. Almost all of those have been to the Hoffman Cancer Care Center in Joliet, Illinois. I, and they, have never been disappointed.

There are two reasons for this. First is the competence of the physicians and health professionals involved locally. Second, and most importantly, the essentially 100% satisfaction expressed by the patients; never have I had a patient express a negative comment relative to the service and care they had received. All of these patients were treated by physicians at the Hoffman Cancer Center. However, they universally lauded the care they received from Dr. Asaad.

Personally, about three years ago I became disabled with cancer. I couldn't imagine any other physician I would entrust my care to other than Dr. Asaad. She treated me with her usual CARING and expertise and I'm still here and happy. What more could anyone ask?

It appears that some entities at Silver Cross Hospital in Joliet want to establish a University of Chicago "affiliated-managed-controlled" cancer treatment center in New Lenox, IL. with the possible/probable elimination of the excellent services already provided to the citizens of Will County by the local physicians who, for years, have achieved and maintained a caring and appreciated contribution to the community.

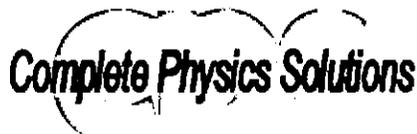

I have never involved myself in hospital "politics"...I just make "rounds", see and treat patients. Yet it seems to me that an elimination of the ONGOING cancer care facilities would be a huge mistake. If this is allowed to go through, I will follow Dr. Asaad for the treatment of my cancer wherever she may go. She KNOWS me as she does so many of her patients. To put those patients into the "turmoil" of medical system instead of an established local and time-proven patient-physician relationship would be inexcusable.

Please consider this opinion from someone who has "seen it from both sides"

Sincerely,

  
Robert T. Moll M.D.

Re: **Opposition** of the University of Chicago Cancer Center at Silver Cross Hospital-New Lenox (Project # 10-049) due to a duplication of service with the Hoffman Cancer Center.

Dear Mr. Constantino,

I am writing this letter to declare my opposition to the University of Chicago Cancer Center at Silver Cross Hospital- New Lenox, Project # 10-049. The addition of this center would lead to a duplication of services with the Hoffman Cancer Center located just miles from the proposed site of the new center. The Hoffman Cancer Center has provided the people of Will County with quality, technologically advanced Radiation Oncology treatments for 25 years.

The Hoffman Cancer Center is equipped with some of the most advanced technology in the field of Radiation Oncology. In the day to day operations, the Hoffman Cancer Center's advanced equipment gives Dr Asaad the opportunity to offer her patients state of the art radiation treatments such as:

Intensity Modulated Radiotherapy (IMRT)

Image Guided Radiotherapy (IGRT) including Volumetric Imaging for soft tissue alignment

Stereotactic RadioSurgery and RadioTherapy with Dynamic Conformal Arcs from the smallest Dynamic MLC available on the market.

High Dose Rate Brachytherapy (HDR) including Partial Breast Irradiation (PBI) with Mammosite, Contoura and Savi devices, Gynecological HDR and Lung HDR.

Low Dose Rate Brachytherapy including Gynecological Cases and Prostate Seed Implants for Prostate Cancer

The Staff at the Hoffman Cancer are some of the most caring and some of the most qualified individuals in the field.

The Therapists at the center are all Board Certified Radiation Therapists and are licensed and registered by the Illinois Emergency Management Agency. (IEMA)

The Dosimetrist at the Hoffman Cancer Center is a Board Certified Medical Dosimetrist, Board Certified by the American Association of Medical Dosimetrists.

All of the Medical Physicists are registered through IEMA and recognized as Therapeutic Radiological Physicists by the State of Illinois. The Physicists are contracted through a consulting firm owned by

September 7, 2010

Physicists that have earned Masters Degrees and/or PhD's specifically in the field of Medical Physics. Several Physicists from this group are Board Certified by the American Board of Radiology in Radiological Physics.

The Hoffman Cancer Center offers some of the most advanced treatment options by the most qualified professional staff members available. Allowing another group the opportunity to build an identical center that offers duplicate services just a few miles away is simply a waste of money and resources for the people of Will County. Times are tough, and with the present economic conditions of the State, and the County, millions of dollars would be spent with no new or added Radiation Oncology services. A main responsibility of your Review Board is to prevent such replications of services to be permitted and to protect the overall interests of your constituents. I hope you will stand true to the original intent of this Board and not grant permission to build this new, duplicate center.

Mark Pankuch PhD, DABR  
Medical Physicist

Dear Mr. Constantino:

I am writing in regards to the establishment of the University of Chicago-Silver Cross Cancer Center in New Lenox, Illinois. I was born and raised in Joliet, Illinois and when cancer struck my family the second time within two years, we traveled the nation in search of the best treatment center. After arriving at Sloan-Kettering in New York City, we were informed that while we were welcome to stay there, we could receive outstanding health care at home through Dr. Pundaleeka. In my opinion, it will be a travesty if my friends and neighbors were being referred in a different direction when such excellent care has been in existence within Will County for the past 30 years.

Thank you for your time and consideration.

HEALTH FACILITIES &  
SERVICES REVIEW BOARD

Dear Mr. Constantino and Board Members,

I write to you today on behalf of my colleague Sarode Pundaleeka, MD and Joliet Oncology-Hematology Associates. I am a Family Physician who has been practicing primary care in Will County for over 18 years. Over this period of time I have worked with Dr. Pundaleeka and his associates at JOHA extensively. We have shared hundreds of patients in common.

I would like to share with you my experiences with the physicians at JOHA. They are exceptionally astute diagnosticians and treatment providers, providing the highest quality of medical care for hematology and oncology patients and their families. Whether I have been in need of an urgent medical consultation in a hospitalized patient, an office-based consultation, or simply a "curbside" consultation over the phone they have always provided the best of service for me and my patients in an exceptionally timely manner. The patients themselves have never had anything but positive things to say regarding the care by these physicians.

JOHA is involved in numerous clinical trials and the physicians are up-to-date on all aspects of diagnosis and treatment of cancer and other hematological diseases. They operate a beautiful facility which I have had the privilege of touring. It is a state-of-the-art facility that is bright and cheerful and has about any amenity a patient could hope for. The staff is friendly. It is very spacious and has the capacity to treat a large number of patients. It is easily accessible for patients.

It has come to my attention recently that Dr. Pundaleeka and JOHA may have been mistreated by a local hospital. The allegations are that this hospital has attempted to stop Dr. Pundaleeka and JOHA from practicing medicine in the best manner in which they see fit. These allegations are unprofessional and shameful at best, and possibly illegal at worst. I have no reason to doubt the veracity of what Dr. Pundaleeka has alleged.

It seems unfortunately obvious to me that an attempt to bring the University of Chicago name to Will County without the inclusion of these fine physicians is a marketing ploy such as we are seeing commonly in many community hospitals. It is especially worrisome that these doctors may have been actively thwarted from pursuing such a relationship themselves by a hospital that is supposed to be looking out for the good of the community. While I appreciate the community resources that these hospitals provide, if they really have an interest in patient care (rather than their bottom-line) as

their first priority, then they won't try to exclude extremely competent physicians from practicing in their service areas. A policy of inclusion would seem to make more sense.

It is important to remember that what constitutes actual medical care is a competent physician and his or her medical colleagues. It takes a doctor to diagnose an illness, a doctor to put his or her hands onto the patient and examine them, a doctor to order the proper treatment, a doctor to inform and console a patient. An insurance company does not provide health care. A corporate entity running a health care facility does not provide caring. What patients in Will County really need is a continuation of access to the best of these physicians, not just access to a new office building with a new corporate logo on the door. If there is thought being given to what patients really need, then "good doctors" is the answer. Any attempt by large entities to restrict competent, independent physicians from practicing their profession in the manner in which they see fit is wrong. It is unfair to physicians and deleterious to patients.

Finally, I would like to note that the character of Dr. Pundaleeka has been exemplary over the years. What he has developed intellectually is rivaled only by his good manners and kindness to physicians and patients alike.

If I can be of any further service to you in decisions regarding Dr. Pundaleeka or JOHA, please feel free to contact me at any time.

Best Regards,

10-049

I don't think Silver Cross needs an outpatient cancer center when we already have a great one in Joliet. My husband has been a cancer patient of Dr. Pundaleeka at Joha for 4 years. We are very lucky to have such a state of the art clinic. Dr. Pundaleeka cares for the patients who are served at Joha.

Joha is located in an area that is easy to get to. Whether you live on the east side or New Lenox your drive isn't as long as going to Chicago.

Silver Cross and the University are only interested in money. According to the article in the Herald News, they are each going to get a share financially. It sounds like all they care about is how much money each one is going to make.

