RE: Franciscan St. James Health – Chicago Heights, COE E-08-16
Franciscan St. James Health – Olympia Fields, CON 16-005

Dear Ms. Avery:

As employees of Franciscan St. James Health, our responsibility is to provide excellence in healthcare for our communities. We believe the decision to consolidate two inpatient hospitals to a single facility in Olympia Fields embraces this responsibility and is based on solid planning focused on the health needs of our patients and the realities of today's healthcare environment.

Franciscan St. James' plan will simultaneously improve and expand health access and services, and elevate the quality of healthcare in the region. Having one centralized hospital and one Emergency Department helps to ensure that our patients are getting appropriate, specialized care in a modern, comprehensive facility. Further, the opportunity to gain greater operational efficiencies through the elimination of duplicative and redundant functions will provide the financial stability necessary for Franciscan St. James to continue, for generations to come, the commitment that the Sisters of St. Francis of Perpetual Adoration have made over the past 105 years to the communities we serve.

In unity, the undersigned individuals urge the Illinois Health Facilities and Services Review Board to approve this solid plan for the future of Franciscan St. James Health.

Thank you.

Dear Ms. Avery:

As employees of Franciscan St. James Health, our responsibility is to provide excellence in healthcare for our communities. We believe the decision to consolidate two inpatient hospitals to a single facility in Olympia Fields embraces this responsibility and is based on solid planning focused on the health needs of our patients and the realities of today's healthcare environment.

Franciscan St. James' plan will simultaneously improve and expand health access and services, and elevate the quality of healthcare in the region. Having one centralized hospital and one Emergency Department helps to ensure that our patients are getting appropriate, specialized care in a modern, comprehensive facility. Further, the opportunity to gain greater operational efficiencies through the elimination of duplicative and redundant functions will provide the financial stability necessary for Franciscan St. James to continue, for generations to come, the commitment that the Sisters of St. Francis of Perpetual Adoration have made over the past 105 years to the communities we serve.

In unity, the undersigned individuals urge the Illinois Health Facilities and Services Review Board to approve this solid plan for the future of Franciscan St. James Health.

Thank you.
