UNDERSTORY SAMPLING FORM

Site Name: ______________________________________________

Natural Community Type: __________________________________

County Name: _______________________

Acres: _______

Date of Survey: _______________________

Data Entry Only

Record a tally or count of woody stems with a DBH < 10cm and > 1 meter tall within a Plot radius of 1.78 meters [* See Note below]

<table>
<thead>
<tr>
<th>Species</th>
<th>Plot #</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
<th>10</th>
<th>11</th>
<th>12</th>
<th>13</th>
<th>14</th>
<th>15</th>
<th>16</th>
<th>17</th>
<th>18</th>
<th>19</th>
<th>20</th>
</tr>
</thead>
</table>

Mark each transect start and midpoint with a line at the Quadrat # and label with transect number & azimuth.  Start a new transect # for any gaps along the line.  Start a new form for any new polygon.

Mark / Label Transects Here -->

* Note: tally marks are the default, stem counts will be circled numbers

Use additional sheets if necessary