The University was affiliated with Joha when we first started there. What happened that they went to Silver Cross? Two guesses. I don't think we need another cancer center so close to Joha.

Joha is well equipped to help its patients in every way. Don't ruin a good thing.

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project #10-049)

Dear Mr. Constantino:

I am a General Surgeon at Silver Cross Hospital retired July 1, 2010 after 35 years. I was Chief of Staff from 2007-2009. I have shared numerous cancer patients with Dr. Asaad at the Hoffman Cancer Center with excellent care and patients' satisfaction for more than 25 years.

In the early 1980s we started offering minimal invasive breast conserving surgery to our breast cancer patients and Dr. Asaad was a major part of it. Since then she has kept up with the latest in cancer radiation therapy and state of the art equipment. She provides very personalized patient care with very caring and optimistic approach, which all our cancer patients need.

In my opinion new University of Chicago Cancer Center will be duplication of this facility. To AVOID duplication University of Chicago Cancer Center should incorporate Hoffman Cancer Center and Dr. Asaad in one center.

Sincerely,

  
Umesh Sharma, MD, FACS M.D.

September 13<sup>th</sup>, 2010

Dear Sir,

I feel I need to comment on the proposal, by Silver Cross Hospital and the University of Chicago, for a cancer treatment center. Several articles have appeared in the local newspapers regarding the proposal for this cancer treatment center.

**If I had read these article 18 months ago I would have said WOW that's just what we need for the area.**

After reading the article I said WHY?

**Why, because we already have all the cancer services already available locally.**

How do I know? I am a cancer survivor.

Where did I get my treatment?

**I got my treatment at the Hoffman Center and I found out about the Hoffman Center through the handbook I obtained from the Silver Cross Hospital.**

The recent articles in the newspapers were very **misleading**. They said this new partnership could **now** offer cancer treatment locally, indicating that this was not possible at the present time. The local cancer treatment center already treating local people was never mentioned.

For people like me, unless you need treatment for cancer, you would not realize that **cancer treatments are already available locally.**

Is there a need for cancer treatments to be done locally? Absolutely! They have been done through the **HOFFMAN CENTER** for over 20 years.

**Please consider the need for a cancer treatment center, especially the center that is already in place locally.**

Regards,

*Pauline Bray*

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project#10-049)

Dear Mr. Constantino:

I have a friend/<sup>wife</sup> family member who is/was  
I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest  
objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have  
here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where ~~X~~<sup>she</sup> received ~~my~~<sup>her</sup>  
treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly  
and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication  
of service.

Sincerely,

HEALTH FACILITIES &  
SERVICES REVIEW BOARD

Karen Hall  
Hearing Officer  
II. Health Facilities Planning Board  
525 W. Jefferson St.  
Springfield, Il. 62761

Dear Ms. Hall,

My husband & I fully intended to attend the hearing which Dr. Pundaleeka had requested, but had conflicting appointments. We both have dealt with cancer. Dr. Pundaleeka, with his knowledge, saved my husband's life 15 years ago. At that time Dr. Pundaleeka and his group were highly recommended and for good reason. They had the best facility with the best doctors and a very caring staff.

Recently, when I developed breast cancer, Dr. Pundaleeka and his group, who by this time had grown and expanded into a state of the art facility, was the only place I chose to be treated. I knew whatever lie ahead for me, my treatment would be the best and I would be comfortable with my decision to be cared for there.

My husband & I are both well now. I have follow up care with Dr. Pundaleeka and he has made sure that my cancer was checked and ordered a test to make sure I was a low risk for return of this disease. He always goes the extra mile to assure you of your prognosis and how they will handle it, to make you as comfortable as possible.

Joliet Oncology & Hematology is a state of the art facility with all the equipment any large hospital in Chicago has. They even have their own research department. Anyone in Joliet and the surrounding area need not go any further than JOHA. They don't have to deal with a long trip, a lot of traffic, or difficult parking.

Dr. Pundaleeka came to this country with nothing, got his education, and built a strong and lasting rapport with colleagues and patients, thus making JOHA the premier group that it is. He does not leave anything to chance and works 16 hours a day. He staffs his office with people like himself who care for each person as if they were family.

Over the years Dr. Pundaleeka has been sidetracked each time he has tried to expand his care to the east side of Joliet. These politically-connected and money hungry people are making a large mistake blocking Dr. Pundaleeka by bringing in a Chicago group to work out of the new Silvercross Hospital. Even though this hospital will be located in New Lenox, it will always be a Joliet hospital and should be staffed by the best oncology group in Joliet, JOHA. No one from Chicago is going to be as caring and professional as JOHA.

For 15 years Dr. Pundaleeka has put up with numerous antics to stifle his progress, but has stayed the ethical person and gentleman that he is. It is time that he speak up, and with the backing of people like ourselves, we beg that you do not let "strangers" take the place where this wonderful group should be. We have the best - no need for the rest!

Respectfully,

*Harold Lockhart*  
*Gene Lockhart*

I attended a public hearing in New Lenox Ill and could not believe how biased the clerk was! Dr. Pundaleeka called for the meeting. University of Chicago people spoke, Pawlik from Silver Cross Hospital and various others spoke. They were allowed to speak for a long period of time. When Dr. Pundaleeka got up to speak - after about two minutes - was cut off rudely by the clerk. As the meeting went on it was apparent how she cut off people opposed but let the ones for it continue speaking. Dr. Pundaleeka and Pawlik should have had equal time to speak and then let everyone speak after. Dr. Pundaleeka who called the meeting wasn't even allowed to voice his opinion. After hearing how Silver Cross basically "kicked people to the curb" to make room for the new. I ask "How can you trust someone dealing with your life when you can't trust someone socially or in business?"

HEALTH FACILITIES &  
SERVICES REVIEW BOARD

Karen Hall, Hearing Officer  
Illinois Health Facilities Planning Board  
525 W. Jefferson St.  
Springfield, IL 62761

Ms. Hall;

The difficult question of whether an additional cancer treatment facility is needed in the Joliet area is before the Illinois Health Facilities Planning Board. I wish to comment on this question based on my experience as a cancer survivor.

In July 2009, I was diagnosed with pancreatic cancer. As you know, pancreatic cancer is a very aggressive form of cancer. I was referred to a surgeon outside of the Joliet area by a prominent Joliet internist. After surgery, I was referred to an oncologist, again away from Joliet, to undergo chemo and radiation therapy. The oncologist, after review of my situation, suggested I could get the same quality therapy in Joliet as he would give. He referred me to Joliet Oncology - Hematology Associates Ltd.

I met with Dr. Sarode Pundaleeka within a few days and treatment began almost immediately. I underwent three weeks of weekly treatments, six weeks of continuous chemotherapy and daily radiation therapy, followed by nine more weeks of weekly treatments. Since the treatments ended in March, I have had no further signs of cancer.

An article in the September 11, 2010, Herald News makes several points both for and against the new cancer facility proposed by Silver Cross Hospital and the University of Chicago.

The article infers "big city" expertise would now be available to patients in the Joliet area. I would suggest the JOHA staff is as competent as any staff would be at the new facility. In all probability, the new staff would include local members, plus personnel who would divide their time between the University of Chicago and the local facility. Part time staffing of some personnel, could lead to appointment and treatment delays.

Generally, new technology and expertise developed in university settings is quickly adopted in everyday practice by other treatment facilities. The suggestion a new facility, operated by Silver Cross and the University of Chicago, would be far superior to any existing Joliet facility seems blatantly false and insulting.

It is true a new facility will create new employment. Trade union jobs will end when the facility construction is complete. Medical facility staffing positions will be created, but any facilities closed in the area would cause a loss of jobs and empty buildings.

The decision to allow or disallow the new facility should turn on the question of whether it is needed. My experience suggests that perhaps it is not. I was able to see an oncologist almost immediately after my referral and treatment began without delay, with appointments scheduled at my convenience. Such flexibility suggests JOHA was not operating at capacity.

Thank you:

  
Richard D. Ward

Springfield, IL 62761

Dear Mr. Constantino,

There is no real need to approve the application for a University of Chicago Oncology assessment/treatment center at the Silver Cross replacement hospital in New Lenox, IL. The current Hoffman Center has provided superior treatment for patients for many years and approval of another treatment center will provide redundant services and will only add confusion to an already complex medical care system. The current proposal will bring the "name" of the University of Chicago, however there is no plan in place to bring a significant number of experienced physicians to this site. Let us not fool ourselves or the naïve public. This proposed site will be a satellite for referring most if not all cancer patients requiring surgery to the Hyde Park facility. This is not fair to the patients and seems so inappropriate in an era of openness and accountability.

