

STATE OF ILLINOIS
HEALTH FACILITIES AND SERVICES REVIEW BOARD

525 WEST JEFFERSON ST. • SPRINGFIELD, ILLINOIS 62761 • (217) 782-3516 • FAX: 217) 785-4111

DOCKET NO: H-03	BOARD MEETING: February 25, 2020	PROJECT NO: 19-043	PROJECT COST:
FACILITY NAME: Metroeast Endoscopic Surgery Center		CITY: Fairview Heights	Original: \$331,000
TYPE OF PROJECT: Non-Substantive			HSA: XI

PROJECT DESCRIPTION: The Applicant (Metroeast Endoscopic Surgery Center, LLC) proposes to add podiatry, pain management, ophthalmology and orthopedic surgery services to its current ambulatory surgical treatment center (ASTC) located in Fairview Heights, Illinois. The reported project costs are \$331,000. The expected completion date is June 30, 2021.

EXECUTIVE SUMMARY

PROJECT DESCRIPTION:

- The Applicant (Metroeast Endoscopic Surgery Center, LLC) proposes to add podiatry, pain management, ophthalmology and orthopedic surgery services to its current ambulatory surgical treatment center (ASTC) located in Fairview Heights, Illinois. The project costs are \$331,000. The expected completion date is June 30, 2021.
- In June of 2019 the State Board approved Metroeast Endoscopic Surgery Center to add general surgery, plastic and gynecological surgical services at a cost of \$180,000 with a completion date of June 30, 2020 (Permit #19-010).
- In March of 2013 the State Board approved Metroeast Endoscopic Surgery Center to establish a limited specialty ambulatory surgical treatment center performing gastroenterology procedures in 2,634 GSF of leased space located in Fairview Heights, Illinois at a cost of \$1,113,642 (Permit #12-105).
- This project was deferred from the December 10, 2019 State Board Meeting. The Applicant provided comments on the Original State Board Staff Report. In those comments the Applicant argues that this Application should be reviewed as the previous Permit #19-010 which added surgical specialties and previously approved applications to add surgical services. 77 ILAC 1130.620 states “*Each application will be reviewed and considered on an individual basis unless HFSRB has established review criteria or procedures that pertain or relate to comparative review or "batching" of applications.*” The State Board has not established comparative review or batching of applications. These comments are attached at the end of this report as well as the additional comments provided by the Applicant.

WHY THE PROJECT IS BEFORE THE STATE BOARD:

- The project is before the State Board because the project proposes a substantial change in scope as defined at 20 ILCS 3960/5.
- One of the objectives of the Health Facilities Planning Act is “*to assess the financial burden to patients caused by unnecessary health care construction and modification. Evidence-based assessments, projections and decisions will be applied regarding **capacity, quality, value and equity** in the delivery of health care services in Illinois. Cost containment and support for safety net services must continue to be central tenets of the Certificate of Need process.*” [20 ILCS 3960/2]

PURPOSE OF THE PROJECT:

- The Applicant stated the following: “*The purpose of this project is to improve access and quality of care and to reduce costs for residents of the geographic service area (GSA). With the relocation of St. Elizabeth's Hospital from Belleville to O'Fallon (Project #14-043) and The Memorial Network shifting services from Memorial Hospital Belleville to Memorial Hospital East in Shiloh (Project #16-018), residents of Fairview Heights and Belleville need additional services to be provided locally to fill the void left by these departures.*”

PUBLIC HEARING/COMMENT:

- A public hearing was offered but was not requested. The project file contains 3 letters of support and 4 letters of opposition. The support letters are from:
 - Bruce Chaddick - Patient
 - Shirley Jones - Resident
 - Meghan Kreher – Resident
 - Arthur Johnson – Resident
 - Chester Health System

- East Side Health System
- Esquire Orthopedic Rehabilitation and Sports Medicine
- God Inspired Orthopedic Church
- Grace Church
- John Wagner – Resident
- Medicate Pharmacy
- State Representative Jay Hoffman
- State Representative Latoya Greenwood

Letters of opposition were submitted from the following:

- George Kruse Chairperson - HSHS St. Joseph's Hospital – Breese
- Chris Klay, President and CEO – HSHS St. Joseph's Hospital - Breese
- Megan Espienschied MSN, RN – Director of Surgical Services – HSHS St. Joseph's Hospital – Highland
- Dr. David Neighbors

All letters are attached to end of this report.

SUMMARY:

- As stated, the Applicant is asking the State Board to approve the addition of surgical specialties podiatry, pain management, ophthalmology and orthopedic surgery services in the 17-mile GSA. The Applicant was approved in June of 2019 to add surgical specialties general surgery, plastic and gynecological surgical services and the project is not yet complete (June 30, 2020 completion date).
- On February 5, 2020 the State Board was notified that the Applicant had completed a modernization of the Surgery Center. The modernization did not require State Board approval because the cost of the modernization was under the capital expenditure threshold. The facility now has two operating rooms, 2 pre-op, and 4 post-op rooms. This is a change from the one procedure room. Operating room capacity has increased in this 17-mile GSA.
- There are 8 ASTCs and 6 hospitals within the 17-mile GSA. Of the 8 ASTCs only one surgery center provides the surgical specialties being proposed. That Surgery Center (Anderson Surgery Center) was recently approved (Permit #18-031) and is not operational. The six hospitals provide all the surgical specialties being proposed and all are underutilized.
- The Applicant argues that the cost of the procedures proposed to be performed at an ASTC are less than the cost of these procedures performed at a hospital outpatient department. However, any savings based on lower reimbursements for services need to be compared against the fixed costs that remain in the hospital. It is not clear how much impact the shifting of revenue from one cost center (hospital) to another cost center (ASTC) on the overall cost to health care delivery.
- The Applicant states that the ASTC has provided Medicaid services in excess of the State Average for ASTCs. Over the past 4-years (2018-2015) Metrocast has averaged 10% Medicaid Revenue and 17 % Medicare Revenue.

- The procedures currently performed at this ASTC are gastro procedures and there has been no documentation provided that the specialties proposed to be performed would be for Medicaid patients. Historical ASTCs data statewide indicates more commercially insured, higher reimbursed care is provided at ASTCs, and more governmental, lower reimbursed care provided at the hospitals. Statewide ASTCs provided 1.7% in Medicaid care in 2018 and very little or no charity care.
- The Applicant has addressed a total 15 criteria and have not met the following.

