State of Illinois

Application for
9-1-1 Consolidation Plan
INTRODUCTION

The following document provides the application for submitting a 9-1-1 Consolidation Plan that will supply the Department of State Police (Department), the Illinois Commerce Commission (ICC), the Statewide 9-1-1 Advisory Board (Advisory Board) and the Statewide 9-1-1 Administrator (Administrator) with the necessary information about your proposal to consolidate your 9-1-1 system. All consolidations plans must comply with 83 Ill. Adm. Code Part 1324.

The Emergency Telephone System Act ("ETSA" or "Act") (50 ILCS 750) Section 15.4a(b) states that each 9-1-1 authority or qualified governmental entity required to consolidate must file a consolidation plan by July 1, 2016.

There are three consolidation categories. Please find below the documents that need to be included when filing a consolidation plan for each category.

1) Consolidation of an unserved county with an existing 9-1-1 authority and the creation of a Joint ETSB
2) Consolidation of either paper ETSB's or multiple ETSB's resulting in the creation of a Joint ETSB and consolidation of individual PSAP's
3) Consolidation of PSAPs within an ETSB

Consolidation Plans defined under categories 1) and 2) above, must include the following documents when submitting a consolidation plan:

NARRATIVE STATEMENT:

(Provide a detailed summary of system operations for either a consolidation or modified plan. If incorporating an NG9-1-1 solution, please include the additional items listed below pursuant to 1325.205b(12).

1) Indicate the name of the certified 9-1-1 system provider being utilized.
2) Explain the national standards, protocols and/or operating measures that will be followed.
3) Explain what measures have been taken to create a robust, reliable and diverse/redundant network and whether other 9-1-1 Authorities will be sharing the equipment.
4) Explain how the existing 9-1-1 traditional legacy wireline, wireless and VoIP network, along with the databases, will interface and/or be transitioned into the NG9-1-1 system.
5) Explain how split exchanges will be handled.
6) Explain how the databases will be maintained and how address errors will be corrected and updated on a continuing basis.
7) Explain who will be responsible for updating and maintaining the data, at a minimum on a daily basis Monday through Friday.
8) Explain what security measures will be placed on the IP 9-1-1 network and equipment to safeguard it from malicious attacks or threats to the system operation and what level of confidentiality will be placed on the system in order to keep unauthorized individuals from accessing it.

Plan Narrative:

The consolidation is being requested by the Village of Mundelein and Village of Winthrop Harbor to combine 9-1-1 dispatch centers. Both agencies have entered into intergovernmental agreements to combine their existing E9-1-1 public safety answering points (PSAPs) into a single PSAP. To accomplish this, Winthrop Harbor will close its dispatch center and move all dispatch and emergency telephone answering responsibility to Mundelein's E9-1-1 site. The consolidated dispatch center will provide E9-1-1 call handling and emergency communications for the following agencies:

- Village of Mundelein- Police Department
- Village of Mundelein- Fire Department
- Village of Winthrop Harbor- Police Department
- Village of Winthrop Harbor- Fire Department
- Winthrop Harbor Fire Protection District

Utilizing one PSAP instead of two will reduce the number of employees required to staff both PSAPs, increase the efficiency of staff, and there will be a long-term infrastructure costs savings.

Mundelein and Winthrop Harbor will form a JETSB to be known as the Joint Central Lake County Emergency Telephone System Board. The board will be comprised of nine (9) total members. Each party will have at least one active member from each of the fire and police departments on the board. Other board members will be represented based on a proportional formula of 9-1-1 surcharge revenue.

Village Ordinances have been approved by both Mundelein and Winthrop Harbor to establish this JETSB. The Mundelein E9-1-1 center is located in the Mundelein Police Department. The center was constructed in 2002 in compliance with NFPA 1221 standards. The dispatch center is on the first floor of the facility and is secured from outside access. Employees must enter through a secure entry once they have entered the main lobby of the building. The center is equipped with five (5) height adjustable consoles.