My wife was diagnosed with cancer in October of 2009 at Silver Cross and the availability of quality chemo-therapy and radiation oncology at the Hoffman Center at Silver Cross was critical to her survival. If we had had to travel to Chicago on a daily basis for the six weeks of chemo-therapy and radiation treatments I know it would have put much more extreme pressure on my wife and I shudder to think what may have occurred. Having this high quality treatment available locally was a godsend. She also was referred to the "best" surgeon for surgery on the esophagus which was not at the University of Chicago.

There is no doubt in my mind that approval of this application with U of C and Silver Cross Hospital will benefit few people and will not enhance the medical care environment of the greater Joliet area. The executives and administrators of both institutions may benefit in terms of bonuses, etc. but I don't see the patients being the primary beneficiary.

Cordially,

  
Nathan R. Keith, Ed. D.

Dear Mr. Constantino,

I was shocked to read/hear that Dr. Asaad's contract had not been approved!

My recent bout with cancer was made so much more manageable because of the care I received at the Hoffman Cancer Center.

The Doctor & staff were always available, knowledgeable & compassionate during this difficult time. The convenience of local services made such a big difference in time & transportation.

Please reconsider your decision to cut the Hoffman Cancer Center out of your plans.

Sincerely,  
Nancy Jones

I was diagnosed with prostate cancer in April of 2007. The cancer was rated at seven on the Gleason scale. Treatment was determined to be as follows. Hormone therapy for 6 months by Dr. Lewis. Seed implants by Drs. Lewis + Assad. Twenty five sessions of radiation therapy by Dr. Assad cancer center.

The people at the cancer center could not have been nicer nor more effective.

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project#10-049)

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

September 13<sup>th</sup>, 2010

Dear Sir,

I feel I need to comment on the proposal, by Silver Cross Hospital and the University of Chicago, for a cancer treatment center. Several articles have appeared in the local newspapers regarding the proposal for this cancer treatment center.

**If I had read these article 18 months ago I would have said WOW that's just what we need for the area.**

After reading the article I said WHY?

**Why, because we already have all the cancer services already available locally.**

How do I know? I am a cancer survivor.

Where did I get my treatment?

**I got my treatment at the Hoffman Center and I found out about the Hoffman Center through the handbook I obtained from the Silver Cross Hospital.**

The recent articles in the newspapers were very **misleading**. They said this new partnership could **now** offer cancer treatment locally, indicating that this was not possible at the present time. The local cancer treatment center already treating local people was never mentioned.

For people like me, unless you need treatment for cancer, you would not realize that **cancer treatments are already available locally.**

Is there a need for cancer treatments to be done locally? Absolutely! They have been done through the **HOFFMAN CENTER** for over 20 years.

**Please consider the need for a cancer treatment center, especially the center that is already in place locally.**

Regards,

*Pauline Bray*

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project#10-049)

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

Name:

David L. Simmons

RE: Opposition of the University of Chicago Cancer Center at Silver  
Cross Hospital-New Lenox (Project # 10-049)

Dear Mr. Constantino,

I am a resident of Will County and I am writing in **opposition** of the proposed University of Chicago – Silver Cross Cancer Center in New Lenox. I am satisfied with the cancer services already available in Will County.

I hope that you will NOT approve the proposed Cancer Center in New Lenox. Thank you for your consideration.

Sincerely,

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project#10-049)

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

Sincerely,

HEALTH FACILITIES &  
SERVICES REVIEW BOARD

Dear Mr. Constantino,

I am not a resident of Will County as I reside in LaSalle County, Illinois. I am a cancer survivor thanks to Dr. Salwa Asaad and the Hoffman Cancer Center in Joliet, Illinois. I am writing this letter to express my strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox.

The Hoffman Cancer Center serves not only Will County patients but also the patients in surrounding counties. They have state of the art equipment and a dedicated, highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service which is already administered at the Hoffman Cancer Center.

Sincerely,

Michael F. Ryan

Address: 404 Kirkcaldie Road, New Lenox, IL 60451

*The care & treatment I received from Dr. Assad and his staff was superb. I could not have received better care anywhere. I was referred to Dr. Assad from my oncologist & surgeon at Northwestern's Lynn Sage Cancer Center for radiation treatment for breast cancer. It would be a tragedy for the community to lose Dr. Assad & Hoffman Cancer Center and the wonderful professional care and service they provide.*

Comments: Dr. Asaad is the best of the best. Her facility and faculty are second to none. I wouldn't be alive today if it wasn't for her care. Stop wasting our tax money. Stop the corruption. No new facility could ever compare to the Hoffman Cancer Center. They have it all and more.

We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

September 29, 2010

Dear Mr. Constantino,

I have been a patient of the Hoffman Cancer Center and Dr. Salwa Asaad. I received radiation therapy for my treatment of breast cancer. Will County has been fortunate to have the services of both Dr. Asaad and the Hoffman Cancer Center for over twenty-five years.

Dr. Asaad is a dedicated, compassionate doctor who truly cares for her patients. Those who work with her also have those same qualities.

I am very disappointed that Silver Cross Hospital does not recognize the excellent care and facilities that Dr. Asaad has provided. During my radiation

treatments, I did not have to travel to Chicago or farther to receive high quality cancer care. I consider myself lucky to have been treated by Dr. Asaad and her staff. Her dedication is not always found in every hospital. It would be a shame to lose such a wonderful doctor.

Sincerely,  
Georgene Lange

X Hoffman Cancer Center which found my breast  
Cancer and I received radiation. If it wasn't  
Dr. Asaad who caught it at "stage 0" I would have  
had more problems. This is the only place in  
Will County that provides service - we would have to  
drive further to U.S.C. Please continue working w/Dr  
Asaad At Hoffman Cancer Center. We can't lose her  
Center in our area

Allowing Silver Cross to partner with the University of Chicago would be a great disservice to the community. As a former patient of the U of C, I was never treated with respect. I would constantly have to fight with billing department over charges for services that I never recieved. I was double and triplerbilled for the same services. They had insurance fraud down to an art. Please do not let the bureaucratic nightmare that is the University of Chicago into Silver Cross Hospital.

Dear Mr. Constantino,

I am a resident of Will County and I am writing in opposition of the proposed University of Chicago - Silver Cross Cancer Center in New Lenox. I am satisfied with the cancer services already available in Will County.

I hope that you will NOT approve the proposed Cancer Center in New Lenox. Thank you for your consideration.

Sincerely,

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project#10-049)

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

*Don't know if this will help,  
but we tried.*

Dear Ms. Hall:

The first thing that struck me while reading the article in the Herald News regarding bringing a new cancer facility to Joliet was the statement that Silver Cross is a not-for-profit facility. Really? They spent how many millions of dollars on the new Professional Building, the parking deck, upgrading several floors of the hospital, bringing in new doctors, only to move a few years later. I think that shows really poor leadership and planning and a waste of donations and tax payer money. Does that mean as long as you spend money as fast as you take it in you are "not-for-profit." How irresponsible.

Secondly, I am not a cancer victim, but I am a patient of Dr. Pundaleeka's. This man truly cares about his patients; physically, emotionally, and mentally. He treats every patient with respect. I have my blood tested, talk with his PA about every single detail of my medical status since my previous visit, up to and including changing vitamins, coffee consumption, exercise, etc. By the time Dr. Pundaleeka walks in and talks with me, he usually has my blood test results and we discuss any and all issues I might have. He set up a mammogram and a colonoscopy for me because I am 52 and have not had either done in several years. My regular physician would never follow up like this.

I think his Mission Statement says it all: Joliet Oncology-Hematology Associates, Ltd. strives to continually improve the quality of life of our cancer patients; to provide patients with the highest quality of cancer care in an open supportive and compassionate environment; to support families throughout the illness-wellness continuum; to provide advanced oncology services through offering academic research protocols in the community; to serve as a liaison for the community in cancer prevention and early detection programs; and to establish our office as a community research facility.

However, Dr. Pundaleeka is also a hematologist. I have a rare inherited blood clotting disorder. I have also had hybrid gastric bypass surgery, the long-term complications of which have now only come to the forefront now that many of us are over 5 years post-op. I have had many experiences with Silver Cross, none of them good. It took 5 days for the hospital lab to return a skin biopsy on my father who was in critical conditions from being given a beta blocker at 80 years old, and he developed Stevens-Johnson syndrome. Five days for a simple lab test. I've also had some very bad experiences with the University of Chicago, even though as a Scientist at Argonne National Laboratory, they were actually my employer for over 20 years and I was part of the best and brightest program. The bigger the organization, the more red tape involved and the less each patient can be treated as an individual human being.