State Board Standards Not Met	
Criteria	Reasons for Non-Compliance
77 ILAC 1110.235 (c) (6) – Service Accessibility	The Applicant was unable to meet one of the four conditions required by this criterion (see pages 10-11 of this report)
77 ILAC 1110.235 (c)(7) – Unnecessary Duplication/Maldistribution	There is existing capacity in the 17-mile GSA that is can accommodate the workload identified by this Application. (See page 12)
77 ILAC 1110.235(c) (10) – Assurance	The criterion requires the facility will be at target utilization within two years after project completion “ <i>not be optimized to exceed its current utilization.</i> ” (See page 13 of this report)

STATE BOARD STAFF REPORT
Project #19-043
Metroeast Endoscopic Surgery Center

APPLICATION/SUMMARY CHRONOLOGY	
Applicant(s)	Metroeast Endoscopic Surgery Center, LLC
Facility Name	Metroeast Endoscopic Surgery Center
Location	5023 North Illinois Street, Fairview Heights, Illinois
Permit Holder	Metroeast Endoscopic Surgery Center, LLC
Operating Entity/Licensee	Metroeast Endoscopic Surgery Center, LLC
Owner of Site	Ahmed Investments, LLC
Gross Square Feet	2,642 GSF
Application Received	September 18, 2019
Application Deemed Complete	September 19, 2019
Financial Commitment Date	June 30, 2021
Anticipated Completion Date	June 30, 2021
Review Period Ends	December 8, 2019
Review Period Extended by the State Board Staff?	No
Can the Applicant request a deferral?	No

I. Project Description

The Applicant (Metroeast Endoscopic Surgery Center, LLC) proposes to add podiatry, pain management, ophthalmology and orthopedic surgery services to its current ambulatory surgical treatment center (ASTC) located in Fairview Heights, Illinois. The reported project costs are \$331,000. The expected completion date is June 30, 2021.

II. Summary of Findings

- A. State Board Staff finds the proposed project is **not** in conformance with all relevant provisions of Part 1110 (77 ILAC 1110).
- B. State Board Staff finds that all relevant provisions of Part 1120 (77 ILAC 1120) are not applicable to this project.

III. General Information

Metroeast Endoscopic Surgery Center, LLC was organized as a Limited Liability Company (LLC) in November of 2011, and is wholly owned by Dr. Shakeel Ahmed, M.D. Financial commitment will occur after permit approval. The proposed project is a non-substantive project subject to a Part 1110 and Part 1120 review. Financial commitment will occur after permit issuance. Non-substantive projects are all projects not considered substantive projects.

Substantive projects include no more than the following:

1. Projects to construct a new or replacement facility located on a new site; or a replacement facility located on the same site as the original facility and the costs of the replacement facility exceed the capital expenditure minimum.
2. Projects proposing a new service or discontinuation of a service, which shall be reviewed by the Board within 60 days.
3. Projects proposing a change in the bed capacity of a health care facility by an increase in the total number of beds or by a redistribution of beds among various categories of service or by a relocation of beds from one facility to another by more than 20 beds or more than 10% of total bed capacity, as defined by the State Board in the Inventory, whichever is less, over a 2-year period. [20 ILCS 3960/12]

IV. Health Service Area

The ASTC is in the HSA XI Health Service Area. HSA XI includes the Illinois counties of Clinton, Madison, Monroe, and St. Clair. The ASTC is in St. Clair County. There are nine ASTC in this service area. The State Board is projecting an increase in the population of 1% in the HSA XI Service Area for the period 2017-2022.

Facility	City
Anderson Surgery Center, LLC	Edwardsville
Bel-Clair Amb. Surgical Ctr.	Belleville
Edwardsville Ambulatory Surg Ctr,	Glen Carbon
Hope Clinic or Women, Ltd	Granite City
Illinois Eye Surgeons Cataract Sur	Belleville
Metroeast Endoscopy Surgery Center	Fairview Heights
Monroe County Surgical Center	Waterloo
Novamed Eye Surgery Ctr Of Maryville	Maryville
Physician's Surgical Center, Ltd	O'Fallon

V. Project Uses and Sources of Funds

The Applicant is adding four surgical specialties, and reports project-related costs totaling \$331,000 for Movable Equipment. This capital expense will be funded with cash.

VI. Background of the Applicant

A) Criterion 1110.110(a) – Background of the Applicant

The Applicant provided the required authorization allowing the State Board and IDPH access to all information to verify information in the application for permit. The Applicant attest that no adverse actions have been taken against any facility owned and/or operated by them during the three (3) years prior to the filing of this application. Certificates of Good Standing has been provided for the Applicant as required. An Illinois Certificate of Good Standing is evidence that an Illinois business franchise (i.e. Illinois Corporation, LLC or LP) is in existence, is authorized to transact business in the state of Illinois and complies with all state of Illinois business requirements and therefore is in "Good Standing" in the State of Illinois

VI. Purpose of Project, Safety Net Impact Statement and Alternatives

A) Criterion 1110.110 (b) Purpose of the Project

The Applicant states: The purpose of this project is to improve access and quality of care and to reduce costs for residents of the geographic service area (GSA). With the relocation of St. Elizabeth's Hospital from Belleville to O'Fallon (Project #14-043) and The Memorial Network shifting services from Memorial Hospital Belleville to Memorial Hospital East in Shiloh (Project #16-018), residents of Fairview Heights and Belleville need additional services to be provided locally to fill the void left by these departures. It is well known that many patients travel to St. Louis for specialty care and advanced care, including podiatry, pain management, ophthalmology and orthopedic surgical services. MESC hopes to be able to serve these residents in their communities rather than having them travel outside of Illinois to obtain healthcare. (Application for Permit page 52-54)

B) Criterion 1110.110 (c) - Safety Net Impact Statement

This project is a non-substantive project and a safety net impact statement is not required for non-substantive projects. Charity care information is required, and the Applicant supplied the required data for Metroeast Endoscopy Surgery Center, LLC (see Table One).

TABLE ONE			
Charity Care/Safety Net Information			
Metroeast Endoscopy Surgery Center, LLC			
Year	2016	2017	2018
Net Patient Revenue	\$2,178,073	\$3,971,552	\$2,343,762
Amount of Charity Care (charges)	\$9,850	\$16,500	\$0
Cost of Charity Care	\$0	\$0	\$0
Ratio (charity care to net patient revenue)	0.00%	0.00%	0.00%

C) Criterion 1110.110 (d) - Alternatives to the Project

The Applicant stated the following.

