

Section IX, Safety Net Impact Statement

The proposed project is non-substantive as it involves the addition of orthopedic and podiatric surgical procedures to an existing ASTC. Accordingly, this criterion is not applicable.

Section X, Charity Care Information

This ambulatory surgery treatment center is not a non-profit organization and does not receive a tax credit for uncompensated or "charity" care. It and its affiliated physicians have historically accepted some referrals from the Lake County Department of Health without expectation of compensation but it does not track those services nor the associated costs which are sometimes borne solely by affiliated physicians. Therefore, BPSI does not have charity care data to report.