Telephones are answered with a Zetron Max Call Taker for 9-1-1 lines and ShoreTel VOIP telephone system for administrative lines. The Zetron Max can be expanded to handle additional 9-1-1 trunks and 10-digit emergency lines to be relocated from the current Winthrop Harbor PSAP. All split exchanges will continue to operate in the same manner as they do today. Address errors will continue to be corrected and updated in the same way they are done today and through ZETRON. The dispatch center is currently working with AT&T and has completed line busy studies. The data for the system will be updated and maintained daily and will be the responsibility of the Communications Supervisor.
Narrative Plan:

To ensure the integrity of the 9-1-1 system the network is separated by a fire wall and access control rules. The security is treated in a manner consistent with other Criminal Justice Systems.

The CAD/Mobile utilize an application from EnRoute CAD/Mobile. The system also supports AVL and field based reporting and is interfaced with LEADS/NCIC. The EnRoute CAD/Mobile is currently hosted by the Lake County ETSB and can support multi-jurisdictional dispatching functionality. In addition, the existing 9-1-1 and CAD system include the ability to transition to NG911 with ESI Net and other NG911 components are available. The RMS function accomplished utilizing CAPERS application, hosted locally on a server.

The radio system in the center was upgraded to Harris M7300 including integration with the StarCom21 radio network and is equipped with and AIS Server for interface to IP capable logging equipment. The logging recorder is a NICE NRX logger and can record both analog and IP recordings. The communications center also has an active alarm board utilizing Manitou alarm monitoring software provided by FSS and AES wireless alarm interfaces. The center has several video feeds which are integrated into a collection of screens easily viewed by employees on duty. The video feeds provide access to the security cameras at the Mundelein police department and the Lake County Department of Transportation PASSAGE traffic system. The building is fully supported by back-up generator power and critical systems are protected by UPS. All facilities have capacity to add additional equipment to support additional agencies.

The consolidated center will be staffed 24 hours per day, 7 days a week, without exception. The five operator positions will have ANI/ALI capability, along with TTY service in the form of test messaging through the Zetron Max 9-1-1 system. The procedure is seamless to the calling party regardless of the communication method used. The Mundelein center meets all standards required of a 9-1-1 PSAP.

Telecommunicators will enter the call information into the CAD system. The CAD will validate the call/incident location and display recommended response units, prior call history, known hazards, and other appropriate information. The unit assignment will then be transmitted to the responding agencies via radio and/or mobile data computer. The Telecommunicators will continue to transfer any misdirected E911 calls to adjacent agencies using the pre programmed Zetron transfer keys. The system forwards ANI/ALI information to the receiving agency. Mundelein staff will gather critical information from the caller, to include callback information, prior to initiating the call transfer to ensure the appropriate response is completed. Radio communications will continue to be available to the adjacent agencies.

All Telecommunicators are trained following the Association of Public-Safety Communications Officials International, Inc (APCO) guidelines to meet or exceed the standards as defined with the Illinois Administrative Code section 83 part 725. Each telecommunicator is trained and certified by ICJIS in the operation of LEAD/NCIC. Telecommunicators are certified in Priority Dispatch EMD protocol and procedures. The operations manual for each agency will be consolidated to a single uniform policy.

The Mundelein communications center will continue to operate as the backup and overflow PSAP for the Vernon Hills dispatch center in the event of a system fail that renders their center to function as a E911 center.

FIVE YEAR STRATEGIC PLAN FOR CONSOLIDATION PLAN

Narrative:

The proposed consolidation includes closing the Winthrop Harbor PSAP. Costs for consolidations have been enumerated/estimated and factored into a five year capital and operational financial plan. The short-term costs exhaust, and/or exceed, the available individual ETSB fund balances. The long-term projections show a balance between the combined operating and capital costs vs. surcharge revenues for the resulting JETSB.

One-time costs related to consolidation are expected to be completed during FY 18-19. The estimated annual expenditures starting in FY 19-20, average $1,200,000.00 for a five year period. The JETSB revenues are estimated at $575,000.00. Including inflation, and making allowances for unanticipated expenditures, revenues and expenditures should balance in the long-term.