Do Nothing

This alternative would maintain the status quo, which is to have patients undergo procedures in the hospital setting and/or travel to Missouri to obtain care. It would not improve access to high-quality, lower cost ASTC care as described throughout this application. Furthermore, doing nothing would not improve access to safety net services for residents of the GSA or increase utilization at Metroeast Endoscopic Surgery Center (MESC). For these reasons, this alternative was rejected.

Add surgical specialties at MESC (Proposed). (\$331,000)

To improve access for Fairview Heights area residents to podiatry, pain management, ophthalmology and orthopedic surgery services in the ASTC setting, the Applicant decided to add these surgical specialties to its existing multi-specialty ASTC. After weighing this option against others, it was determined that this alternative would provide the greatest benefit in terms of increased utilization and increased access to health care services. (Application for Permit page 67)

VIII. Project Scope and Size, Utilization and Assurances

A) Criterion 1110.120 (a) - Size of Project

No new construction is being proposed in this project. The current facility has 2 operating rooms and 4 recovery stations in 2,642 GSF of space.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION SIZE OF PROJECT (77 ILAC 1110.120 (a))

B) Criterion 1110.120(b) – Projected Utilization

The State Board does not have a specific utilization standard to add a specialty to an existing ASTC. The utilization standard for an ASTC is 1,500 hours per operating/procedure room. The Applicant had 1,382 hours of endoscopic procedures in 2018, slightly below the standard of 1,500 hours per procedure room. Note: Permit #19-010 was approved to add one procedure room and that construction has not completed as of the date of this report.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION PROJECTED UTILIZATION (77 ILAC 1110.120(b))

C) Criterion 1110.120(e) – Assurances

The Applicant stated:

“By the second year of operation after the project completion date, the annual utilization of the surgical rooms at Metroeast Endoscopic Surgery Center will, by the addition of the anticipated cases, be optimized to exceed its current utilization.”

The criterion requires the facility will be at target utilization within two years after project completion *“not be optimized to exceed its current utilization.”*

STATE BOARD STAFF FINDS THE PROPOSED PROJECT NOT BE IN CONFORMANCE WITH CRITERION ASSURANCES (77 ILAC 1110.120(e))

VIII. Non-Hospital Based Ambulatory Surgical Treatment Center Services

A) Criterion 1110.235(a) - 77 Ill. Adm. Code 1100 (Formula Calculation)

No formula need determination for the number of ASTCs and the number of surgical/treatment rooms in a geographic service area has been established. Need shall be established pursuant to the applicable review criteria of this Part.

B) Criterion 1110.235(c) (2) (B) (i) & (ii) - Service to Geographic Service Area Residents

The Geographic Service Area for the facility located in Fairview Heights, Illinois is 17 miles in all directions per 77 ILAC 1100.510(d). The Applicant supplied a patient/zip code list containing 152 zip codes and 3,782 patients (2018 information). The Applicants also supplied a zip code listing for the 17-mile service area, identifying 43 zip codes, and a population of 481,577 residents (see project file). A comparative analysis between the zip code listings shows that of the 3,782-patient served by the

Endoscopy Center 2,401 patients (64%) resided in 13 zip codes. from within the prescribed service area. The Applicant has successfully addressed this criterion.

TABLE TWO
Patients by Zip Code within the 17-mile GSA

Zip Code	City	2017 Population	2018 Patients
62040	Granite City	42,517	205
62269	O'Fallon	33,265	449
62234	Collinsville	32,496	209
62025	Edwardsville	32,008	59
62226	Belleville	28,550	311
62221	Belleville	28,460	308
62220	Belleville	19,510	139
62223	Belleville	17,204	161
62208	Fairview Heights	16,822	279
62298	Waterloo	16,604	39
62249	Highland	15,705	29
62206	East St. Louis	15,233	91
62258	Mascoutah	9,452	122
Total			2,401

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION SERVICE TO GEOGRAPHIC SERVICE AREA RESIDENTS (77 ILAC 1110.235(c) (2) (B) (i) & (ii))

C) Criterion 1110.235(c)(3)(A) & (B) - Service Demand – Establishment of an ASTC Facility or Additional ASTC Service

The Applicants provided referral letters from four physicians practicing within the service area. Of the number of patients proposed to be referred to the ASTC 513 referrals were accepted for a total of 1,241 hours. The Applicant has successfully addressed this criterion.

TABLE THREE
Historical, Proposed and Accepted Referrals

	Specialty	Historical	Proposed	Accepted ⁽¹⁾	Time Per Procedure (Hours)	Total Hours
Dr Taylor	Podiatry	322	150	150	1.86	279
Dr. Ungacta	Ortho	410	221	221	3.85	850.85
Dr. Belcher	Pain Management	1,200	600	0	0.62	0
Dr. Stock	Ophthalmology	571	350	142	0.78	110.76

**TABLE THREE
Historical, Proposed and Accepted Referrals**

	Specialty	Historical	Proposed	Accepted (1)	Time Per Procedure (Hours)	Total Hours
Total		2,503	1,321	513		1,240.61

1. Proposed referrals were not accepted because they were from an unlicensed facility.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION SERVICE TO GEOGRAPHIC SERVICE AREA RESIDENTS (77 ILAC 1110.235(c) (3) (A) & (B))

D) Criterion 1110.235(c)(5)(A) & (B) - Treatment Room Need Assessment

The Applicant currently has two procedure rooms, two Stage One, and two Stage two recovery stations. The table below shows the historical utilization at the facility for the period 2015-2018. Based upon the historical and projected utilization data, the Applicant can justify the two procedure rooms.

TABLE FOUR Historical and Estimated 2023 Number of Hours at the Surgery Center					
Year	2015	2016	2017	2018	2023
Hours	1,198	1,610	1,542	1,372	2,613 (Proj.)
1,372 Actual Hours + 1,240.60 Projected hours (Table Three above) = 2,613 Hours					

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION TREATMENT ROOM NEED ASSESSMENT (77 ILAC 1110.235(c) (3) (A) & (B))

E) Criterion 1110.235 (c) (6) – Service Accessibility

The Applicant was not able to meet one of the four conditions listed below.

