Re: Project #14-043 - Request for Information

Dear Ms Scheuerman:

The State Board Staff has begun the review of Project #14-043 St. Elizabeth Hospital for the discontinuation of a 303 bed acute care hospital in Belleville, Illinois and the establishment of a 144 bed acute care hospital in O'Fallon, Illinois. Please provide the following:

- Page 120 of the application for permit provides the projected medical surgical utilization for 2019. We need to know the projected increase in the projected days as a percentage from 2013 to 2019.
- Page 179 of the application for permit does not provide the projected ICU patient days for 2019. Please provide a chart similar to application page 120 for the medical surgical category of service and the percentage increase in projected patient days for the ICU service from 2013 to 2019.
- For all services that are being provided at the new hospital we need the projected percentage increase in patient days/services etc from 2013 to 2019.
- The State Board's projected population for the F-01 planning area by CY 2015 indicates an increase in population of 150 individuals or essentially no increase in population in this planning area. You are projecting an increase of 4.2% in your market area. Please explain.

Please be reminded that the Illinois Health Facilities Planning Act (20 ILCS 3960/6.2) allows the State Board Staff a maximum of 120 days to review the information submitted by an applicant from the date the application was deemed complete (August 26, 2014). If the State Board Staff believes the entire 120 days is needed for review the review period would end on December 24, 2014 for Project #14-043 and the proposed project will be scheduled for the January 27, 2015 State Board Meeting. You will be notified should the State Board Staff deem the review period is being extended.
