In Re: Project 18-025 Downtown Medical Office Building Notification of Changes

Dear Ms. Avery:

We have made significant progress with our Downtown Medical Office Project (18-025) as reported recently in our annual status report. We wanted to apprise you of some changes from our application. While we planned to have an x-ray machine, this will no longer be part of the project. We are also repurposing four rooms built as Sleep Lab rooms. Instead, two of these rooms will be used by Behavioral Health clinicians to interview and counsel patients with sleep difficulties. The other two will be used for post-procedure recovery/observation. We continue to manage the costs within the permit amount and the total gross square footage remains the same.

Please let us know if we can provide further information.

Sincerely,

John R. Beberman

Executive Director, Capital Budget & Control