- A) There are no other IDPH-licensed ASTCs within the identified GSA of the proposed project;
- B) The other IDPH-licensed ASTC and hospital surgical/treatment rooms used for those ASTC services proposed by the project within the identified GSA are utilized at or above the utilization level specified in 77 Ill. Adm. Code 1100;
- C) The ASTC services or specific types of procedures or operations that are components of an ASTC service are not currently available in the GSA or that existing underutilized services in the GSA have restrictive admission policies;
- D) The proposed project is a cooperative venture sponsored by 2 or more persons, at least one of which operates an existing hospital.

1. There 8 ASTCs and 6 hospitals within the 17-mile GSA.
2. One ASTC (Anderson Surgery Center¹) in this 17-mile GSA has been approved to provide the surgical specialties being proposed (podiatry, pain management, ophthalmology and orthopedic surgery services) by the Applicant to be added.

¹ Anderson Surgery Center approved as Permit #18-031 in December 2018 is not operational.

The remaining ASTCs have not been approved to provide all the specialties being proposed. All these surgical specialties are available at the six hospitals in the 17-mile GSA.

3. The services proposed to be added by the Applicant are available in the 17-mile GSA.
4. The propose project is not a cooperative venture.

**TABLE FOUR
ASTCs within the 17-Mile GSA**

ASTC	City	Miles	Specialty	Rooms	2018 hours	Met Standard
The Hope Clinic for Women	Granite City	16.7	OB/GYN	2	942	No
Bel-Clair Ambulatory Surgical Center	Belleville	4.8	Gastro	2	986	No
Illinois Eye Surgeons Cataract Surgery	Belleville	1	Ophthalmology	4	1,872	No
Metrocast Endoscopy Surgery Center	Fairview Heights	0	Gastro, general surgery, plastic surgery and GYN	2	1,382	No
Skin Cancer Surgery Center ⁽¹⁾	O'Fallon	4.9	General	0	0	NA
Physician's Surgical Center ⁽²⁾	O'Fallon	5.7	Gastro	2	1,093	No
Novamed Eye Surgery Center of Maryville	Maryville	11.8	Ophthalmology	1	973	Yes
Anderson Surgery Center ⁽¹⁾	Edwardsville	16.5	General, Gastro, Obstetrics, Ophthalmology, Oral, Otolaryngology, Pain Management, Plastic, Podiatric and Urologic Surgery	3	0	NA

1. Surgery Center approved as Permit #18-031 not yet operational.
2. Approved to relocate to O'Fallon, Illinois Permit #19-025

**TABLE FIVE
Hospitals within the 17-mile GSA**

Hospital	City	Miles	Operating/Procedure Rooms	2018 hours	Met Standard
Touchette Regional Hospital	Centreville	9.3	6	940	No
Memorial Hospital	Belleville	4	33	16,839	No
Gateway Regional Medical Center	Granite City	16.8	10	5,380	No
HSHS St Elizabeth's Hospital	O'Fallon	5.8	14	14,943	No
Memorial Hospital - East	Shilo	5.2	6	3,882	No
Anderson Hospital	Maryville	12.3	12	10,633	No
Total Operating/Procedure Rooms			81		

STATE BOARD STAFF FINDS THE PROPOSED PROJECT NOT IN CONFORMANCE WITH CRITETION SERVICE ACCESSIBILITY (77 ILAC 1110.235 (c) (6))

F) Criterion 1110.235 (c) (7) – Unnecessary Duplication/Maldistribution

Maldistribution

There is a total of 97 operating/procedure rooms in the 17-mile GSA. There are approximately 481,577 residents (2017 population estimate-American Community Survey) in the 17-mile GSA. The ratio of operating/procedure rooms per 1,000 population is .2014 within this GSA [97 operating/procedure rooms ÷ (481,577/1,000 or 481.5) = .2014].

The State of Illinois population is 12,802,000 (2017 IDPH projected) and 2,712 operating procedure rooms (2018 data). The ratio of operating/procedure rooms per 1,000 population in the State of Illinois is .2118 To have a surplus of operating/procedure rooms within the 10-mile GSA the ratio of population to operating/procedure rooms must be 1.5 times the State of Illinois ratio or .3177 operating/procedure rooms per 1,000 population. There is a not a surplus of operating/ procedure rooms in the 10-mile GSA.

Hospitals and ASTCs within the Proposed GSA

There are eight ASTCs and six hospitals within the 10-mile GSA. (see Table above). As stated one ASTC (Anderson Surgery Center) has been approved to provide the surgical specialties being proposed by this project. None of the six hospital are at target occupancy.

The proposed project will result in an unnecessary duplication of service. The Applicants have not successfully addressed this criterion.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT NOT IN CONFORMANCE WITH CRITERION UNNECESSARY DUPLICATION/MALDISTRIBUTION (77 ILAC 1110.235(7))

G) Criterion 1110.235(c)(8)(A) & (B) - Staffing

Metroeast Endoscopy Center is currently staffed in accordance with IDPH and Joint Commission accreditation² staffing requirements. The Applicant anticipate all staff from the existing ASTC will continue to practice there when additional specialties are added. The Applicants intend to hire a full-time RN for the second procedure room, and a medical assistant for ancillary support. The applicants also anticipate the recruitment of a CRNA for anesthesia services.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION STAFFING (77 ILAC 1110.235(c) (8) (A) & (B))

² The **Joint Commission** is a United States-based nonprofit tax-exempt 501(c) organization that accredits more than 21,000 US health care organizations and programs. The international branch accredits medical services from around the world. A majority of US state governments recognize Joint Commission accreditation as a condition of licensure for the receipt of Medicaid and Medicare reimbursements.

H) Criterion 1110.235(c)(9)-Charge Commitment

A listing of procedures by primary CPT code for the proposed new specialties with the maximum charge has been provided as required and includes a certified attestation that the charges for these procedures will not increase in the two years following project completion. The Applicant has met the requirements of this criterion.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IN CONFORMANCE WITH CRITERION CHARGE COMMITMENT (77 ILAC 1110.235(c) (9))

D) Criterion 1110.235(c)(10)(A) & (B) - Assurances

The Applicant notes Metroeast Endoscopy Center will continue its existing peer review program that evaluates whether patient outcomes are consistent with quality standards established by professional organizations for surgical services. If outcomes do not meet or exceed those standards, a quality improvement plan will be initiated.

The Applicant stated:

“By the second year of operation after the project completion date, the annual utilization of the surgical rooms at Metroeast Endoscopic Surgery Center will, by the addition of the anticipated cases, be optimized to exceed its current utilization.”

