RE: PROPOSED DaVITA DIALYSIS FACILITY
Project 15-003 Vermilion County dialysis (DaVita)

Dear Board Members:

My name is Chad Hays and I am the State Representative for the 104th House District in Illinois which includes the entirety of Danville, Illinois.

I am a **supporter** of Danville Dialysis Service (DDS) in Danville, a locally owned and run dialysis facility that has serves our community with distinction for 13 years. I **strongly oppose** the application by Vermilion County Dialysis, known as DaVita, which has no direct ties or vested interest in our community.

My understanding is that Danville Dialysis Services is at less than 70% capacity and it seems apparent that additional facilities providing duplicative services is unwarranted.

To underscore the ample access and exemplary service by DDS, I share my own personal story. My father received dialysis prior to his recent death at Danville Dialysis Services. His experience, along with our entire family, was immediate accessibility coupled with exemplary, professional, compassionate care. Dr. Sodhi and his staff are extraordinary care providers and to dilute their ability to continue to provide such care to other patients and families, people they know by name, and consider "family" themselves, would be a travesty.

As a leader in the local healthcare community prior to my service in the Illinois General Assembly with a unique perspective on access in our geographic area; combined with personal experience as a family member with a loved one very recently in the care of Dr. Sodhi and DDS during an end of life situation, I feel compelled to share my insight and perspective on this matter.

A new dialysis provider, in this instance, would be counter productive to our community and citizenry, and I respectfully request the denial of the Vermillion County Dialysis' (DaVita) request to enter a market that has ample accessibility and measurable growth potential currently.

Thank you for your consideration of my views and the work that you do on behalf of the citizens of our State.

Sincerely,

A handwritten signature in black ink, appearing to read "Chad Hays", written in a cursive style.

RE: PROPOSED DaVITA DIALYSIS FACILITY
Project 15-003 Vermilion County Dialysis (DaVita)

Dear Board Members:

My name is DAVID ELSTON.

I am a supporter of *Danville Dialysis Services* (DDS) in Danville, Illinois, a locally owned and run dialysis facility that has served our community faithfully for 13 years. I strongly oppose the application by Vermilion County Dialysis, known as DaVita, which has no direct ties or vested interest in our central Illinois community.

The dedicated staff of Danville Dialysis Services have always done their best to provide high quality kidney care. Availability of a locally owned and managed dialysis facility benefits not only patients, but also the entire community. As a community we know that if any of us were to need dialysis, Danville has a locally owned, state-of-the-art dialysis facility ready to care for us when we need it.

I understand that DDS has room for additional patients and that a new facility in town is NOT needed. Worse yet, as I see it, a DaVita facility may put Danville Dialysis Services out of business or diminish its ability to provide a full range of dialysis services.

I urge you to put our community first, and to deny the DaVita application.
Sincerely,

Signature David E Elston

RE: PROPOSED DaVITA DIALYSIS FACILITY
Project 15-003 Vermilion County Dialysis (DaVita)

Dear Board Members:

My name is Chae Stevens

I am a supporter of Danville Dialysis Services (DDS) in Danville, Illinois, a locally owned and run dialysis facility that has served our community faithfully for 13 years. I strongly oppose the application by Vermilion County Dialysis, known as DaVita, which has no direct ties or vested interest in our central Illinois community.

The dedicated staff of Danville Dialysis Services have always done their best to provide high quality kidney care. Availability of a locally owned and managed dialysis facility benefits not only patients, but also the entire community. As a community we know that if any of us were to need dialysis, Danville has a locally owned, state-of-the-art dialysis facility ready to care for us when we need it.

I understand that DDS has room for additional patients and that a new facility in town is NOT needed. Worse yet, as I see it, a DaVita facility may put Danville Dialysis Services out of business or diminish its ability to provide a full range of dialysis services.

I urge you to put our community first, and to deny the DaVita application.
Sincerely,

Signature Chae Stevens
