Dear Ms. Avery

I am writing to inform you of my support of the University of Chicago's new medical center in Orland Park. The outpatient facility will provide a much needed service in our southwest suburban community.

The care delivered by medical centers such as this one proves vital to our community's well-being. Many of my neighbors who are facing serious medical issues will now be able to avoid a long drive to Downtown Chicago and receive the life-saving medical attention close to home.

The University of Chicago is known throughout the nation for their expertise and advances in many areas of medicine. This new facility will allow not just my neighbors, but all surrounding residents to utilize the advanced practices of the University of Chicago.

If I can help you in any way, please contact my office at (773) 445 – 8128.

Sincerely,

A handwritten signature in cursive script that reads "Fran".

Springfield, Illinois 62761

Dear Ms. Avery:

I am writing as a private physician who has resided in Orland Park for over 30 years. I have drawn my private practice patients from Orland Park for nearly the same period of time.

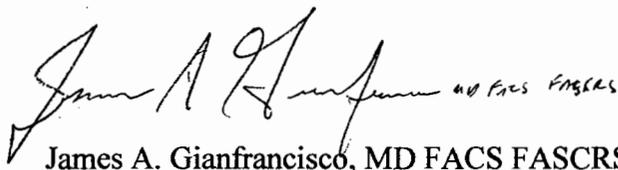

My practice has supported American Cancer Society activities and Orland Park Health Fairs in the past. I have done my best to mitigate the incidence of colon cancer through educational and therapeutic endeavors in my practice colon and rectal surgery. My wife and I have been active with the Orland Park VFW "Shoobox Project" in support of our deployed servicemen.

I would like to formally express my support for the University of Chicago Medicine's application to build an ambulatory outpatient facility in Orland Park. I have referred some of my patients to the University of Chicago Medicine for sub-specialty care for many years. This location will be extremely convenient for my patients, who now have to drive to Hyde Park. I'm confident this proposed facility will be a tremendous asset to the community.

This location will allow me to have a greater interaction with the University of Chicago specialty physicians, and will allow for a much higher quality of care with an improved ability for two-way access and communication on patient care issues.

It is with great pleasure that I support the University of Chicago Medicine's application. Thank you for your time and consideration.

Sincerely,

James A. Gianfrancisco, MD FACS FASCRS

Springfield, Illinois 62761

Dear Ms. Avery:

I'm writing as a private physician who has practiced in Orland Park for over 20 years. My cardiology practice has focused on the treatment and prevention of cardiovascular disease, and the Orland Park community is my service area. I have lived in Orland Park for 20 years, and enjoy providing service to my community.

I would like to formally express my support for the University of Chicago Medicine's application to build an ambulatory outpatient facility in Orland Park. I refer my patients to the University of Chicago Medicine for sub-specialty care. This location will be extremely convenient for my patients, who now have to drive to Hyde Park. I'm confident this proposed facility will be a tremendous asset to the community.

I believe the ambulatory outpatient facility in Orland Park will have a positive impact on my practice and our community. The facility will enable my patients to access world class experts in their respective fields without having to travel to Chicago. I believe the facility will also provide jobs for the community and enhance the wellness and general care of our community by offering additional depth of services not previously available in Orland Park.

It is with great pleasure that I support the University of Chicago Medicine's application. Thank you for your time and consideration.

Sincerely,

Kathleen Drinan DO, FACC