The criterion requires the facility will be at target utilization within two years after project completion *“not be optimized to exceed its current utilization.”*

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IS NOT IN CONFORMANCE WITH CRITERION ASSURANCES (77 ILAC 1110.235(c) (10) (A) & (B))

IX. Financial Viability

A) Criterion 1120.120 – Availability of Funds

The applicant is funding the project in its entirety with cash on hand, amount to \$331,000. The applicants Dr. Ahmed has no audited financial statements but has supplied a letter from Buckingham Strategic Wealth attesting to the presence of enough financial resources to finance the proposed project in its entirety.

B) Criterion 1120.130 - Financial Viability

The Applicant notes the project is funded entirely with cash/securities (internally), no financial viability ratios are required.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IS IN CONFORMANCE WITH CRITERION AVAILABILITY OF FUNDS (77 IAC 1120.120) AND FINANCIAL VIABILITY (77 IAC 1120.130).

X. Economic Feasibility

A) Criterion 1120.140(a) – Reasonableness of Financing Arrangements

B) Criterion 1120.140(b) – Conditions of Debt Financing

The Applicant is funding this project with cash/securities (internally) no debt is being utilized.

C) Criterion 1120.140 (c) – Reasonableness of Project Costs

Movable Equipment Costs are \$331,000 or \$165,500 per procedure room which is below the State Board Standard of \$504,437 per Operating Room. The Applicant has successfully addressed this criterion.

D) Criterion 1120.140(d) – Projected Direct Operating Costs

The Applicant is estimating \$614.70 in direct operating costs per surgical case by the second year after project completion at the ASTC. The State Board does not have a standard for this criterion.

E) Criterion 1120.140(e) – Total Effect of the Project on Capital Costs

The Applicant is estimating \$21.48 in capital costs per surgical case by the second year after project completion at the ASTC. The State Board does not have a standard for this criterion.

STATE BOARD STAFF FINDS THE PROPOSED PROJECT IS IN CONFORMANCE WITH CRITERION REASONABLENESS OF PROJECT COSTS (77 IAC 1120.140(a) TERMS OF DEBT FINANCING (77 IAC 1120.140(b), REASONABLENESS OF PROJECT COSTS (77 IAC 1120.140(c), PROJECTED DIRECT OPERATING COSTS (77 ILAC 1120.140(d), and PROJECTED TOTAL EFFECT OF THE PROJECT ON CAPITAL COSTS (77 ILAC 1120.140(e)).

Re: Project 19-043, Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

This letter of support is for the proposed low-cost expansion of services at the existing Metroeast Endoscopic Surgery Center. The CON permit proposed will allow those elective Medicare approved Orthopedic Surgery, Podiatry, Pain Management and Ophthalmology procedures to be performed at the surgery center. Over time the Centers for Medicare and Medicaid services has expanded the list of surgeries that are safe and effective when performed in an ambulatory surgery center and adding these surgical specialties will address the need for lower cost services that will help our governments, private payors, patients and their families manage the high cost of health care.

My provider organizations have had a long and fruitful association with the State as a leading area Medicaid provider. Our surgery center was the first new surgery center in decades to serve the needs of the patients of the Illinois suburbs of St. Louis, known as the Metro East region. This was during a period when the two large hospital systems were moving their services away from the immediate area.

We are forever grateful to this Board which allowed us to open our doors to provide services to the local population. I take pride in stating that we have been able to fulfill our promise of caring for the indigent. MESC has a track record of seeing more Medicaid patients than any other outpatient facility in the area. We take pride in the fact that 25% of patients who receive care from MESC are Medicaid recipients. This is a patient population that is not accepted at any other local center, a patient population that if it wasn't for MESC would be making a journey across the river to Missouri for their outpatient surgery center surgical needs. Thank you for your confidence in us.

I would also like to express my disappointment in HSHS's aggressive posture toward this small center. I don't understand why in the world a \$2.5 billion dollar health system (nearly 1,000 times the revenue of MESO) is on the attack trying to block a low cost project like this one. Such a small change would not be reviewable if one of the HSHS hospitals was adding surgical specialties in its operating rooms. HSHS should not be allowed to use the CON process to block healthy competition. Its complaints should not be given credence.

Our elected officials, area organizations, patients and local physicians are really pleased about the plan to expand our offerings, and I sincerely hope the CON process will not be a barrier.

I hope this process will recognize that surgical providers need a level playing field and that the Board will approve the request. Thanking you in anticipation,

A handwritten signature in black ink, appearing to read 'Shakeel Ahmed', written in a cursive style.

Springfield, Illinois 62761

Re: Support of IHFSRB Project #19-043

Dear Mr. Sewell,

As a Metroeast Endoscopic Surgery Center (the ASC) patient, I'm writing to encourage the Illinois Health Facilities and Services Review Board to approve the ASC's request to allow new specialist physicians to get on staff and provide care to Fairview Heights patients without having to travel to Missouri for specialty surgical care. The ASC is an important component of access to services in the area, as patients often leave Illinois to obtain care in St. Louis. By expanding the scope of services available at this center, patients like me will be able to obtain lower cost, high quality surgical care in their home state and closer to home.

I have nothing but nice things to say about the staff and facilities at this center and am in full support of its plan to add surgical specialties.

I urge the Planning Board to approve the expansion plan which will improve access to care in the community.

Sincerely,

Bryce Chadduck
1329 N. 2nd St.
Dupo, IL 62239

Re: Support of IHFSRB Project #19-043 for Expansion of Metroeast Surgery Center

Dear Mr. Sewell,

I'm reaching out to express my support for the proposed addition of specialties at Metroeast Endoscopic Surgery Center (MESc). With St. Elizabeth's Hospital and Physicians' Surgical Center both relocating from nearby Belleville to O'Fallon, Illinois, it is critical that MESc add podiatry, pain management, ophthalmology and orthopedic surgery services to ensure the needs of surgical patients in Fairview Heights and Belleville are met.

Also, as the population in my community continues to age, demand for surgical services will no doubt increase as well. It is vital that MESc is able to provide a broad array of specialties to address more of these ailments and treat the entire individual.

I encourage the Illinois Health Facilities & Services Review Board to approve this important project to support access to high quality, cost effective surgical care.