***I truly hope that the New Lenox board will not pass this proposal simply because of tax revenue. There are some things more important than money, and if you ever are in the position of needing real medical care, I hope you have someone like Dr. Pundaleeka on your side and not just a doctor from a big hospital where you are simply another person going through the system.***

Sincerely,

Kathleen M. Shapiro

Karen Hall, Hearing Officer  
Illinois Health Facilities Planning Board  
525 W. Jefferson St.  
Springfield, IL 62761

Ms. Hall;

The difficult question of whether an additional cancer treatment facility is needed in the Joliet area is before the Illinois Health Facilities Planning Board. I wish to comment on this question based on my experience as a cancer survivor.

In July 2009, I was diagnosed with pancreatic cancer. As you know, pancreatic cancer is a very aggressive form of cancer. I was referred to a surgeon outside of the Joliet area by a prominent Joliet internist. After surgery, I was referred to an oncologist, again away from Joliet, to undergo chemo and radiation therapy. The oncologist, after review of my situation, suggested I could get the same quality therapy in Joliet as he would give. He referred me to Joliet Oncology - Hematology Associates Ltd.

I met with Dr. Sarode Pundaleeka within a few days and treatment began almost immediately. I underwent three weeks of weekly treatments, six weeks of continuous chemotherapy and daily radiation therapy, followed by nine more weeks of weekly treatments. Since the treatments ended in March, I have had no further signs of cancer.

An article in the September 11, 2010, Herald News makes several points both for and against the new cancer facility proposed by Silver Cross Hospital and the University of Chicago.

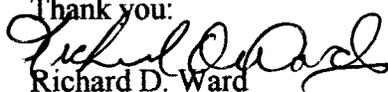

The article infers "big city" expertise would now be available to patients in the Joliet area. I would suggest the JOHA staff is as competent as any staff would be at the new facility. In all probability, the new staff would include local members, plus personnel who would divide their time between the University of Chicago and the local facility. Part time staffing of some personnel, could lead to appointment and treatment delays.

Generally, new technology and expertise developed in university settings is quickly adopted in everyday practice by other treatment facilities. The suggestion a new facility, operated by Silver Cross and the University of Chicago, would be far superior to any existing Joliet facility seems blatantly false and insulting.

It is true a new facility will create new employment. Trade union jobs will end when the facility construction is complete. Medical facility staffing positions will be created, but any facilities closed in the area would cause a loss of jobs and empty buildings.

The decision to allow or disallow the new facility should turn on the question of whether it is needed. My experience suggests that perhaps it is not. I was able to see an oncologist almost immediately after my referral and treatment began without delay, with appointments scheduled at my convenience. Such flexibility suggests JOHA was not operating at capacity.

Thank you:

  
Richard D. Ward

Springfield, IL 62761

Sept. 15, 2010

Dear Mr. Constantino and Board Members,

I write to you today on behalf of my colleague Sarode Pundaleeka, MD and Joliet Oncology-Hematology Associates. I am a Family Physician who has been practicing primary care in Will County for over 18 years. Over this period of time I have worked with Dr. Pundaleeka and his associates at JOHA extensively. We have shared hundreds of patients in common.

I would like to share with you my experiences with the physicians at JOHA. They are exceptionally astute diagnosticians and treatment providers, providing the highest quality of medical care for hematology and oncology patients and their families. Whether I have been in need of an urgent medical consultation in a hospitalized patient, an office-based consultation, or simply a "curbside" consultation over the phone they have always provided the best of service for me and my patients in an exceptionally timely manner. The patients themselves have never had anything but positive things to say regarding the care by these physicians.

JOHA is involved in numerous clinical trials and the physicians are up-to-date on all aspects of diagnosis and treatment of cancer and other hematological diseases. They operate a beautiful facility which I have had the privilege of touring. It is a state-of-the-art facility that is bright and cheerful and has about any amenity a patient could hope for. The staff is friendly. It is very spacious and has the capacity to treat a large number of patients. It is easily accessible for patients.

It has come to my attention recently that Dr. Pundaleeka and JOHA may have been mistreated by a local hospital. The allegations are that this hospital has attempted to stop Dr. Pundaleeka and JOHA from practicing medicine in the best manner in which they see fit. These allegations are unprofessional and shameful at best, and possibly illegal at worst. I have no reason to doubt the veracity of what Dr. Pundaleeka has alleged.

It seems unfortunately obvious to me that an attempt to bring the University of Chicago name to Will County without the inclusion of these fine physicians is a marketing ploy such as we are seeing commonly in many community hospitals. It is especially worrisome that these doctors may have been actively thwarted from pursuing such a relationship themselves by a hospital that is supposed to be looking out for the good of the community. While I appreciate the community resources that these hospitals provide, if they really have an interest in patient care (rather than their bottom-line) as

their first priority, then they won't try to exclude extremely competent physicians from practicing in their service areas. A policy of inclusion would seem to make more sense.

It is important to remember that what constitutes actual medical care is a competent physician and his or her medical colleagues. It takes a doctor to diagnose an illness, a doctor to put his or her hands onto the patient and examine them, a doctor to order the proper treatment, a doctor to inform and console a patient. An insurance company does not provide health care. A corporate entity running a health care facility does not provide caring. What patients in Will County really need is a continuation of access to the best of these physicians, not just access to a new office building with a new corporate logo on the door. If there is thought being given to what patients really need, then "good doctors" is the answer. Any attempt by large entities to restrict competent, independent physicians from practicing their profession in the manner in which they see fit is wrong. It unfair to physicians and deleterious to patients.

Finally, I would like to note that the character of Dr. Pundaleeka has been exemplary over the years. What he has developed intellectually is rivaled only by his good manners and kindness to physicians and patients alike.

If I can be of any further service to you in decisions regarding Dr. Pundaleeka or JOHA, please feel free to contact me at any time.

Best Regards,

Jill A. Patterson, MD

Springfield, IL 62761

Dear Mr. Constantino:

I do not profess to understand all the intricacies involved in the establishment of the University of Chicago-Silver Cross Cancer Center in New Lenox, Illinois. However, I was born and raised in Joliet, Illinois and when cancer struck my family the second time within two years, we traveled the nation in search of the best treatment center. After arriving at Sloan-Kettering in New York City, we were informed that while we were welcome to stay there, we could receive outstanding health care at home through Dr. Pundaleeka. In my opinion, it will be a travesty if my friends and neighbors were being referred in a different direction when such excellent care has been in existence within Will County for the past 30 years.

Thank you for your time and consideration.

Sincerely,

Deborah Nussbaum

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

Sincerely,

Springfield, IL 62761

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

Sincerely,

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

Sincerely,

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

Sincerely,

Signature: Ellen L. Pavolek

Springfield, IL 62761

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

Sincerely,

RE: WRITTEN COMMENT  
Project #10-049  
University of Chicago Cancer Center at  
Silver Cross Hospital, New Lenox

To the Members of the Board:

Please accept the following comments regarding the above-mentioned project from Joliet Oncology and Hematology Associates, Joliet; Hoffman Cancer Center, Joliet; and Provena St. Joseph Medical Center, Joliet.

Each of these mentioned health care providers has submitted individual, written comment in opposition to Project #10-049. We are submitting this joint comment, which summarizes our separate testimonies, to underscore our belief that the proposed project is not needed, will waste nearly \$22 million health care dollars best allocated elsewhere, and will have a negative impact on the residents of the area as well as those providers already caring for these residents with cancer.

Our objections to Project #10-049 can be summarized as follows.

**Purpose of the Project**

- The applicant states the project is needed to address a growing population of cancer patients. However, the applicant has provided absolutely no evidence that area residents are being denied access to quality care as needed.
- The applicant failed to address existing treatment resources, both hospital and community-based. The applicant provided no documentation regarding the capabilities of existing treatment centers, nor for their ability to handle any growth in demand.
- The applicant has provided extensive material in the application outlining the excellence of the University of Chicago Medical Center (UCMC) in cancer diagnosis and treatment. However, the application fails to note the medical oncology services to be provided in the proposed Cancer Center will be delivered by an existing group of Joliet-located oncology physicians. This practice has

- been or will be acquired by UCMC, and the UCMC "logo" will be placed on a practice which has been providing care to the Joliet community for many years. There will be no UCMC-based oncologists assigned to the proposed Cancer Center. In other words, quality and access will be no different. Only the name will change.
- The applicant uses patient migration data to conclude that existing patient care in the area is "very fragmented". This assertion is disingenuous at best, and deliberately misleading at worst. The nature of cancer care is such that patients travel to academic medical centers for high-level services such as bone marrow transplants, or participation in clinical trials, and receive necessary surgery, radiation therapy, or chemotherapy in the community close to home. This is the pattern that exists in the Joliet area, and the pattern will not change whether or not the proposed Cancer Center is approved.
- The applicant has failed to provide, as required, any documentation that the project will improve the health care or well being of the population; or, that there are problems with the existing system; or, any measurable quality or access goals.