During the 2018 calendar year, one-time consolidation costs are estimated to greatly impact the ETSB fund balances. This will be addressed with a combination of General Fund Expenditures and potential Consolidation Grant Funding. In the absence of outside funding, the expenditures contemplated in the 5-year financial plan will have to be curtailed, or delayed, because of consolidation. Any curtailing of funds would be to the detriment of the consolidated operation.

Operationally, the JETSB PSAP will provide dispatch services for multiple agencies and will continue to pursue consolidation partners which provide long-term advantages. Potential partners will be evaluated for long-term fiscal viability along with functional/operations compatibility.

The Winthrop Harbor Fire and Police departments will move to the Mundelein CAD system, resulting in improved interoperability and reduced operation costs. Remote video monitoring for both Mundelein and Winthrop Harbor will be provided. Additional cost sharing opportunities are being explored for areas such as Mass Notification Systems, and LEADS connectivity.

Regarding staffing and personnel, the proposed center will have minimum staffing requirement of two full-trained Telecommunicators for all shifts. Additional personnel can be staffed for planned events which are likely to tax the center’s operational capacity. The consolidation increases Winthrop Harbor capacity during large scale events, while reducing overall head count from the non-combined centers.

The proposed system will include 5 fully operation dispatch positions (9-1-1 Answering system, Radio consoles, CAD workstations), six 9-1-1 trunk lines (4-wireline, 2-wireless), 1 Dispatch supervisor, 9 Full-time dispatchers, 1 Part-time dispatcher. The Zetron 9-1-1 Answering system will be replaced within the next three to five years. The new system is expected to cost $500,000.00. Long-term plans include the evaluation of increased staffing minimums during peak periods and increased specialization in training, hiring, public education and APCO/NENA participation. The Mundelein Police Department also provides a large classroom facility that can be used for regional training. Proper forecasting will allow our dispatch center to expand with the potential for a 3rd consolidation partner as open lines of communication with other departments are ongoing.

TEST PLAN DESCRIPTION

1) Description of test plan (back-up, overflow, failure, database).

The E9-1-1 network design for Mundelein links the Mundelein PSAP at 221 N. Lake Street, Mundelein, IL 60060 to the AT&T E9-1-1 selective router. The backup PSAP will be the Vernon Hills Dispatch Center at 754 Lakeview Parkway, Vernon Hills, IL 60061. The 9-1-1 trunks will be programmed to the AT&T selective router with an overflow route to Vernon Hills Dispatch Center as the second choice. Should all the trucks in the group be busy or be out of service, AT&T selective router will determine if 9-1-1 calls can be re-routed to the Vernon Hills Dispatch Center. AT&T will conduct call-through testing prior to, and during, the cut over to the consolidated PSAP. The testing will involve personnel making test calls to the PSAPs routing telephone number and will be done to ensure every member of the 9-1-1 truck group is tested. The premise equipment will be tested to ensure the system is capable of transferring 9-1-1 calls with at least 99% accuracy.

2) List wireline exchanges to be tested.

Section 7. Dispute Resolution.

A. Negotiations. The parties desire to avoid and settle without litigation any future disputes that may arise between them relative to this Agreement. Accordingly, the parties agree to engage in good faith negotiations to resolve any such dispute. If any party has a dispute about a violation, interpretation, or application of a provision of this Agreement, or a dispute regarding a party’s failure to comply with this Agreement, then that party may serve on the other party written notice, delivered as provided in Section 10 of this Agreement, setting forth in detail the dispute, the provisions of this Agreement to which the dispute is related, and all facts and circumstances pertinent to the dispute. The parties then, within seven (7) days, shall schedule a date certain for representatives of the parties to meet in a conference to resolve the dispute. Such conference shall be conducted within thirty (30) days after notice of the dispute has been delivered as provided herein. If a resolution is not reached within such 30-day period (or such longer period to which the parties may mutually agree), then either party may pursue remedies available under this Agreement, including termination.