Respectfully,

Shirley Jones

Re: Support of Project #19-043

Dear Mr. Sewell,

Please approve the recent Certificate of Need application filed by Metroeast Endoscopic Surgery Center to add podiatry, pain management, ophthalmology and orthopedic surgery services in Fairview Heights. As a satisfied patient, I appreciate being able to have surgery in an ambulatory surgical center where services often cost 25% of what they would if performed in a hospital. These lower costs help everyone, patients like me and our employers who pay for expensive health care. Further, I much prefer the convenient ASC setting over having to navigate a hospital campus to obtain these services.

For many folks in my community, the Fairview Heights surgery center is the only option for receiving this convenient, lower cost care, as it is the only ASC in the area for which Medicaid patients constituted a large portion of its cases. This surgery center serves nearly a 1,000 Medicaid patients every year. It would be great to expand access to Medicaid patients by increasing the number of specialties available at MESC.

For these reasons, I wish to lend my support to MESC's application, and I respectfully request the HFSRB approve it

Best regards,

To Whom It May Concern:

I would like to lend my support to, Metroeast Endoscopic Surgery Center, (MESC) for the addition of Orthopedic Surgery at their facility. I would like the board to strongly consider this addition to the facility because as a patient of Center for Gastrointestinal Health and Metroeast Endoscopic Surgery Center, I firsthand can attest that this facility is providing excellent service to the people of Southern Illinois and the addition of this much needed subspecialty would be a welcome service for our area.

In addition to me being a patient, I have also served as a board member for a non-profit healthcare provider in the Metro East. I know firsthand the importance of having centers like MESC that provide and improve access to specialty services with excellent quality and cost efficiency.

Please accept my full support for this facility.

Yours truly,

Arthur Johnson

Dear Dr. Ahmed:

This letter reflects Chestnut Health Systems support of Metroeast Endoscopic Surgery Center, (MESC) application to the Illinois Facilities and Healthcare Review Board to add Orthopedic Surgery to the scope of services and surgeries offered at MESC.

Chestnut Health Systems is a federally qualified health center, (FQHC) providing services in several local communities with serious health disparities. Access to all services, including orthopedic care, is important to all families we serve. Access to affordable services especially specialty care is also important for families and individuals to ensure all of their healthcare needs are met. As an FQHC, Chestnut Health Systems provides primary healthcare, including dental services, behavioral health and OB/GYN care. Many of those we serve also require specialty care referrals. Having surgical services provided at ambulatory surgery centers, like MESC, allows our clients to have quality as well as much more affordable care choices and options.

As a provider that cares for persons with chronic medical and behavioral health conditions Chestnut Health Systems is committed to ensure our families are provided the best choices to access all levels of care including the current services and proposed Orthopedic service at MESC.

Please contact me if I can be of further assistance.

Sincerely,

Orville Mercer

Fairview Heights, Illinois 62208

Dear Dr. Ahmed:

This letter confirms East Side Health District's support of your Metroeast Endoscopic Surgery Center, (MESC) application to the Illinois Facilities and Healthcare Review Board to add Orthopedic Surgery as an additional service offered at MESC, in Fairview Heights Illinois.

As you know, East Side Health District serves patients and families throughout St. Clair County and the Metro East, and is committed to helping patients access all services of the best quality and in the most cost-efficient setting. Access to all services, including orthopedic care, is important to all families we serve. Access to affordable services, especially specialty care, is also important for families and individuals to ensure that all of their healthcare needs are met. Many of those we serve also require specialty care referrals. Having surgical services provided at ambulatory surgery centers, like MESC, allows our clients to have quality as well as more affordable care choices and options.

Orthopedic Surgery would be a welcomed addition to the services already offered at this great facility considering the cost savings and convenience it would offer our patients. The addition of Orthopedic Surgery at MESC would help to further close the healthcare gap for our clients.

Please contact me if I can be of further assistance.

Sincerely,

Dear Review Board Committee:

I am writing to give my support for Metroeast Endoscopic Surgery Center's, (MESC) desire to add orthopedics, podiatry, ophthalmology and pain management to its services and to ask the board to give favorable consideration in its evaluation of the application. These additional services would be a welcome addition to the services already offered by MESC. MESC provides quality services to our patients, and I eagerly await the possible addition of these much-needed services at MESC.

Patients that I refer to MESC are pleased with the care they have received from the physicians and the professionalism from each staff member that supports the physicians. I am extremely confident in the current services that MESC provides to patients I refer. I have no doubt that the planned orthopedic, ophthalmology, pain management, and podiatry services will be offered at the same excellent level of quality and care for every patient treated there.

MESC provides excellent and timely care for our community and continues to be a very important part of the healthcare network in this region. Please feel free to contact me if I can be of any further assistance in the application process for Metroeast Endoscopic Surgery Center and Dr. Shakeel Ahmed.

Sincerely,

Springfield, IL 62761

To Whom It May Concern:

I was recently informed that Metroeast Surgery Center is processing a request to add Orthopedic Surgery to its facility. Family members have utilized services at the surgery center for screenings in the past and I was very pleased with the service we received.

I cannot tell you how much I am in favor of the idea, because the cost of Orthopedic Surgery in hospitals can be prohibitive to many citizens in this region and an alternative option like Metroeast Endoscopic Surgery Center, would be a welcome addition. The center is very accessible versus the multiple floors and elevators typical of many hospitals. Many seniors and their caregivers, who are sometimes older and sicker themselves, find it very inconvenient to navigate to a large hospital campus. It is ideal if these services were available and performed locally at a facility which has a great track record of care and amazing cost savings to patients and insurances.

I am in full support of this application and put our support behind it. I am very excited to hear that Orthopedic Surgery is going to be added to Metroeast Endoscopic Surgery Center and fully support it.

Signed,

Pastor Mary Young

Springfield, IL 62761

To Whom It May Concern:

I would like to write in support of the Metroeast Endoscopic Surgery Center's request to add new health services to its location Fairview Heights. We recently learned of MESC's plan to add orthopedic, pain management, podiatry and ophthalmology services to the current services provided. Through the years, MESC has been a stable and excellent provider of health services in this community. MESC continues to be a great resource to the families of our community including some of the members who (probably) attend our church.

MESC accepts most insurance plans and does not refuse care to the uninsured or under insured. MESC and its staff seem to have a genuine sense of community and has a reputation of providing exceptional care at lower cost than the same services offered in a hospital setting.