#### Alternatives to the Project

- The applicant has failed to address, as required, the utilization of existing health care resources to meet identified needs. Although it is correct the Illinois Department of Public Health does not collect data from community-based providers, it is also true the applicant made absolutely no attempt to obtain utilization and capacity information from any of the undersigned, not to the best of our knowledge from any other providers.
- We believe there is more than adequate existing capability in the service area to accommodate not only patient requiring services today, but future patients as well. (Please see individual comments for detail.)

#### Project Services Utilization/Service-Specific Review Criteria

- The applicant's utilization projections are unrealistic (see Provena-St. Joseph Medical Center comment for detail).
- The applicant suggests throughout that the proposed project will bring a new, heretofore unavailable technology to the service area. This is false. IGRT has

- been available at Hoffman Cancer Center for the past two years. The "new" of the proposed equipment is generational, and can be likened to the difference between keyed and keyless entry to a new car.
- In touting the quality of the radiation equipment to be acquired as part of the project, the applicant extensively discusses the benefits of the selected Varian TrueBeam. However, the application itself includes an article from the New York Times discussing, in fairly gruesome detail, errors in Varian software which resulted in severe injury, and in some cases mortality, to radiation therapy patients. We by no means intend to suggest Varian equipment is not a viable option for radiation therapy. However, neither do we see any particular evidence to suggest it represents an absolute improvement in patient treatment.
- All of the discussion of utilization and need in the application relates to radiation therapy. However, even though the IHFSRB has not established standards for the utilization of medical oncology (chemotherapy), that portion of the project represents a significant portion of the project cost. The applicant should at least have been able to address the need for, quality of, and impact of medical oncology.

] Charity Care

- Existing providers of radiation therapy and medical oncology services provide significant reduced-cost and no-cost treatment to the residents of the area (please see individual comments). As noted in the application, in FY 2009 UCMC provided less than one percent of net patient revenue for the cost of charity care. Given that the total point of the proposed project is the establishment of UCMC in the area, it is reasonable to assume UCMC's charity care procedures will be established as well. This could represent a severe negative impact on the ability of cancer patients to access care. This will be especially true if, as noted in the individual comments of the undersigned, establishment of the proposed project will endanger the continued operation of existing providers.

We very much appreciate the Board's willingness to consider these comments. We respectfully request the application for permit for Project #10-049 be denied.

Sincerely,

Selma R. Ahmad (for Hoffman Cancer Center)

RE: WRITTEN  
COMMENT Project  
#10-049  
University of Chicago Cancer Center at  
Silver Cross Hospital, New Lenox

Dear Members of the Illinois Health Facilities and Services Review Board: Please  
accept the following comment in opposition to the above-referenced project.

I am a Board-certified radiation oncologist who has been treating patients in the Joliet area for over 30 years. I believe the proposed project should be denied because it is not needed, and will lead to unnecessary and excessive costs to patients.

1. There is no need for the proposed project.

The Hoffman Cancer Center currently provides all of the services to be included in the proposed project, including IGRT. Over the past twelve months, 200 patients received 8,800 courses of treatment at our facility, and we have capacity to treat at least 25% more patients. None of the existing providers in the area are operating at capacity.

Further, the Hoffman Cancer Center has had a long-standing relationship with Silver Cross Hospital (note the similarity in letterhead). Our Center is located on the existing Silver Cross Hospital campus, and we provide care for the Hospital's radiation and medical oncology patients. We have been notified this relationship will be terminated owing to the proposed Silver Cross/UCMC affiliation.

Finally, the proposed project does not represent any meaningful improvement in access to services. The proposed radiation therapy technology is already available at Hoffman Cancer Center and elsewhere in the area, and the medical oncology services will be provided by an existing practice.

2. The proposed project will not improve quality of cancer treatment.

As noted above, the proposed project represents nothing new or improved which would justify a cost of nearly \$22 million. Rather, the project will compromise existing quality of patient care in that it will disrupt continuity of care and referral patterns that have been developed over time in the best interests of our patients.

I have seen that the IHFSRB has received numerous letters from primary care physicians in the area opposing the project. This relates directly back to concerns over potential erosion of continuity and quality for cancer patients.

3. The proposed project may compromise the ability of indigent patients to receive needed services.

Over the past twelve months, Hoffman Cancer Center provided free care to 10 patients, representing \$383,539 in unbilled services. The application for the proposed project indicates that UCMC provides less than one per cent of net patient revenue in charity care. Any patients who are directed to the proposed UCMC Center instead of existing providers may have their ability to access care compromised; in addition, as existing centers experience financial setbacks owing to the addition of duplicative services in the area, their historic ability to accommodate indigent patients may be lessened.

In summary, the proposed project appears to be directed towards improvement in the financial status of the applicants, rather than improvement in the health status of the residents of the area. I respectfully request the Board to deny this project.

Sincerely,

  
Salwa F. Asaad, M.D.

RE: WRITTEN  
COMMENT Project  
#10-049  
University of Chicago Cancer Center at  
Silver Cross Hospital, New Lenox

Dear Members of the Illinois Health Facilities and Services Review Board: Please  
accept the following comment in opposition to the above-referenced project.

I am a Board-certified radiation oncologist who has been treating patients in the Joliet area for over 30 years. I believe the proposed project should be denied because it is not needed, and will lead to unnecessary and excessive costs to patients.

1. There is no need for the proposed project.

The Hoffman Cancer Center currently provides all of the services to be included in the proposed project, including IGRT. Over the past twelve months, 200 patients received 8,800 courses of treatment at our facility, and we have capacity to treat at least 25% more patients. None of the existing providers in the area are operating at capacity.

Further, the Hoffman Cancer Center has had a long-standing relationship with Silver Cross Hospital (note the similarity in letterhead). Our Center is located on the existing Silver Cross Hospital campus, and we provide care for the Hospital's radiation and medical oncology patients. We have been notified this relationship will be terminated owing to the proposed Silver Cross/UCMC affiliation.

Finally, the proposed project does not represent any meaningful improvement in access to services. The proposed radiation therapy technology is already available at Hoffman Cancer Center and elsewhere in the area, and the medical oncology services will be provided by an existing practice.

2. The proposed project will not improve quality of cancer treatment.

As noted above, the proposed project represents nothing new or improved which would justify a cost of nearly \$22 million. Rather, the project will compromise existing quality of patient care in that it will disrupt continuity of care and referral patterns that have been developed over time in the best interests of our patients.

I have seen that the IHFSRB has received numerous letters from primary care physicians in the area opposing the project. This relates directly back to concerns over potential erosion of continuity and quality for cancer patients.

3. The proposed project may compromise the ability of indigent patients to receive needed services.

Over the past twelve months, Hoffman Cancer Center provided free care to 10 patients, representing \$383,539 in unbilled services. The application for the proposed project indicates that UCMC provides less than one per cent of net patient revenue in charity care. Any patients who are directed to the proposed UCMC Center instead of existing providers may have their ability to access care compromised; in addition, as existing centers experience financial setbacks owing to the addition of duplicative services in the area, their historic ability to accommodate indigent patients may be lessened.

In summary, the proposed project appears to be directed towards improvement in the financial status of the applicants, rather than improvement in the health status of the residents of the area. I respectfully request the Board to deny this project.

Sincerely,

  
Salwa F. Asaad, M.D.

[www.jolietoncology.com](http://www.jolietoncology.com)

To the Members of the Board:

My name is Dr. Sarode Pundaleeka. I am the Medical Director of Joliet Oncology-Hematology Associates, a physician practice which has been providing care to cancer patients in our area for 30 years.

I am providing this written comment to document the proposed project does not meet the most important IHFSRB standards related to this project; specifically

- The proposed project is not needed
- The proposed project will not improve access to care
- The proposed project will not improve quality
- The proposed project is not consistent with the Board's goals of containing health care costs and improving financial access.

First, there is the issue of capacity: is the project needed to provide care to patients who have no access because of lack of available services? The answer is **no**. Joliet Oncology-Hematology Associates (JOHA) currently provides tomotherapy and linear accelerator treatments to between one and nine patients per day. We could easily accommodate 16 tomographic patients and 25 linear accelerator patients each day without altering hours of operation, and even more if evening or weekend treatment slots become necessary. Although I cannot speak for other centers in the area, I believe none are at or near capacity. So, there is not a need for the proposed project.