B. Continuation of Services and Payments. During all negotiation proceedings and any subsequent proceedings provided for in this Section 7, Mundelein and Winthrop Harbor shall continue to fulfill the terms of this Agreement to the fullest extent possible. Mundelein shall continue to provide Dispatch Services to Winthrop Harbor as provided by this Agreement. C. Remedies. Provided that the parties have met their obligations under Section 7.A, the parties shall be entitled to pursue such remedies as may be available in law
and equity, including an action to secure the performance of the covenants, agreements, conditions, and obligations contained herein. The parties agree that any such action must be brought in the Circuit Court of Lake County, Illinois. The requirements of Section 7.A shall be waived in the event of either significant risk of irreparable harm or significant jeopardy to public health and safety. However, during all periods in which the parties are dealing with a dispute or a remedy, Mundelein shall continue to provide dispatch services only so long as Winthrop Harbor continues to make its monthly payments.

A. Term. The term of this Agreement shall be for 4 years and 10 months following the Commencement Date, terminating on April 30, 2023. The parties may agree to renew or extend such term upon such terms and conditions as are mutually agreeable. If the parties do not agree upon a new Contract Price, and if neither party has given timely notice to terminate, then the contract will renew under the same terms and the new Contract Price shall increase at the rate of 3% from the contract price immediately preceding the contract year in question.

B. Termination. This Agreement may be terminated pursuant to one of the following:

1. By written amendment to this Agreement duly authorized by the Corporate Authorities of each of the parties; or

2. In the event of a material default under this Agreement, and provided that the parties have failed to resolve matters pursuant to the provisions of Section 7, the non-defaulting party may notify a defaulting party in writing setting forth the nature of the default and the requested remedy of such default. The defaulting party shall thereafter have 10 days to correct the default prior to the non-defaulting party's terminating this Agreement; provided that said 10 day period shall be extended, for a reasonable time not exceeding 90 days, if said default cannot reasonably be cured within said 10-day period. If a defaulting party fails to cure the default within the cure period provided in this Section, the non-defaulting party shall have the right to terminate this Agreement by written notice of termination to the defaulting party, which termination will be effective immediately (or by such other date, not beyond the term of this Agreement, as the non-defaulting party may determine). A party that terminates this Agreement pursuant to this Section shall retain its rights to pursue any and all other remedies that may be available, either in law or in equity under this Agreement.

3. Any party may cancel this agreement without cause with advance written notice of at least 365 days and without regard to whether or not the
Dispute Resolution procedure set forth in Section 7 or the material default procedure set forth in Section 8, paragraph B, subparagraph 3 has been initiated or followed by any party. Upon termination of this Agreement pursuant to this paragraph, Winthrop Harbor shall be responsible to reimburse Mundelein for unemployment compensation costs incurred by Mundelein that are directly attributable to Winthrop Harbor's request for early termination, unless a court of competent jurisdiction determines that such termination of this Agreement was due to a breach of this Agreement by Mundelein.

Section 9. Miscellaneous.

AGREEMENT
Alternate Public Safety Answering Point

For 9-1-1 Emergency Communications
This agreement is made between the Public Safety Answering Point, hereinafter referred to as “PSAP” and the Vernon Hills Police Department for the purpose of effective handling and routing of E-911 and wireless 911 emergency calls for police/fire assistance.

Call Handling

When the volume of emergency calls at the Joint Central Lake County ETSB PSAP is such that an overflow of emergency calls is produced, the overflow of emergency calls will be transferred to the Vernon Hills Police Department. The Vernon Hills Police Department, located at 754 Lakeview Parkway, Vernon Hills, IL 60061, will serve as the secondary PSAP, and will be utilized in the event that the primary Joint Central Lake County ETSB PSAP becomes inoperable, providing the Vernon Hills Police Department is physically capable of receiving such calls. It would then become the receiving center for all emergency public safety services provided to all participating agencies in the Joint Central Lake County ETSB. When the Vernon Hills Police Department receives the emergency call for service originating from the Joint Central Lake County ETSB PSAP, they will dispatch the call via local radio channel 470.8625 to the appropriate jurisdiction and an emergency unit will respond to the call for assistance. The Vernon Hills Police Department will collect the appropriate information about the caller and transfer this information back to the Joint Central Lake County ETSB PSAP for the proper recording of this information.