We at Grace Church wholeheartedly support the addition of these services proposed by MESC. Our campus is within a block of MESC and we see firsthand the value MESC provides to many people. At Grace Church, as is true in the community at large, families want the opportunity to select healthcare in a setting that provides excellent quality, and is not cost prohibitive. Based on MESC's undeniable impact and long-standing presence in Fairview Heights we anticipate a favorable decision for these additional needed services.

Sincerely,

Dr. Phil Silsby
Chairman of the Board

Dear Services Review Board,

This purpose of this letter is to document my support for Metroeast Endoscopic Surgery Center (MESC) in order for them to provide expansion of their services to include; orthopedics, podiatry, ophthalmology, and pain management services and to request that the board give their application favorable consideration. These expanded services would be a much needed and welcomed addition to the services already offered at this innovative and outstanding facility. This facility can offer cost savings and convenience for our mutual patients. Because MESC has provided more timely consultations and outstanding care to our patients in the past, I am very enthusiastic that our patients would benefit from these additional services at MESC. Additionally, their facility has established a great reputation and track record for quality care.

I have had the opportunity to refer patients to MESC and have been impressed by the prompt and courteous patient care services they have received as reflected in positive feedback from both patient and patient family testimonials. The surgery center delivers excellent and timely care for each patient and has always been and will continue to be an integral part of the healthcare network here in the Metro East. Specialty services are in great demand by my patients, so by adding these services to MESC there will be greater access to specialty care for my patients who currently have unacceptable delays in referral waiting periods.

The majority of my patients are Medicaid recipients thus have had problems with prompt access to regional specialists. The MESC has helped alleviate this problem because they have managed Medicaid contracts. Therefore, I overwhelmingly endorse the expansion of their patient care services.

Please do not hesitate to contact me if I can be of additional assistance in your review process. My office number is 618-337-2597 and my exchange number is 618-398-9666.

To Whom It May Concern:

Medicate Pharmacy is pleased to support the Metroeast Endoscopic Surgery Center's, (MESC) application to add Orthopedic services to the surgery center in Fairview Heights. Through its current services, MESC has been a committed organization working to improve the lives of the citizens in St. Clair County, the Metro East, and this region, by offering and delivering quality and affordable services.

As President and CEO of Medicate Pharmacy, I understand firsthand, the need for patients and patient families to have options for quality, affordable healthcare services. Medicate Pharmacy has served the metro east for over 30 years and continues to provide quality services to patients. Through the years I also know that MESC, like Medicate Pharmacy, gives families the choice for excellent quality services at convenient and accessible locations. We also serve many of the same families. We appreciate the past efforts and fully support MESC's application to add orthopedics to its current scope of services.

Affordable, quality services, continue to be at the forefront of healthcare discussions and debate. MESC's efforts are applauded and supported by Medicate Pharmacy. Please do not hesitate to call me if I can be of further assistance with MESC's application.

To Whom It May Concern:

I am writing in support of the addition of Orthopedic Surgery to the Metroeast Endoscopic Surgery Center, (MESC) in Fairview Heights. MESC continues to offer excellent health care to many of the families living, not only in Fairview Heights, but many communities extending well beyond St. Clair County. MESC has been a benchmark of medical care and has done so for over ten years in my Legislative District 113.

Healthcare costs continue to rise at an unprecedented rate. Families in my District and across the State want affordable and the highest quality healthcare for themselves and their families. MESC has provided those services and continues to be accredited by the Joint Commission based on the quality of services it delivers. Even with insurance coverage, deductibles and co-pays can be devastating to a family's budget. Orthopedic Surgery would be a welcome addition to the services already offered at this facility considering the cost savings and convenience it would offer families.

I am very excited that constituents would have access to Orthopedic services at MESC, which as a facility has a track record of care and offers significant cost savings to patients and insurance companies.

Springfield, IL 62761

To Whom It May Concern:

I am writing in support of the addition of Orthopedic Surgery to the Metroeast Endoscopic Surgery Center, (MESC) in Fairview Heights. MESC has been a benchmark of medical care and provided excellent patient care nearly twenty years here in the Metro East, for many of the constituents served in my district.

The socio-economic status in our District, 114, ranges from families living well below the federal poverty level to those living 200 percent above the federal poverty level. Regardless of socio economic status of the families I serve, quality, affordable healthcare is a consistent request of those discussing and seeking medical services. Cost of healthcare continues to be an extremely important topic of conversation of both consumers and payers of healthcare services. The charges at MESC are significantly lower, nearly 50%, than the same hospital-based services. Patients benefit and the insurers alike benefit from services being provided at ambulatory care centers. My office is in full support the addition of Orthopedic Surgery to MESC and appreciates the services already provided at facility.

The families in my district demand both quality and cost-effective alternatives for all of the healthcare services they require. MESC provides both. We look forward to a favorable decision in adding orthopedic services to the scope of services at MESC.

Sincerely,

A handwritten signature in black ink that reads "Latoya Greenwood".

Re: Project #19-043
Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

I recently learned of Dr. Shakeel Ahmed's proposal to add orthopedic surgery services to the Metroeast Endoscopic Surgery Center located in Fairview Heights and would like to oppose the proposal for several reasons. I am an internal medicine/pediatrician who specializes in Sports Medicine. As such, I treat quite a few injuries that require consultation and/or treatment by an orthopedic surgeon.

HSHS St. Joseph's Hospital has an excellent orthopedics service line with physicians and surgical staff who are highly trained and able to care for those I send to them. Many of my patients live in the immediate vicinity of the hospital and being able to care for their needs, close to their homes and families, is very important. Opening an ambulatory surgery center in Fairview Heights could cause a reduction in services offered at the local hospital due to increased outmigration of patients. With adequate outpatient surgical services already in the community, there is no need to add beds which will oversaturate the market.

It is my opinion that the addition of orthopedic surgical rooms would eventually degrade the market and remove services for individuals in their local community. As a physician, I know that patients recover more quickly when they can be close to or within their own home. I would encourage the board to consider the potential impact on patients in these surrounding areas and deny the proposed addition of surgical specialties at Metroeast Endoscopic Surgery Center.

Re: Project #19-043
Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

As the chairperson of HSHS St. Joseph's Hospital's board of directors, I have had the opportunity to be intimately involved in the growth of this hospital over the past seven years. During my tenure, the hospital has received numerous quality and safety awards, including the Guardian of Excellence and Pinnacle of Excellence Awards in Patient Experience from Press-Ganey, a five-star rating for patient experience from the Centers for Medicare & Medicaid Services (CMS) and the Top 100 Rural & Community Hospitals from The Chartis Center for Rural Health.

