**Re: Chicago Ridge Dialysis (Proj. No. 13-050)
Request to Appear and Submit Additional Information**

Dear Ms. Avery:

This office represents DaVita HealthCare Partners Inc. and Cagles Dialysis, LLC (collectively, the "Applicants"). In this capacity, we are writing in response to the Illinois Health Facilities and Services Review Board's (the "Board") issuance of an intent to deny the Applicants' proposal to establish a 16-station in-center hemodialysis facility to be located at 10511 South Harlem Avenue, Worth, Illinois (the "Proposed Project"). Pursuant to Section 1130.670 of the Board's Procedural Rules, the Applicants respectfully request to appear before the Board at the January 28, 2014 Board meeting and to submit supplemental information on the Proposed Project.

A. ESRD Patients Residing within the Geographic Service Area are Underserved

As stated throughout the application, the Proposed Project is needed to ensure residents in Chicago Ridge, Worth and the surrounding communities have sufficient access to life sustaining dialysis. The communities surrounding the Proposed Project are approximately 55% Hispanic and African-American. Due to a higher prevalence of hypertension and diabetes in these populations, Hispanics and African-Americans are disproportionately affected by end-stage renal disease ("ESRD") compared to the non-Hispanic white population. As evidenced in the table on the following page, **approximately 27% of all ESRD patients in Illinois reside within the GSA of the Proposed Project.** Importantly, only 15% of the approved dialysis stations are

located within the GSA¹. Accordingly, an additional dialysis facility is warranted to serve this underserved community.

Source: The Renal Network: ESRD Networks 9 & 10, Zip Code Report – September 30, 2013 *available at* <http://www.therenalnetwork.org/data/datareports.php> (last visited Dec. 18, 2013).

B. Corrections to the State Agency Report

Upon further review of the December 17, 2013 State Agency Report for Chicago Ridge Dialysis (the “SAR”), the Applicants identified several inaccuracies in Table One that resulted in an inaccurate picture of area utilization and contributed to the Board’s decision to issue an intent to deny the Proposed Project. Additional information is provided to correct the errors in the SAR.

1. All Facilities within the Geographic Service Area Not Included

The Applicants defined the geographic service area of the Proposed Project based upon projected patient origin data by zip code to be 30 minutes normal travel time of the Proposed Project (the “GSA”). Within the GSA, the Applicants identified 32 existing or approved in-center hemodialysis facilities. (See Attachments 1 and 2). While the SAR stated the Board identified 32 existing facilities within 30 minutes of the Proposed Project, in reality, it found only 30 facilities as FMC South Side and FMC Marquette Park were listed twice. (See SAR pp 2-3). The two additional facilities included in the Applicants’ analysis that were not included in the Board’s analysis were FMC Elmhurst and FMC Bolingbrook. In reconciling the Applicants’ data to the Board’s data, it appears the Board may have used incorrect addresses for these facilities in determining they did not fall within the GSA. As listed on the Fresenius Medical Care website, the correct address for FMC Elmhurst is 133 East Brush Hill Road, Suite 410, Elmhurst, Illinois 60126 and FMC Bolingbrook is 329 Remington Boulevard, Suite 110, Bolingbrook, Illinois 60440. (See Attachment 3). These addresses are 26 minutes and 30 minutes respectively from the Proposed Project, and thus, fall within the Proposed Project’s GSA.

2. No Data Reported for DSI Scottsdale and Community Dialysis of Harvey

In analyzing the utilization data in Table One, the SAR notes no data was reported for DSI Scottsdale and Community Dialysis of Harvey because these are newly established facilities. (See SAR pp 2-3). This is incorrect as both facilities have been operating for several years. DSI Scottsdale reported having 151 patients (or 72% utilization) as of June 30, 2013, and Community Dialysis of Harvey reported 68 patients (or 63% utilization) for the period ending September 30, 2013. The Applicants' respectfully request the Board correct the Community Dialysis of Harvey data to reflect utilization as of September 30, 2013. If data is not available for DSI Scottsdale, the Applicants recommend utilizing the June 30, 2013 data and noting it as such on the SAR to more accurately reflect utilization in the GSA. Using 0% on the SAR in absence of current data not only skews the average area wide utilization but may also lead Board members to think there is no utilization at that facility.

3. Incorrect Utilization Data Reported for FMC Evergreen Park

The utilization data for FMC Evergreen Park appears to be incorrect. On June 30, 2013, FMC Evergreen Park was treating 154 patients and operating at 85.6% utilization. According to the September 30, 2013 ESRD data, FMC Evergreen Park is operating at 38.3% utilization, which is a decrease of 85 patients (or 55%) in only three months. This may simply have been a transposition error based upon prior reporting data. Importantly, FMC Evergreen Park operated between 80% and 90% utilization over the past five years. Further, utilization of the existing facilities within the GSA did not increase significantly from the second quarter to the third quarter to account for the dramatic drop in FMC Evergreen Park's utilization. (See Attachment 1). Therefore, the Applicants respectfully request the Board confirm the September 30, 2013 utilization for FMC Evergreen Park and revise the utilization on Table One accordingly.

C. Adjusted Average Utilization of Facilities Operational at Least 24 Months

In order to get full understanding of utilization in the GSA, facilities that have been operational for less than 24 months should be excluded from the utilization analysis. Importantly, these facilities involve distinct patient populations, and the Board's rules allow 24 months to reach target occupancy of 80%. As shown in the table attached at Attachment 1, revising the utilization of existing facilities as discussed in Section B and excluding facilities in operation less than 24 months results in average utilization of 77.6%, which is just below the Board's 80% utilization standard.

Ms. Courtney R. Avery
December 19, 2013
Page 7

The additional information submitted supports the need for the Proposed Project. We respectfully request the Board approve the Proposed Project at the January 28, 2014 meeting.

Thank you for your time and consideration of our request. If you need any additional information regarding the Proposed Project, feel free to contact me at 312-873-3606 or acooper@polsinelli.com

Sincerely,

Anne M. Cooper