Second, there is the issue of access: do patients in the area lack ready access to the cancer services (radiation therapy and medical oncology) included in the proposed project? **No**. As noted above, there is more than adequate existing capacity to provide timely radiation therapy treatment as needed to our community. The same is true for medical oncology (chemotherapy) services; indeed, the application makes no statement of need for these services whatsoever.

Third, there is the issue of quality: is the project needed to provide state of the art care, more highly trained physicians, or better outcomes? Again, the answer is **no**.

JOHA has had the IGRT capability emphasized in the application as a great benefit for over three years. Our radiation oncologist, Ommar Hla, M.D., trained at the Cleveland Clinic, and then had further training at the University of Rochester in radiation oncology special procedures. Dr. Hla can and does deliver any complicated radiation treatments patients might require. In contrast, the radiation oncologist who would staff the proposed UCMC radiation service will be a newly-minted Fellow: a new graduate as opposed to an experienced physician

Each of the medical oncologists on our staff is board-certified. We provide the highest quality compassionate care to our patients, as attested to by the many who have provided comment to you.

The physicians who would be providing the medical oncology services at the proposed Cancer Center are not currently based at UCMC, but rather have been practicing in the Joliet area for many years. UCMC will buy the practice, and although they will be able to use the UCMC name, they will be the same physicians providing the same care.

The application for the proposed project implies that our patients do not have the same access to the benefits of clinical trials, protocols and research they would have if UCMC comes into the area. This is not accurate. JOHA has memberships in and affiliations with several national cancer research and treatment organizations, including NCCTG (since 1991), which also includes the Mayo Clinic as a member, and CALGB (since 2008), and has participated in UCMC Phase II drug development protocols since 2008. JOHA enters over 100 patients per year into national research studies. The proposed project will have no impact on the availability of research and treatment protocols to cancer patients in our area.

Fourth, there is the issue of cost. Although the applicant was not obligated to provide information on proposed charges, it is well-documented that costs and reimbursements are higher for academic medical centers. The application states the radiation therapy service will be operated under the University of Chicago Medical Center's license, which suggests standard UCMC charges will apply.

There is also the concern of the capital costs of \$22 million for services which are not needed and will be underutilized. Patients will bear the burden of paying for unnecessary investment. The project would also add excess operating costs, which are not detailed in the application, and would drive up the operating costs of existing providers due to utilization and staffing issues.

In addition, I must point out that JOHA has an established practice of financial assistance to patients who cannot afford care. For the first nine months of 2010, JOHA provided over \$130,000 in lowered or free care and treatments for indigent patients. Further, in 2009 we provided \$531,000 of free drugs to patients who were unable to pay. The nature of cancer treatment is such that the pharmaceuticals are often the most financially draining aspect of care. JOHA is not a 501(c)3

organization; we are not required by any governmental entity to provide financial assistance. It is done as a service to the community which we have been part of for so many years.

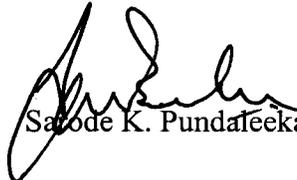

I ask you to contrast this to information included in the application, which shows that UCMC provided less than one per cent of its net revenue to charity care. What benefit will accrue to patients who no longer have access to the care they need, unless they also have access to the funds to pay for it?

I do not believe the purpose of this project is to increase quality or access for the residents of the area. Rather, the purpose of this project is to enable Silver Cross Hospital to retain revenue, and to enable UCMC to capture patients to its highly lucrative tertiary services.

I attended the Public Hearing which was held on this project a few weeks ago, as a matter of fact I requested the hearing, and I spoke in opposition to the project at that time. To my bafflement, I was the only person who spoke that day who was asked to stop speaking before I had finished, owing to time limits. The above documentation represents the information I could not present at the hearing.

I ask the members of the Board to consider whether the needs of the population or the needs of the providers are being served by this \$22 million project, and to deny the Application for Permit.

Sincerely,

Sarode K. Pundateeka, M.D.

Re: Project No. 10-049

Dear Mr. Constantino,

I am writing to express the negative impact that the proposed University of Chicago (UC), project # 10-049 would have on Adventist Bolingbrook Hospital (ABH).

While we have a number of concerns our opposition is focused primarily the following factor:

- The proposed project would have a **negative impact** on Adventist Bolingbrook Hospital's efforts to reach its target occupancy and to establish itself as a full service hospital in a profoundly **negative economy**;

Adventist Bolingbrook Hospital opened on January 14, 2008. For full year 2009, ABH had an occupancy percentage of 37.5. Overall payor mix has been extremely challenging at 36 percent commercial, 32 percent Medicare, 26 percent Medicaid and 6 percent self-pay/uninsured. ABH has also delivered charity care, calculated on a cost basis, of approximately \$3.2 million. This figure includes approximately \$1.5 million in free care delivered to Medicare and Medicaid beneficiaries so far this year.

Currently, ABH provides infusion/chemotherapy services to the northern portion of the Silver Cross secondary service area. A cancer center in New Lenox would negatively impact ABH's ability add additional oncology services and erode its ability to continue to provide a high level of charity care to the federally designated Medically Underserved Area<sup>1</sup> (MUA) in which it is located.

---

<sup>1</sup> **Areas (MUAs).** Eligibility for designation as an MUA is based on the demographics of the entire population in an area compared to national statistics for four health care demand/resource indicators: Percentage of elderly population (over 65 years); Poverty rate; Infant mortality rate; Ratio of primary care physicians per 1,000 population.

It is therefore the position of Adventist Bolingbrook Hospital that the proposed University of Chicago (UC), project # 10-049 must be denied by the Planning Board.

Sincerely,

Rick Mace  
Chief Executive Officer

October 5, 2010

Mr. Dale Galassie  
Acting Chair  
Illinois Health Facilities Planning Board  
525 W. Jefferson St., Second Floor  
Springfield, IL 62761

Re: University of Chicago Cancer Center at Silver Cross Hospital  
Project #10-049

Dear Mr. Galassie:

Provena Saint Joseph Medical Center is opposed to this project because the applicants, University of Chicago Medical Center (UCMC) and Silver Cross Hospital, have not justified the need for the service. Residents of the service area already have easy access to high quality, state-of-the-art radiation therapy services through existing providers who have ample capacity.

The UCMC/Silver Cross application fails to justify a Certificate of Need permit because:

- The two radiation therapy need methodologies identified in the application have either been calculated inappropriately or contain errors;
- Sufficient outmigration necessary to justify the services proposed by the applicants has not been documented;
- Existing radiation therapy providers not identified in the application are shown to have capacity to support community need; and
- The costs to care for those few (only 144) patients returning to Joliet for radiation therapy are excessive.

This application is simply an argument for why the UCMC and Silver Cross want the project, not why it is needed.

### Need Methodology

**Applicants' Premise – Based on two methodologies there are sufficient cancer patients in the area to meet the standard of 7,500 treatments per year.**

The applicants have developed two methodologies to justify the volume for their linear accelerator, both of which overstate the need for radiation therapy service.

In the first methodology, they developed a relationship between radiation therapy treatment courses and total medical/surgical admissions. There is a relationship between radiation therapy and cancer admissions, but not to total medical/surgical admissions.

The 2006 National Hospital Discharge Survey published by the National Center for Health Statistics of the U.S. Department of Health and Human Services reported that approximately 96.5 percent of hospital admissions (nationally) were for a diagnosis other than cancer (malignant neoplasms). Excluding “mental disorders” and “females with deliveries,” cancer represented only 4.2 percent of all admissions. Therefore, using total medical/surgical admissions to estimate radiation therapy treatment courses is illogical and should be dismissed as an invalid methodology as cancer represents such a small portion of medical/surgical admissions.

The second methodology is based upon the estimated number of new cancer patients in the service area. The applicants estimate there will be a total of 4,769 new cancer patients in the service area. To calculate radiation therapy patients, they use a radiation therapy percentage of 32.7 percent (page 105). However, this rate is only for breast, lung and prostate cancers. They should have used a 25.77 percent rate for all cancer types based on the UCMC experience (page 104).

If the applicants want to use the higher percentage (32.7 percent) it must be applied to lung, breast and prostate cancer patients only. They have mismatched cancer types and radiation therapy percentages. By using this methodology, the applicants have overstated the number of patients who will receive radiation therapy.

The following table uses the applicants' methodology to estimate radiation therapy patients for all types of cancers but correctly matches the cancer type categories with the radiation therapy percentages.