As I read the proposal to add orthopedic surgery services to the existing Ambulatory Surgery Treatment Center (ASTC) in Fairview Heights, I agreed that access to ambulatory surgical care is essential to the well-being of a community, especially those who are elderly. St. Joseph's Hospital's existing outpatient surgical center provides access to high quality care to the residents of Clinton County eliminating the need for them to drive miles from home to receive care. Knowing that our surgical services department often has open slots for outpatient surgical patients, one of my concerns is that the addition of beds in the ASTC will negatively impact the services we offer locally to patients. Many of our orthopedic patients are elderly with underlying medical issues which make driving distances a burden to family or a hazard to the patient. I feel it would be a dis-service to those in our community to add capacity in a distant facility that would take away local access to care.

It is my opinion that the addition of orthopedic surgical rooms in the Fairview Heights area would negatively impact local access to safe, high quality care for patients. For these reasons, I respectfully ask that you deny the proposed addition of orthopedic surgical services at the Metroeast Endoscopic Surgery Center.

Sincerely,

Re: Project #19-043
Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

Two years ago, I became the Director of Surgical Services for HSHS St. Joseph's Hospital in Highland. Since that time, my focus has centered on expanding the procedures offered in the surgical services department at our community hospital. We have several skilled surgeons and highly trained staff who have worked over the years to ensure that we provide the safest, quality care for our patients.

The proposal submitted by Dr. Shakeel Ahmed to add orthopedic surgery services to the Metroeast Endoscopic Surgery Center located in Fairview Heights could negatively impact our focus on growth for this department, especially as we try to attract new providers to the community. Currently, we have two dedicated orthopedic surgeons who routinely schedule patients for surgeries at our hospital; however, we continue to experience lower than expected utilization on a weekly basis. The proposal from Dr. Ahmed not only has the potential to negatively impact capacity at our hospital but will also affect recruitment efforts of new providers. As part of our growth initiatives, we have ongoing recruitment efforts to bring additional orthopedic surgeons to the area. A priority for new orthopedic surgeons is being able to perform a variety of surgeries on a routine basis to maintain their skill level. Adding orthopedic surgical services at the MESC would only serve to erode the volume of potential surgical procedures that would be performed at our hospital. This in turn leads potential surgeons to seek other facilities that have a larger patient pool where they can maintain their skills.

Re: Project #19-043
Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

I am writing this letter to oppose the addition of orthopedic surgery services at the existing Ambulatory Surgery Treatment Center (ASTC). I proudly serve as the President and CEO of HSHS St. Joseph's Hospital in Breese.

The proposal from Dr. Ahmed noted several reasons why adding orthopedic suites to the Metroeast Endoscopic Surgery Center (MESC) is the best alternative for his business objectives. These focused on improving access and better utilizing existing space and staff. Our hospital provides orthopedic services to residents in Clinton County, which is within the noted GMA of this project. Offering healthcare services that allow us to keep care local has been an ongoing strategy for our hospital leaders and board members. As health care providers, we believe that patients recover best when they are familiar with their surroundings and have loved ones nearby to support them. This often means offering care in convenient locations, close to home.

Physicians and staff at St. Joseph's Hospital provide quality, safe, and convenient care in our surgical services department every day; however, our surgical suites are currently underutilized. A recent addition of a new outpatient center provided 22 beds where we accommodate many of the orthopedic cases. We routinely operate at 28% capacity and have ample ability to accommodate additional volume. I believe that allowing MESC to open an additional operating room for orthopedics would further erode our surgical volume and eventually lead to a re-evaluation of the services we offer to area residents. In turn, this may lead to patients having to seek surgical services many miles from home.

In summary, I believe that adding these services to the MESC would negatively impact our hospital and cause an over-abundance of surgical rooms for the area. I respectfully ask that you deny the proposed addition of surgical specialties at MESC.

Sincerely,

Re: Project #19-043
Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

I am writing this letter to oppose the addition of orthopedic surgery services at the existing Ambulatory Surgery Treatment Center (ASTC) in Fairview Heights. As a primary care physician, I currently see patients at my offices in Clinton and Madison counties which are within the noted GMA of this project. A 10% of my patients require referral to an orthopedic surgeon for further treatment and/or surgery. I have not personally witnessed difficulty in scheduling appointments for patients in need of orthopedic services. In reviewing utilization data for HSHS St. Joseph's Hospital, Breese, the hospital routinely has 72% of its operating rooms available for scheduling every week. In my opinion, this shows that there are opportunities each week for orthopedic cases to be scheduled, eliminating the need for additional operating rooms in the area.

The addition of orthopedic surgical rooms as proposed would negatively impact the surgical volume for these hospitals and lead to an over-abundance of surgical rooms for the area. For these reasons, I respectfully ask that you deny the proposed addition of surgical specialties at Metroeast Endoscopic Surgery Center.

Sincerely,

Brian Klostermann, MD

Re: Project #19-043
Metroeast Endoscopic Surgery Center

Dear Ms. Avery:

As a member of HSHS St. Joseph's Hospital's Board of Directors, I have had the opportunity to be part of the construction and growth of the new hospital over the past 6 years. During my tenure, the hospital has received numerous awards for quality and safety, including a recent five-star rating from the Centers for Medicare & Medicaid Services (CMS) for quality and patient experience. As a member of the board, I strive to ensure that we offer services that are essential to the health and well-being of the local community. I believe that providing health care services locally helps patients remain independent as long as possible and also allows family and friends to lend extra support when needed.

Offering outpatient orthopedic surgery services at the Ambulatory Surgery Treatment Center (ASCT) in Fairview Heights is a duplication of services and undermines the efforts of community hospitals to keep care local. St. Joseph's surgery department has adequate room capacity for orthopedic cases which are not being utilized. Expansion of the ASCT in Fairview Heights would further impact our surgical volume causing us to re-evaluate this service line. The result could require patients to seek outpatient orthopedic services in distant communities, leading to a ripple effect in the area as patients seek health care elsewhere.

It is my opinion that the addition of orthopedic surgical rooms in the Fairview Heights area would lead to a duplication of health care services which would negatively impacting local access to safe, high quality care. I respectfully ask that you deny the proposed addition of orthopedic surgical services at the Metroeast Endoscopic Surgery Center.

Sincerely,

A handwritten signature in black ink that reads 'Jim Burgett'.
