Re: North Dunes Dialysis (Proj. No. 17-066)

Dear Ms. Olson:

I am the Chief Executive Officer for Vista Health System, a community healthcare provider with a hospital in Waukegan and an extensive network of outpatient services throughout Lake County, Illinois. At Vista Medical Center East, our community hospital in Waukegan, we offer comprehensive health care services including an award-winning stroke program. We play a key role in maintaining and improving the patient health in Waukegan and are committed to the future of the community.

While Vista Medical Center East offers a broad array of health services in Waukegan, we do not provide outpatient dialysis. We instead work closely with community providers who provide dialysis to our patients living with end-stage renal disease (ESRD). DaVita is a key partner in ensuring our patients have access to high quality dialysis services.

We understand that there is a material need for additional dialysis stations in Waukegan because both clinics are at or nearing capacity. We fully support DaVita's proposed project to address this access issue in our community, and I respectfully request that the Illinois Health Facilities and Services Review Board approve the application for North Dunes Dialysis.

Sincerely,

A handwritten signature in black ink, appearing to read "Norman Stephens".

Norman Stephens, FACHE
Chief Executive Officer
Vista Health System
