FROM: Bob Capuani
DATE: August 10, 2007
RE: BOARD DECISION ON PERIODIC TESTING - 8/9/07

The Elevator Safety Review Board issued a decision to allow State licensed QEI employees of state-licensed elevator companies to temporarily witness periodic pressure testing until February 28, 2008.

All periodic pressure tests that were performed during the period of May 4 to August 9, 2007, that were not witnessed by an inspector, must be performed again and witnessed by a company inspector licensed by the State of Illinois. All test results **must** be left in the machine room with the licensed mechanic's and the licensed inspector's names and State license numbers written on the form.

This decision will be re-reviewed at the February 14, 2008 Board meeting.