Mr. Dale Galassie  
 Opposition to Project #10-049  
 October 5, 2010  
 Page 3 of 11

	<u>All Cancer Types</u>
<b>Cancer Case Estimate (page 103)</b>	<b>4,769</b>
<b>Silver Cross Market Share (page 104)</b>	<b>17.1%</b>
	<b>815</b>
<b>Cases transferred from UCMC (page 104)</b>	<b>144</b>
	<b>959</b>
<b>Radiation therapy percentage (page 104)</b>	<b>25.8%</b>
<b>Radiation therapy patients</b>	<b>247</b>
<b>Treatments per patient (page 106)</b>	<b>24</b>
<b>Total treatments</b>	<b>5,928</b>
	<b>7,500</b>
<b>State Standard</b>	<b>7,500</b>
<b>Percentage of Standard</b>	<b>79.0%</b>

The result of properly matching the All Cancer Type case estimate with the All Cancer Type radiation therapy percentage shows the proposed project's utilization will only reach 79 percent of the State standard and will be 1,572 treatments below that standard.

The applicants state that the cancer center will "focus on the most common types of cancer – breast, lung, prostate" (page 105). The radiation therapy volume estimate should be based on the number of patients with those cancer types (2,000 – page 103) times the radiation therapy percentage for those same cancer types (32.7% - page 104). The following table properly matches the cancer type and the radiation therapy percentage for those patients.

Mr. Dale Galassie  
 Opposition to Project #10-049  
 October 5, 2010  
 Page 4 of 11

	<u>Lung, Breast, Prostate Cancer</u>
Cancer Case Estimate (page 103)	2,000
Silver Cross Market Share (page 104)	17.1%
	342
Cases transferred from UCMC (page 104)	144
	486
Radiation therapy percentage (page 104)	32.7%
Radiation therapy patients	159
Treatments per patient (page 106)	24
Total treatments	3,816
State Standard	7,500
Percentage of Standard	50.9%

If the cancer center is focusing on breast, lung and prostate cancers, utilization will only reach 51 percent of the State standard and will be 3,684 treatments below the State standard.

**Conclusion** – The applicants have not demonstrated they will achieve the required volume to justify their radiation therapy programs. This project does not meet the requirements of Section 1110.234(b) of the Board’s rules.

**Outmigration Considerations**

**Applicants' Premise** – The applicants indicate that there is significant outmigration from the service area, and the development of this project will reduce this outmigration.

**The Application Actually Documents That Outmigration Will Not Be Reduced**

In fact, the applicants' own document states that reductions in outmigration will not occur. The applicants state that 1,400 UCMC cancer patients reside in the Silver Cross service area (page 104). However, only 144 of those patients will elect to use the proposed cancer center (page 104). The development of the project would not affect the travel patterns of 89.7 percent (1,256 patients) who are being cared for by UCMC in Hyde Park who live in the Silver Cross service area.

Mr. Dale Galassie  
Opposition to Project #10-049  
October 5, 2010  
Page 5 of 11

**Inpatient Cancer Migration Patterns Should Not Be Used As a Proxy For Migration of Outpatient Radiation Therapy Patients**

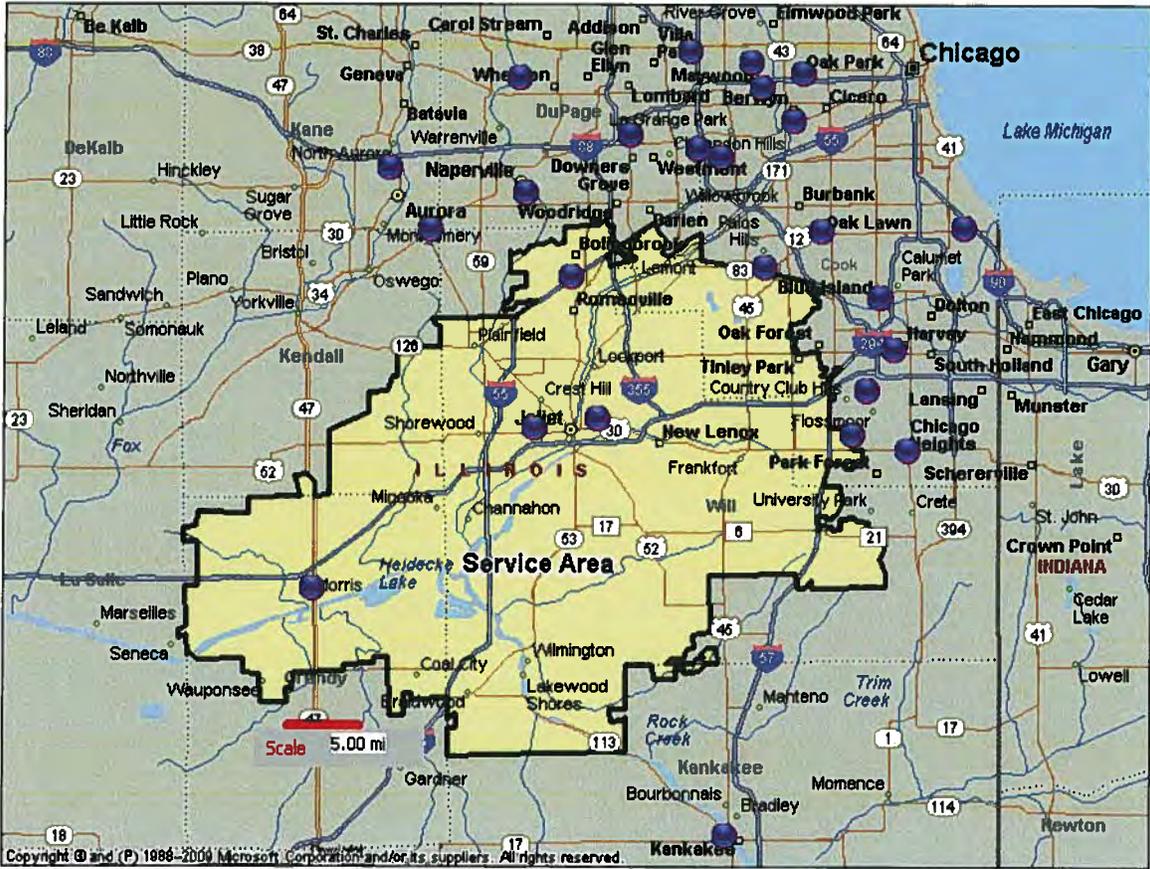

The applicants frequently refer to the significant (70 percent) outmigration of residents to other facilities for cancer care (page 86 of the application). This calculation is for patients being admitted to a hospital as inpatients with a cancer diagnosis. **It is not for patients receiving radiation therapy.** Using inpatient cancer migration patterns is an invalid substitute for outpatient radiation therapy migration patterns.

**Outmigration vs. Local Access**

The applicants' outmigration premise doesn't take into consideration the significant number of hospitals within 30 minutes normal travel time of the service area that provide inpatient cancer care to residents in the Silver Cross Hospital service area. For example, Palos Community Hospital in Palos Heights is in an adjacent ZIP Code™ to the Silver Cross service area, and 368 inpatient cancer patients (source: COMPdata) from the Silver Cross service area were cared for by Palos Community Hospital in 2009. These patients, who actually represent individuals accessing care locally, are included in the applicant's outmigration calculation.

Cancer patients in the Silver Cross service area overwhelmingly seek inpatient cancer care locally. More than 77 percent of cancer patients stay in their local area (30 minutes normal travel time from the service area) for inpatient cancer care (COMPdata). These patients are not leaving the area for cancer care.

The following is a map of the service area and the locations of hospitals within a 30-minute travel time of the service area that provide inpatient cancer care to service area residents.

**Conclusion** – The applicants concede that only a small number of the patients from the Silver Cross service area seeking care at UCMC in Hyde Park would opt to have care provided in New Lenox. Most residents of the service area seek inpatient care locally, and there is no documented travel outside of the area for radiation therapy. Therefore, this project will have minimal, if any, impact on patients leaving the area for care, and therefore it should be denied.

### **Existing Programs in the Market and Market Capacity**

**Applicants' Premise** – There are not sufficient providers of radiation therapy services in the service area, and access is limited.

There are four operational radiation therapy providers in the area available to meet the needs of the community, and one additional site is currently under construction, all within 14 miles of the applicants' proposed site. The applicants make no specific mention of providers other than Provena Saint Joseph Medical Center.

Mr. Dale Galassie  
 Opposition to Project #10-049  
 October 5, 2010  
 Page 7 of 11

Name	Address	Distance from Applicant Site	Linear Accelerators	Capacity
Provena Saint Joseph Medical Center	812 Campus Drive, Joliet	9 miles west	2	Yes
Joliet Hematology Oncology Associates	2614 W. Jefferson Street, Joliet	9 miles west	2	Yes
Advanced Urology	1541 Riverboat Center Drive, Joliet	14 miles west	1	Yes
Joliet Radiation Oncology at the Hoffman Cancer Center	1301 Copperfield Road, Joliet - on the Silver Cross Campus	3 miles west	1	Yes
Alpha Med Physicians Enterprises (under construction)	17333 S. LaGrange Road, Tinley Park	8 miles east	1	Yes

The following map shows the locations of these radiation therapy providers and the applicants' proposed site.

Mr. Dale Galassie  
Opposition to Project #10-049  
October 5, 2010  
Page 8 of 11

Based on data reported in the 2008 Hospital Profiles (latest data available) of all hospital radiation therapy programs in Illinois, the median number of treatment courses (patients) per linear accelerator is 218. With seven linear accelerators in the area, 1,516 patients can be cared for based on the State median. This is higher than the demand estimated by the applicants of 1,229 radiation therapy patients (page 106).

Assuming each of the current providers can care for 314 patients, the applicants' estimate, (page 106), 2,198 patients could be cared for locally. This exceeds the community need of 1,229 by more than 78 percent.

The existing providers have sufficient capacity to care for the estimated number of patients requiring radiation therapy.

Ignoring current radiation therapy providers in the applicants' analysis as if they do not exist in order to justify the need for the radiation therapy service is a disservice to the historic care provided locally – and to the cancer patients who have been cared for in the past and the high quality provided to them as was stated at the public hearing.

**Conclusion** - There is sufficient capacity among current providers of radiation therapy to call for all cancer patients in the area. Therefore, there is no need for the project.

### **Cost of Project**

**Applicants' Premise** – The proposed project is the “best option ... for financial considerations,” and the applicants state that in the “do nothing” alternative they cannot calculate the costs to patients.

The applicants concede that only 144 patients receiving radiation therapy services outside of the area (at UCMC) will utilize the new radiation therapy service. These are the only patients they have documented who would change where they receive radiation therapy as all the other patients could be cared for at existing providers.

The fair market value of the Varian TrueBEAM of \$3,812,401 (page 183) and the CT Simulator of \$888,204 results in total equipment costs of \$4,700,605. With the applicant

Mr. Dale Galassie  
 Opposition to Project #10-049  
 October 5, 2010  
 Page 9 of 11

planning a 5-year equipment lease (pages 183 and 184) the annual equipment cost per year is \$940,121.

Varian TrueBEAM	\$3,812,401
CT Simulator	888,204
Equipment cost	\$4,700,605
Lease term - years	5
Annual capital cost	\$940,121

If the applicants meet the State standard of 7,500 treatments per year the equipment cost per treatment will be \$125.

The applicants have stated that only 144 residents of the service area will come back for cancer care because of the affiliation between UCMC and Silver Cross. Other residents of the service area can be cared for at existing providers. Those 144 patients will result in a total of only 888 radiation therapy treatments.

New patients returning to the area	144
Radiation percentage	25.77%
Radiation patients	37
Treatments per patient	24
Total treatments	888

This results in an equipment cost of \$1,059 per treatment for patients receiving radiation therapy, which is nearly 750 percent higher than the cost per treatment assuming the applicant could meet the State volume standard.

	<u>Proposed</u> <u>Project</u>	<u>State</u> <u>Standard</u>
Annual Capital Cost	\$940,121	\$940,121
Annual Treatments	888	7,500
Cost per Treatment	\$1,059	\$125
Cost per Patient (24 treatments)	\$25,416	\$3,000

This does not include the cost of the building, other capital or other operating costs. These capital costs are a duplication of existing services in the community and only increases the cost of health care.

Mr. Dale Galassie  
Opposition to Project #10-049  
October 5, 2010  
Page 10 of 11

The applicants did not specify the unique costs of building the radiation therapy clinic with the required vault and shielding. The same cost per square foot was used for the radiation therapy clinic and infusion clinic (page 178). The cost associated with an infusion clinic is typically similar to that of a medical office building and would not include the highly specialized costs (i.e. vault construction and shielding) related to radiation therapy space. As a result, this cost-per-square-foot analysis is significantly understated, and the true costs per patient would be significantly higher.

**Conclusion** – The equipment cost per patient is significantly higher for this project with its low documented volume of patients that will return to New Lenox from UCMC. The Review Board certainly has the authority to question the applicants' cost estimates and request more specific project costs. More importantly, given the already high cost of the equipment for the very limited number of patients who will utilize the service, the increased project costs further support the denial of the project based on cost.

#### **Academic Medicine and Access to Clinical Trials**

**Applicants' Premise** – **The proposed project provides the residents of the service area access to academic medicine and clinical trials that are not currently available in the area.**

Many physicians in the area already are affiliated with the academic medical centers in Chicago including the University of Chicago. Radiation therapy protocols developed by leading cancer institutions also currently are used locally. Access to clinical trials also exists in the area.

**Conclusion** – This project does not bring unique services to cancer patients in the area.

#### **Summary**

The applicants have not justified the need for the radiation therapy services they are proposing:

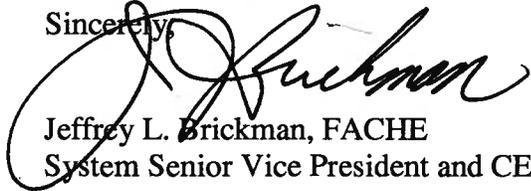

- Patients are not traveling outside of the local area for care; their need methodology misstates the volume; they ignore existing providers; their radiation therapy program duplicates existing services in the community; and
- There are significant costs to serving those few patients whom they document would return from UCMC to the cancer center for care – those are the only patients they have documented who would use their facility.

Mr. Dale Galassie  
Opposition to Project #10-049  
October 5, 2010  
Page 11 of 11

The application has not justified the need for this project, nor does it meet the Board's rules. Therefore, we request that this project be denied.

Thank you for your consideration.

Sincerely,

Jeffrey L. Brickman, FACHE  
System Senior Vice President and CEO

Re: Opposition of the University of Chicago Cancer Center/Silver Cross Hospital-New Lenox  
(Project#10-049)

Dear Mr. Constantino:

I am a resident of Will County and a cancer patient. I am writing this letter to express by strongest objection to the proposed University of Chicago/Silver Cross Hospital Center in New Lenox. We have here, in Joliet a great cancer treatment facility, the Hoffman Cancer Center where I received my treatment. They have the state of the art equipment and a dedicated highly knowledgeable, friendly and compassionate staff. I feel the proposed center would be an unnecessary expense and duplication of service.

Sincerely,

RE: *The University of Chicago Cancer Center at Silver Cross Hospital –  
New Lenox*

Dear Mr. Constantino:

I am writing in opposition of the University of Chicago – Silver Cross Cancer Center in New Lenox. The services necessary to treat oncology patients are not only already available in the Will County and surrounding suburban areas but they are provided by community based Oncologists. The services, technologies and expertise available near home, in our community already surpass some of the well-known academia based centers in Chicago and we would like to preserve this rarity.

Thank you for this consideration!

## Constantino, Mike

---

**From:** Donald Sweet [DSweet@hhoaltd.com]  
**Sent:** Friday, October 15, 2010 11:09 AM  
**To:** Constantino, Mike  
**Subject:** University of Chicago Silver Cross joint venture

Dear Mr. Constantino:

My name is Donald Sweet. I am the medical director for the cancer program at the Bolingbrook Hospital. I was on the University of Chicago faculty for many years.

I would like to offer the following three reasons why the proposed U of C and Silver Cross Hospital joint venture and request for a CON be denied.

1. The Bolingbrook Hospital is now the largest provider of indigent care in the Chicagoland area. I fear this proposed union will leave us with more indigent care. The U of C is well known for trying to avoid indigent care and this union may draw more insured patients away from Bolingbrook, leaving us with more debt. Remember, the UC once had the idea of busing their ER patients to other hospitals (a proposal by Michelle Obama).
2. Most previous joint ventures between the U of C and a community hospital have failed. Historically, this union will fail. The Hinsdale Hospital Administration recently terminated the joint venture radiation venture with the U of C.
3. The relevance of the University is to generate knowledge and teach. It is not to create market share. Chicago's medical universities have forgotten their relevance and behave like giant medical corporations. It is time someone reminded them of their duty. If they want to go into the medical care business, then they must not be able to call themselves a University.

Donald Sweet, MD, FACP
